## Introduction

The *U.S. International Air Passenger and Freight Statistics* report has been developed to provide the public with additional access to international aviation data. The report is restricted to nonstop commercial traffic traveling between international points and U.S. airports. Global air travel systems are comprised of complex, ever-changing networks and alliances. The majority of international passengers to and from the U.S. make at least one connection before reaching their final destination. This report represents a limited aspect of international travel - nonstop flows into and out of the U.S. Cities that serve as an international gateway will have high numbers in this report, but users should bear in mind that some portion of this traffic continued on a connecting flight to their final destination. Conversely, U.S. carriers serve some international points only through an international connection; therefore it might look as if no U.S. carrier serves a certain international point when in fact US carrier traffic is first flowing through a connecting city. Figures for U.S. nonstop market share do not necessarily correlate to the total service provided to that point by U.S. carriers.

The widespread use of code-share agreements also influences this data. Under a code-share agreement, it is common for a passenger to fly on an aircraft owned and operated by a different airline than the one from which they bought their ticket. The data in this report represents the air carrier that operated the passenger or cargo flight reported. In some cases, such as U.S. to China, regulatory impediments make it difficult for U.S. domestic carriers to operate adequate service using their own equipment. U.S. carriers compensate by marketing and selling tickets under their own code to those destinations, and then arranging for a foreign code-share partner to actually transport the passengers. Therefore low U.S. market share in certain restricted markets is not indicative of the true proportion of passengers purchasing U.S. carrier tickets, but rather represents the type of carrier that transported the passengers reported. Code-sharing and network-flow data issues also apply to cargo shipments.

The data in this report is presented in a top-down format. Table 1 provides gross summaries of U.S.-International passengers, capacity, and freight. The same data is then broken down by world area, and country in Tables 2 through 5. Scheduled passenger data for the largest domestic gateway cities, the largest foreign gateway cities, and the largest U.S. - international city-pairs can be found in Tables 6, 7, and 8. All data is derived from the T-100 Segment reports submitted to the Department by U.S. and foreign carriers.

The T-100 program was instituted by the Department of Transportation effective January 1, 1990. It covers traffic reports of foreign airlines operating to the United States and traffic reports of the domestic and international operations of U.S. airlines. The airlines submit these reports monthly to the Department's Office of Airline Information (OAI) of the Bureau of Transportation Statistics. The rules governing disclosure of the International T-100 data require that the data be kept confidential for a period of six months beyond the reporting date.

Users of this report should take the following points into consideration:

- The T-100 segment data includes all traffic arriving at U.S. airports and departing from U.S. airports on nonstop commercial international flights.
- Air carriers that operate aircraft with 60 seats or less are not required to file T-100 data. Therefore passenger volume in particular markets—particularly the Caribbean and certain Canadian markets – is understated in this report due to the large amount of service provided by small aircraft.
- T-100 data represents only nonstop service. The absence of U.S. nonstop service, or a low U.S. flag market share, does not necessarily correlate to the amount of service provided to that point by

U.S. carriers. Many international destinations are served by U.S. carriers via connecting points. Those not heavily served on a nonstop basis are underrepresented in this report.

- Conversely, traffic on U.S.– international routes that serve as connecting gateways will exceed the number of true Origin & Destination passengers on the route because of the high percentage of traffic connecting through the gateway.
- Code-share relationships may cause U.S. carriers to seem under-represented in certain restrictive markets. This data is reported according to the operating carrier. In extensive code-share relationships (particularly to certain Asian countries) U.S. airlines sell a large number of tickets to passengers and then provide transport through the foreign code-share partner.
- Cargo carriers also employ the use of networks and code-share arrangements; therefore cargo data is susceptible to the same reporting shortcomings in this report as passenger data.
- Freight tons do not include mail.

This report is available on the Internet at <http://ostpxweb.dot.gov/aviation>. More extensive International T-100 data is also posted at this location in a downloadable format. Questions and comments should be directed to the Office of Aviation and International Economics, Office of the Secretary, at (202) 366-1032.

## Summary for the Month of- and Year Ended- March 2001

U.S. and foreign air carriers transported 144 million passengers between the United States and the rest of the world for the year-ended March 2001. This represents a traffic increase of 7% over the previous year. U.S. flag market share increased slightly from 49.2% to 49.5%.

### U.S.-international Passenger: YE March 2001

### U.S.-international Seats YE March 2001

Available seats into and out of the United States increased by 4.7% to 199 million for the year-ended March 2001 compared to the previous year. There were 1.2 million flights into and out of the U.S. during the same period. U.S. flag carriers held 49.7% of seat market share and performed 59% of departures.

U.S. and foreign airlines hauled 8.4 million freight tons to and from the United States during the year-ended March 2001, a 3.6% increase from the previous year. U.S. flag share increased from 41.1% to 43.4%.

### U.S.-international Freight YE March 2001

## **Passenger Traffic**

Air passenger traffic between the U.S. and the rest of the world in March 2001 grew 3.6% over March 2000, to 12,264,390 passengers. U.S. airlines carried 51% of passengers traveling to or from international destinations. Charter passengers accounted for 5.6% of international travel.

For the year-ended March 2001, U.S.-world traffic was up 7% over the previous year, to 143,747,094 passengers. U.S. airlines carried 49.5% of passengers, compared to 49.2% the previous year. Charter passengers accounted for 5.8% of international travel.

### ***World Area Trends***

Africa and Australasia/Oceania experienced the fastest rates of nonstop passenger growth to and from the U.S. for the year-ended March 2001. Europe-to-U.S. passenger traffic grew by 3.9 million passengers between the year-ended March 2001 and 2000, the largest absolute regional increase. Eight of nine regions recorded annual nonstop passenger growth between the two periods. The U.S.-to-Middle East traffic growth was flat.

Nearly 51.8 million passengers flew between the U.S. and Europe for the year-ended March 2001, making it the largest U.S.-international regional gateway. Europe is followed by the Far East at 23 million passengers and Central America at 21.4 million.

### ***Country Trends***

The top five U.S.-international country passenger gateways for the year-ended March 2001 were the United Kingdom, Canada, Mexico, Japan, and Germany. Twenty-four of the top 25 country markets posted positive passenger growth rates for the year-ended March 2001 vs. 2000. Venezuela posted a 10% loss. U.S. flag share was down in nine of the 25 country markets, remained unchanged in three, and increased in 13 countries.

### ***Gateway Trends***

The top domestic scheduled passenger gateway airports for the year-ended March 2001 were New York City-JFK, Los Angeles, Miami, Chicago-ORD, and Newark. Load factors were 70% or higher in 31 out of the top 40 domestic gateway airports. Load factors were below 60% in only two of the top 40 -- San Antonio and San Juan. Seven of 40 domestic gateways posted traffic losses compared to the year-ended March 2000.

The top foreign scheduled passenger gateways for the year-ended March 2001 were London-Heathrow, Tokyo, Toronto, Frankfurt, and Paris-Charles de Gaulle. Amsterdam, Manchester (U.K.), Munich, Rome, and Tel Aviv had load factors of 80% or more for the annual period. Montreal and Toronto had the lowest load factors of 60% and 62% respectively. Five of the top 40 foreign gateways reported traffic losses compared to the year-ended March 2000.

The top U.S.-international gateway segments were 1) New York-JFK to London-Heathrow; 2) Honolulu to Narita; 3) Los Angeles to Narita; 4) Los Angeles to London-Heathrow; and 5) Chicago-O'Hare to London-Heathrow.

## **Departures and Seat Capacity**

Departures between the U.S. and the rest of the world for the month of March 2001 increased 8.4% compared to March 2000. Available seats grew by 4.8% over the same period. U.S.

airlines provided 50.5% of international seats and 60.1% of departures. Charter service accounted for 5.2% of international seats and 5.0% of international departures.

For the year-ended March 2001, U.S.- world seats were up 4.7% over the previous year, to 198.6 million. Departures grew by 7.8%. U.S. airlines provided 49.7% of seats, compared to 48.9% the previous year.

### ***World Area Trends***

Australasia/Oceania experienced the greatest relative increase in seats to and from the U.S. for the year-ended March 2001. Europe-to-U.S. capacity grew by 3.5 million between the year-ended March 2001 and 2000, the largest absolute regional increase. Seven of nine regions recorded an annual seat capacity increase between the two periods. South America and the Middle East experienced declines in available seats.

Over 66.3 million seats were available between the U.S. and Europe for the year-ended March 2001, making it the largest U.S.-international regional gateway from a capacity standpoint. Europe is followed by Central America with 30.7 million, the Far East with 30.3 million, and Canada with 28.7 million seats.

### ***Country Trends***

The top five U.S.- International country gateways for seat capacity in the year-ended March 2001 were Canada, the United Kingdom, Mexico, Japan, and Germany. Eighteen of the top 25 country markets posted positive seat capacity growth rates for year-ended March 2001 vs. 2000. Japan and Jamaica's growth was flat while Argentina, Aruba, Belgium, Colombia, and Venezuela reported losses. U.S. flag share was down in six of the 25 country markets, remained unchanged in three, and increased in 16 countries.

### **Freight Traffic**

Airfreight between the U.S. and the rest of the world in March 2001 increased 9.1% over March 2000, to 733,587 tons. U.S. airlines carried 44.3% of freight to and from international destinations. Charter service accounted for 5.8% of international freight traffic.

For the year-ended March 2001, U.S.-world airfreight was up 8.1% over the previous year, to 8.4 million tons. U.S. airlines carried 43.4% of freight, compared to 41.1% the previous year.

### ***World Area Trends***

Canada experienced the greatest relative increase in nonstop freight shipments to and from the U.S. for the year-ended March 2001. Far East-to-U.S. freight traffic increased by 294,863 tons between the year-ended March 2001 and 2000, the largest absolute regional increase. Two of nine regions recorded a loss of freight traffic between the two periods. The Caribbean experienced the greatest relative decline (-27%).

3.3 million tons of freight were transported between the U.S. and Europe for the year-ended March 2001, making Europe the largest U.S. international regional freight gateway. Europe is followed by the Far East with 3 million tons of freight.

### *Country Trends*

The top five U.S.-international country gateways for freight in the year-ended March 2001 were Japan, the United Kingdom, South Korea, Germany, and Taiwan. Twenty of the top 25 country markets posted positive freight growth rates for the year-ended March 2001 vs. 2000. Belgium, Chile, and the Dominican Republic reported losses of 9% or more. U.S. flag share was down in six of the 25 country markets, stayed flat in one, and increased in the remaining 18 countries.
