*Updated version of DOT's rule on air travel by passengers with disabilities.*

**This message was e-mailed to major U.S. airlines and aviation associations on June 14, 2001.**

Attached is an updated MS Word version of our disability rule, 14 CFR Part 382, which incorporates the latest amendment (section 382.40(a): lifts for aircraft with 31 or more seats). This MS Word file is now an up-to-date version of Part 382 that includes all amendments. You are required by law (14 CFR 382.45(d)) to have a copy of Part 382 at every airport you use and to make it available for review on request. I encourage you to promptly provide an up-to-date version of the rule to all the appropriate personnel. (Note: non-compliance with provisions of Part 382 subjects the airline to potential civil penalties of \$10,000 per violation).

Norman A. Strickman  
Assistant Director for Aviation Consumer Protection  
Office of Aviation Enforcement and Proceedings  
Office of the General Counsel
