AMERICAN AIRLINES / FEBRUARY 2007

DOT PET INCIDENT REPORT

Carrier and Flight Number

American Airlines Flight #2213

Date and Time of the Incident

2 FEB 2007 at approximately 2:01pm

Description of the Animal, Including Name

English Bulldog named Beau

Narrative Description of Incident

Dog arrived ill off AA Flight #2213 (MIA-LAX) and subsequently expired.

Narrative Description of Cause of the Incident

Dog arrived with fever and very ill. Kennel, animal pillow and surroundings were very cool. The cause of death was due to heatstroke. The necropsy report states that death was likely complicated by brachycephalic syndrome/airway obstruction which is common for this breed. Thorough testing was performed on the aircraft's ventilation system and all systems performed properly. The animal was checked in approximately an hour prior to take-off and there were no ground delays. The ground temperature in Miami was 82F. This may have been a contributing factor given the sensitivity of bulldogs and snub-nosed animals in general. The ground temperature in LAX was 59F at arrival.

Narrative Description of any Corrective Action Taken in Response to Incident

None.
