Introduction

The *U.S. International Air Passenger and Freight Statistics* report has been developed to provide the public with additional access to international aviation data. The report is restricted to commercial traffic that travels on nonstop segments between international points and the United States. Global air travel systems comprise complex, ever-changing networks and alliances. The large number of international passengers to and from the United States make at least one connection before reaching their destination. This report represents a limited aspect of international travel – nonstop segment flows into and out of the U.S. cities that serve as an international gateway. Users should bear in mind that some portion of this traffic continued on a connecting flight to its final destination. Conversely, U.S. carriers serve some international points only through an international connection; therefore, it might look as if no U.S. carrier serves a certain international point, when in fact U.S. carrier traffic is first flowing through a connecting city. Figures for U.S. carriers' nonstop traffic share do not necessarily correlate to the total service provided to that point by U.S. carriers.

The widespread use of code-share agreements also influences this data. Under a code-share agreement, it is common for a passenger or cargo to fly on an aircraft owned and operated by a different airline than the one from which they bought their ticket. The data in this report represents the air carrier that operated the passenger or cargo flight reported. In some cases, regulatory impediments make it difficult for U.S. carriers to operate adequate service using their own equipment. U.S. carriers compensate by marketing and selling tickets under their own code to those destinations and then arranging for a foreign code-share partner to transport the passengers. Therefore, low U.S. carrier traffic share in certain restricted markets is not indicative of the true proportion of passengers purchasing U.S. carrier tickets but rather is representative of the carrier that actually transported them. Code-sharing and network-flow data issues also apply to cargo shipments.

The data in this report is presented in a top-down format. Table 1 provides gross summaries of U.S.-international passengers, capacity, and freight. The same data is then broken down by world area and by country in Tables 2 through 5. Scheduled passenger data for the largest domestic gateway cities, the largest foreign gateway cities, and the largest U.S.-International airport-pairs can be found in Tables 6, 7, and 8. All data is derived from the T-100 Segment reports submitted to the Department by U.S. and foreign carriers.

The T-100 program was instituted by the Department of Transportation effective January 1, 1990. It covers traffic reports of foreign airlines operating to and from the United States and traffic reports of the domestic and international operations of U.S. airlines. Airlines submit these reports monthly to the Department's Office of Airline Information (OAI) of the Bureau of Transportation Statistics. The rules governing disclosure of the International T-100 data require that the data be kept confidential for a period of six months beyond the reporting date.

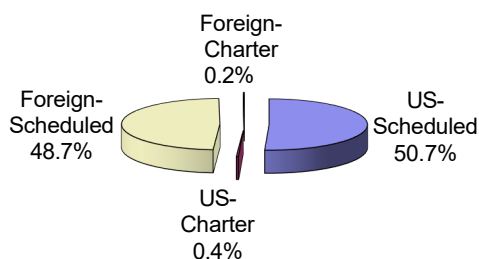

Users of this report should take the following points into consideration:

- The T-100 segment data includes all traffic arriving at U.S. airports and departing from U.S. airports on nonstop commercial international flights.
- Prior to October 1, 2002, air carriers that operated aircraft with 60 seats or less were not required to file T-100 data. Therefore prior to October 1, 2002, passenger volume in particular markets – including the Caribbean and certain Canadian markets – had been understated in this report due to the large amount of service provided by small aircraft.
- T-100 data represents only nonstop service. The absence of U.S. nonstop service, or a low U.S. flag traffic share, does not necessarily correlate to the amount of service provided to that point by U.S. carriers. Many international destinations are served by U.S. carriers via connecting points.
- Traffic on U.S.-International routes that serve as connecting gateways will exceed the number of true Origin & Destination passengers on the route because of the high percentage of traffic connecting through the gateway.
- Code-share relationships may cause U.S. carriers to seem under-represented in certain restrictive markets. This data is reported according to the operating carrier. In extensive code-share relationships, U.S. airlines sell a large number of tickets to passengers with transport provided by the foreign code-share partner.
- Cargo carriers also employ the use of networks and code-share arrangements; therefore, cargo data is susceptible to the same reporting shortcomings in this report as passenger data.
- Freight tons do not include mail.
- The T100 dataset is dynamic and subject to revisions and updates. The data in this report represents a snapshot of the T100 Segment dataset on the day the report tables are generated. This report will contain most recent data for the current month and previous 35 months.

This report is available at: <https://www.transportation.gov/policy/aviation-policy/us-international-air-passenger-and-freight-statistics-report>. More extensive International T-100 data is also posted at this location in a downloadable format. Questions and comments should be directed to Randall Keizer, Office of Aviation Analysis, Office of the Secretary, at (202) 366-2347.

Summary for the Month of December 2025 and Year-Ended December 2025

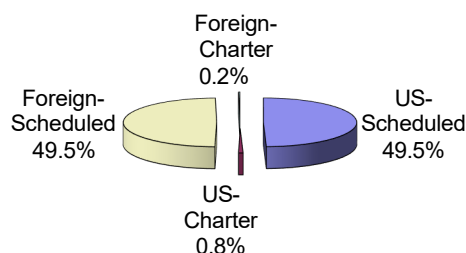

**U.S.- International Passengers
YE December 2025**

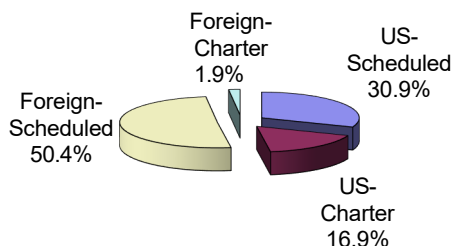

U.S. and foreign air carriers transported 259.6 million passengers between the United States and the rest of the world for the year-ended December 2025, unchanged from the same 12-month period a year earlier. U.S. flag market share was unchanged at 51% versus the preceding 12-month period. U.S. and foreign charter passengers accounted for 0.2% of international travel.

For the 12 months ended December 2025, available seats into and out of the United States were 321.1 million, representing a 2% increase from the preceding 12-month period. U.S. flag share of seats fell 1 point to 50% versus the preceding 12-month period, and U.S. carriers performed 57% of all departures. International departures were 1.8 million for the year-ended December 2025, representing an unchanged from the preceding 12-month period. Charter service for all airlines accounted for 1.0% of international seats and 4.0% of international departures.

**U.S.- International Seats
YE December 2025**

**U.S.- International Freight
YE December 2025**

U.S. and foreign airlines carried 12.4 million freight tons to and from the United States during the 12 months ended December 2025, representing a 1% decrease from the preceding 12-month period. U.S. flag share was 48%, up 1 point versus the preceding 12-month period. Charter service accounted for 19% of international freight traffic.

Passenger Traffic

Air passenger traffic between the U.S. and the rest of the world during the month of December 2025 decreased 1% from December 2024 to 22,055,061 passengers. U.S. airlines carried 52% of total passengers traveling to or from international destinations, up from 51% in December 2024. U.S. and foreign charter passengers accounted for 0.6% of international travel.

World Area Trends

The largest U.S.- international regional gateway was the United States to Europe, where 75.3 million passengers were transported during the year-ended December 2025 period. Europe is followed by Central America with 58.2 million passengers and the Caribbean with 29.3 million passengers. Combined, this accounts for 62.7% of all passenger traffic to and from the United States, a decrease of 0.5 points from the preceding 12-month period for the top three traffic regions.

Country Trends

The top five U.S.- international country passenger gateways for the year-ended December 2025 were Mexico, Canada, the United Kingdom, Germany, and the Dominican Republic. Of the top 25 passenger gateway countries, traffic increased to 16 gateways, decreased to six, and was unchanged to three, compared to the previous 12-month period. U.S. flag share was up in seven of the top 25 gateway countries, unchanged in seven gateways, and down in the remaining 11.

Gateway Trends

The top five domestic scheduled passenger gateway airports for the year-ended December 2025 were New York, NY (JFK), Los Angeles, CA (LAX), Miami, FL (MIA), San Francisco, CA (SFO), and New York, NY (EWR). Of the top 40 domestic gateway airports, 29 had a load factor of 80% or higher. During this period, 22 of the top 40 U.S. gateway airports recorded increased passenger traffic on a year-over-year basis.

The top five foreign scheduled passenger gateways for the year-ended December 2025 were London, England (LHR), Cancun, Mexico (CUN), Toronto, Canada (YYZ), Mexico City, Mexico (MEX), and Paris, France (CDG). During this period 19 of the top 40 international gateways recorded increased passenger traffic on a year-over-year basis. Thirty-six international gateways recorded a load factor of 80% or higher. The top 5 U.S.-international gateway segments were New York (JFK) to London (LHR), New York (JFK) to Paris (CDG), Los Angeles (LAX) to London (LHR), San Francisco, CA (SFO) to Taipei, TW (TPE), and Los Angeles (LAX) to Seoul, South Korea (ICN), representing 21.4% of the total top 40 international gateway segment passengers.

Departures and Seat Capacity

Departures between the U.S. and the rest of the world for the month of December 2025 increased 2% compared to December 2024, while seats were up 2% over the same period. U.S. airlines provided 52% of international seats and 58% of departures. Charter service for all airlines accounted for 1.2% of international seats and 4.2% of international departures.

World Area Trends

For the year-ended December 2025, seven world area regions recorded an increase in annual seat capacity, and two were down. The Far East increased the most in relative seat capacity, up 6% in the period. U.S.-Europe was the largest by seat share, with 91.0 million, or 28.3% of the total seats.

Country Trends

The top five U.S.-international country gateways for seat capacity for the year-ended December 2025 were Mexico, Canada, the United Kingdom, the Dominican Republic, and Germany. Of the top 25 U.S.-international countries, seat capacity increased in 18 countries and decreased in seven countries over the preceding 12-month period. U.S. flag seat share was down in 12 of the 25 countries, unchanged in eight, and up in five countries.

Freight Traffic

Air freight between the U.S. and the rest of the world in the month of December 2025 decreased 5% from December 2024 to 1,048,963 tons. U.S. airlines carried 49% of the total freight to and from international destinations. Charter service accounted for 20% of international freight traffic.

World Area Trends

The Middle East experienced the greatest relative increase in nonstop freight shipments to and from the U.S. for the year-ended December 2025, increasing by 11% over the preceding 12-month period. With 5.2 million tons transported during this period, the Far East is the largest U.S.-international freight gateway, representing 42% of all U.S.-international freight traffic. Freight traffic increased in three of the nine regions year-over-year, decreased in six regions, and remained unchanged in one region.

Country Trends

The top five U.S.-international country gateways for freight for the year-ended December 2025 were China, South Korea, Japan, Germany, and Hong Kong. Of the top 25 countries, freight traffic increased in 13, and decreased in 12, year-over-year. Of the 12 countries posting declines, Luxembourg had the highest relative loss rate, down 36 percent from the preceding 12-month period. U.S. flag share was down in ten of the 25 countries, unchanged in two countries, and up in the remaining 13 countries.
