## Introduction

The *U.S. International Air Passenger and Freight Statistics* report has been developed to provide the public with additional access to international aviation data. The report is restricted to nonstop commercial traffic traveling between international points and U.S. airports. Global air travel systems comprise complex, ever-changing networks and alliances. The majority of international passengers to and from the U.S. make at least one connection before reaching their final destination. This report represents a limited aspect of international travel - nonstop flows into and out of the U.S. cities that serve as an international gateway will have high numbers in this report, but users should bear in mind that some portion of this traffic continued on a connecting flight to its final destination. Conversely, U.S. carriers serve some international points only through an international connection; therefore it might look as if no U.S. carrier serves a certain international point, when in fact U.S. carrier traffic is first flowing through a connecting city. Figures for U.S. nonstop market share do not necessarily correlate to the total service provided to that point by U.S. carriers.

The widespread use of code-share agreements also influences this data. Under a code-share agreement, it is common for a passenger or cargo to fly on an aircraft owned and operated by a different airline than the one from which they bought their ticket. The data in this report represents the air carrier that operated the passenger or cargo flight reported. In some cases, such as U.S. to China, regulatory impediments make it difficult for U.S. domestic carriers to operate adequate service using their own equipment. U.S. carriers compensate by marketing and selling tickets under their own code to those destinations, and then arranging for a foreign code-share partner to actually transport the passengers. Therefore, low U.S. market share in certain restricted markets is not indicative of the true proportion of passengers purchasing U.S. carrier tickets, but rather is representative of the carrier that actually transported them. Code-sharing and network- flow data issues also apply to cargo shipments.

The data in this report is presented in a top-down format. Table 1 provides gross summaries of U.S.-international passengers, capacity, and freight. The same data is then broken down by world area and by country in Tables 2 through 5. Scheduled passenger data for the largest domestic gateway cities, the largest foreign gateway cities, and the largest U.S.-international airport-pairs can be found in Tables 6, 7, and 8. All data is derived from the T-100 Segment reports submitted to the Department by U.S. and foreign carriers.

The T-100 program was instituted by the Department of Transportation effective January 1, 1990. It covers traffic reports of foreign airlines operating to the United States and traffic reports of the domestic and international operations of U.S. airlines. The airlines submit these reports monthly to the Department's Office of Airline Information (OAI) of the Bureau of Transportation Statistics. The rules governing disclosure of the International T-100 data require that the data be kept confidential for a period of six months beyond the reporting date.

Users of this report should take the following points into consideration:

- The T-100 segment data includes all traffic arriving at U.S. airports and departing from U.S. airports on nonstop commercial international flights.
- Prior to October 1<sup>st</sup> 2002, air carriers that operated aircraft with 60 seats or less were not required to file T-100 data. Therefore prior to October 1<sup>st</sup> 2002, passenger volume in particular markets—particularly the Caribbean and certain Canadian markets – had been understated in this report due to the large amount of service provided by small aircraft.
- T-100 data represents only nonstop service. The absence of U.S. nonstop service, or a low U.S. flag market share, does not necessarily correlate to the amount of service provided to that point by U.S. carriers. Many international destinations are served by U.S. carriers via connecting points. Those not heavily served on a nonstop basis are underrepresented in this report.
- Conversely, traffic on U.S.-international routes that serve as connecting gateways will exceed the number of true Origin & Destination passengers on the route because of the high percentage of traffic connecting through the gateway.
- Code-share relationships may cause U.S. carriers to seem under-represented in certain restrictive markets. This data is reported according to the operating carrier. In extensive code-share relationships (particularly to certain Asian countries) U.S. airlines sell a large number of tickets to passengers and then provide transport through the foreign code-share partner.
- Cargo carriers also employ the use of networks and code-share arrangements; therefore, cargo data is susceptible to the same reporting shortcomings in this report as passenger data.
- Freight tons do not include mail.
- The T100 dataset is dynamic and subject to edits and updates. The data in this report represent a snapshot of the T100 segment on the day the report tables are generated. This report will contain most recent data for the current month and previous 35 months.

This report is available on the Internet at <https://www.transportation.gov/policy/aviation-policy/us-international-air-passenger-and-freight-statistics-report>. More extensive International T-100 data is also posted at this location in a downloadable format. Questions and comments should be directed to Randall Keizer, Office of Aviation Analysis, Office of the Secretary, at (202) 366-2347.

## Summary for the Month of June 2024 and Year-Ended June 2024

**U.S.- International Passengers  
YE June 2024**

U.S. and foreign air carriers transported 250.3 million passengers between the United States and the rest of the world for the year-ended June 2024, up 14% from the same 12-month period a year earlier. U.S. flag market share was even at 52% versus the preceding 12-month period. U.S. and foreign charter passengers accounted for 0.6% of international travel.

For the 12 months ended June 2024, available seats into and out of the United States were 307.1 million, representing a 14% increase from the preceding 12-month period. U.S. flag carrier share of seats was even at 52% versus the preceding 12-month period, and U.S. carriers performed 57% of all departures. Flights into and out of the United States were 1.8 million for the year-ended June 2024, representing an increase of 11% from the preceding 12-month period. Charter service for all airlines accounted for 1.0% of international seats and 4.6% of international departures.

**U.S.- International Seats  
YE June 2024**

**U.S.- International Freight  
YE June 2024**

U.S. and foreign airlines carried 12.2 million freight tons to and from the United States during the 12 months ended June 2024, representing a 3% increase from the preceding 12-month period. U.S. flag carrier share was 47%, even versus the preceding 12-month period. Charter service accounted for 22% of international freight traffic.

## **Passenger Traffic**

Air passenger traffic between the U.S. and the rest of the world during the month of June 2024 increased 7% from June 2023 to 23,733,600 passengers. U.S. airlines carried 53% of total passengers traveling to or from international destinations. U.S. and foreign charter passengers accounted for 0.7% of international travel.

### ***World Area Trends***

The largest U.S.- international regional gateway was the United States to Europe, where 71.7 million passengers were transported during the year-ended June 2024 period. Europe is followed by Central America with 56.2 million passengers and Canada with 30.2 million passengers. Combined, this accounts for 63.2% of all passenger traffic to and from the United States, a decrease of 1.4 points from the preceding 12-month period for the top three traffic regions.

### ***Country Trends***

The top five U.S.- international country passenger gateways for the year-ended June 2024 were Mexico, Canada, the United Kingdom, the Dominican Republic, and Germany. Of the top 25 country markets, traffic increased in all 25 markets compared to the prior year 12-month period. U.S. flag share was up in nine of the top 25 country markets, unchanged in seven countries, and down in the remaining nine country markets.

### ***Gateway Trends***

The top five domestic scheduled passenger gateway airports for the year-ended June 2024 were New York, NY (JFK), Los Angeles, CA (LAX), Miami, FL (MIA), New York, NY (EWR), and San Francisco, CA (SFO). Of the top 40 domestic gateway airports, 26 had a load factor of 80% or higher. During this period, 38 of the top 40 U.S. gateway airports recorded increased passenger traffic on a year-over-year basis.

The top five foreign scheduled passenger gateways for the year-ended June 2024 were London, England (LHR), Cancun, Mexico (CUN), Toronto, Canada (YYZ), Paris, France (CDG), and Mexico City (MEX). During this period, 39 of the top 40 international gateways recorded increased passenger traffic on a year-over-year basis. Thirty-five international gateways recorded a load factor of 80% or higher. The top 5 U.S.-international gateway segments were New York (JFK) to London (LHR), New York (JFK) to Paris (CDG), Los Angeles (LAX) to London (LHR), San Francisco, CA (SFO) to Taipei, TW (TPE), and Dallas, TX (DFW) to Cancun (CUN), representing 21.9% of the total top 40 international gateway segment passengers.

## **Departures and Seat Capacity**

Departures between the U.S. and the rest of the world for the month of June 2024 were up 8% compared to June 2023, while seats increased 8% over the same period. U.S. airlines provided 53% of international seats and 58% of departures. Charter service for all airlines accounted for 1.1% of international seats and 4.7% of international departures.

### ***World Area Trends***

For the year-ended June 2024, eight world area regions recorded an increase in annual seat capacity, and one remained unchanged. The Far East increased the most in relative seat capacity, up 39% in the period. The U.S.- Europe market was the largest by seat share, with 87.7 million, or 28.6% of the total seats.

### ***Country Trends***

The top five U.S.-international country gateways for seat capacity for the year-ended June 2024 were Mexico, Canada, the United Kingdom, the Dominican Republic, and Germany. Of the top 25 U.S.-international countries, seat capacity increased in 24 countries over the preceding 12-month period. U.S. flag seat share was down in seven of the 25 country markets, unchanged in six and up in 12 country markets.

## **Freight Traffic**

Air freight between the U.S. and the rest of the world in the month of June 2024 increased 5% from June 2023 to 1,036,907 tons. U.S. airlines carried 47% of the total freight to and from international destinations. Charter service accounted for 21% of international freight traffic.

### ***World Area Trends***

The Caribbean experienced the greatest relative increase in nonstop freight shipments to and from the U.S. for the year-ended June 2024, increasing by 22% over the preceding 12-month period. With 5.1 million tons transported during this period, the Far East is the largest U.S.-international freight gateway, representing 42% of all U.S.-international freight traffic. Freight traffic decreased in one region and increased in eight regions, year-over-year.

### ***Country Trends***

The top five U.S.-international country gateways for freight for the year-ended June 2024 were China, South Korea, Japan, Hong Kong, and Germany. Of the top 25 country markets, freight traffic increased in 14 markets and decreased in 11 markets, year-over-year. Of the 11 country markets posting declines, Belgium had the highest relative loss rate, down 12 percent from the preceding 12-month period. U.S. flag share was down in 14 of the 25 country markets, unchanged in four country markets, and up in the remaining seven country markets.
