|---|-----|
| 1. Qualification, Service, and Use of Crewmembers and Aircraft Dispatchers | Red |
|---|-----|

Popular Title: Part 121, Subparts N and O

RIN 2120-AJ00

Stage: Final Rule

Previous Stage: NPRM: Publication Date 01/12/2009;End of Comment Period 05/12/2009; Extension of Comment Period 04/20/2009;End of Extended of Comment Period 08/10/2009. SNPRM: Publication Date 05/20/2011;End of Comment Period 07/19/2011;Extension of Comment Period 06/23/2011;End of Extended of Comment Period 09/19/2011.

Abstract: This rulemaking would amend the regulations for crewmember and dispatcher training programs in domestic, flag, and supplemental operations. The rulemaking would enhance traditional training programs by requiring the use of flight simulation training devices for flight crewmembers and including additional training requirements in areas that

are critical to safety. The rulemaking would also reorganize and revise the qualification and training requirements. The changes are intended to contribute significantly to reducing aviation accidents.

2. **Supercooled Large Droplet Icing Conditions** Red

Popular Title: Supercooled Large Droplet Icing Conditions

RIN 2120-AJ34

Stage: Final Rule

Previous Stage: NPRM: Publication Date 6/29/2010; End of Comment Period 08/30/2010; Publication of Extended Comment Period 08/16/2010; End of Extended Comment Period 9/29/2010.

Abstract: This rulemaking would amend the airworthiness standards applicable to certain transport category airplanes certificated for flight in icing conditions and the icing airworthiness standards applicable to certain aircraft engines. The rulemaking would improve safety by addressing supercooled large drop icing conditions for transport category airplanes most affected by supercooled large drop icing conditions, mixed phase and ice crystal conditions for all transport category airplanes, and supercooled large drop, mixed phase, and ice crystal icing conditions for all turbine engines. This rulemaking is the result of information gathered from a review of icing accidents and incidents.

3. **Airport Safety Management System**

Red

Popular Title: Airport SMS

RIN 2120-AJ38

Stage: Final Rule

Previous Stage: NPRM: Publication Date 10/07/2010;End of Comment Period 01/05/2011;Extension of Comment Period 12/10/2010; End of Extended of Comment Period 03/07/2011; Extension of Comment Period 03/07/2011; End of Extended of Comment Period 07/05/2011.

Abstract: This rulemaking would require airport operators to institute a safety management system at their airports. This action is necessary to improve safety through conformance with best practices in risk management and promote international harmonization with ICAO standards. The rule is intended to facilitate integration of formal risk management processes within the airport’s day-to-day operations.

Red

Popular Title: Photo Requirements

RIN 2120-AJ42

Stage: Final Rule

Previous Stage: NPRM: Publication Date 11/19/2010; End of Comment Period 02/17/2011

Abstract: This rulemaking would require digital photos on all pilot certificates. This action is necessary to update regulations about pilot plastic certificates. The intended effect of this action is to meet all requirements of the Intelligence Reform and Terrorism Prevention Act.

Popular Title: Helicopter Safety Initiatives and Misc Amendments

RIN 2120-AJ53

Stage: Final Rule

Previous Stage: NPRM: Publication Date 10/12/2010; End of Comment Period 01/01/2011.

Abstract: This rulemaking would change equipment and operating requirements for commercial helicopter operations, including many specifically for helicopter air ambulance operations. This rulemaking is necessary to increase crew, passenger, and patient safety. The intended effect is to implement National Transportation Safety Board, Aviation Rulemaking Committee, and internal FAA recommendations.

6. **Operation and Certification of Small Unmanned Aircraft Systems (sUAS)** Red

Popular Title: Small Unmanned Aircraft

RIN 2120-AJ60

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would enable small unmanned aircraft to safely operate in limited portions of the national airspace system (NAS). This action is necessary because it addresses the novel legal or policy issues about the minimum safety parameters for operating recreational remote control model and toy aircraft in the NAS. The intended effect of this action is to develop requirements and standards to ensure that risks are adequately mitigated, such that safety is maintained for the entire aviation community.

7. **Pilot Certification and Qualification Requirements (formerly First Officer Qualification Requirements) (HR 5900)** Red

Popular Title: Pilot Certification and Qualification Requirements

RIN 2120-AJ67

Stage: NPRM

Previous Stage: ANPRM: Publication Date 02/08/2010; End of Comment Period 04/09/2010. NPRM: Publication Date 02/29/2012; Comment Period Closed 04/30/2012.

Abstract: This rulemaking would amend the eligibility and qualification requirements for

pilots engaged in part 121 air carrier operations. Additionally, it would modify the requirements for an airline transport pilot certificate. These actions are necessary because recent airline accidents and incidents have brought considerable attention to the experience level and training of air carrier flight crews. This rulemaking is a result of requirements in P.L. 111-216.

8. **Prohibition Against Certain Flights Within the Territory and Airspace of Afghanistan** Red

Popular Title: Afghanistan SFAR

RIN 2120-AJ69

Stage: Final Rule

Previous Stage: NPRM: Publication Date 05/26/2010;End of Comment Period 06/10/2010.

Abstract: This rulemaking would prohibit flight operations below flight level (FL) 160 within the territory and airspace of Afghanistan by all: U.S. air carriers; U.S. commercial operators; persons exercising the privileges of a U.S. airman certificate, except if the flight is on behalf of a foreign air carrier; and operators of U.S.-registered aircraft, except when such operators are foreign air carriers. The FAA finds this action necessary to prevent a potential hazard to persons and aircraft engaged in such flight operations.

Federal Aviation Administration

9. Requirement for Wildlife Assessments at Certificated Airports

Red

Popular Title: Wildlife Hazard Assessment (WHA)

RIN 2120-AJ71

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would require a Wildlife Hazard Assessment (scientific evaluation of wildlife populations and their attractants) for certificated airports. This rulemaking would also require periodic completion of a wildlife hazard assessment, or continuous wildlife monitoring as an alternative to the assessment, and clarify requirements for those conducting an assessment. This rulemaking is intended to decrease direct hazards (animals striking aircraft) and indirect hazards (animal burrowing and nesting in or near aircraft or aircraft operations areas).

Federal Aviation Administration

10. Regulation Of Flight Operations Conducted By Alaska Guide Pilots

Red

Popular Title: Alaska Guide Pilots

RIN 2120-AJ78

Stage: NPRM

Previous Stage:None

Abstract: The rulemaking would establish regulations concerning Alaska guide pilot

operations. The rulemaking would implement Congressional legislation and establish additional safety requirements for the conduct of these operations. The intended effect of this rulemaking is to enhance the level of safety for persons and property transported in Alaska guide pilot operations. In addition, the rulemaking would add a general provision applicable to pilots operating under the general operating and flight rules concerning falsification, reproduction, and alteration of applications, logbooks, reports, or records.

11. **Air Carrier Maintenance Training Program** Red

Popular Title: Air Carrier Maintenance Training

RIN 2120-AJ79

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would require FAA approval of maintenance training programs of air carriers that operate aircraft type certificated for a passenger seating configuration of 10 seats or more (excluding any pilot seat). The intent of this rulemaking is to reduce the number of accidents and incidents caused by human error, improper maintenance, inspection, or repair practices.

RIN 2120-AJ83

Stage: Final Rule

Previous Stage: NPRM: Publication Date 02/03/2011; End of Comment Period 04/04/2011.

Abstract: This rulemaking would amend design requirements in the airworthiness standards for transport category airplanes in an effort to minimize the occurrence of design-related flightcrew errors. The new design requirements would enable flightcrews to detect and manage their errors when the errors occur. This action would establish uniform airworthiness design standards in the U.S. and Europe.

Abstract: This rulemaking would require each certificate holder operating under 14 CFR part 121 to develop and implement a safety management system (SMS) to improve the safety of its aviation related activities. A safety management system is a comprehensive, process-oriented approach to managing safety throughout an organization. An SMS includes an organization-wide safety policy; formal methods for identifying hazards, controlling, and continually assessing risk and safety performance; and promotion of a safety culture. SMS stresses not only compliance with technical standards but increased emphasis on the overall safety performance of the organization.

14.	Flight Crewmember Mentoring, Leadership and Professional Development (HR 5900)	Red
-----	---	-----

Popular Title: Flight Crewmember Mentoring

RIN 2120-AJ87

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would amend the regulations for air carrier training programs under part 121. The action is necessary to ensure that air carriers establish or modify training programs that address mentoring, leadership, and professional development of flight crewmembers in part 121 operations. The amendments are intended to contribute significantly to airline safety by reducing aviation accidents.

15.	Slot Management and Transparency for LaGuardia Airport, John F. Kennedy International Airport, and Newark Liberty International Airport	Red
-----	--	-----

Popular Title: NY Slot Management

RIN 2120-AJ89

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would replace the current temporary orders limiting scheduled operations at LaGuardia Airport, John F. Kennedy International Airport, and Newark Liberty International Airport with a more permanent rule to address the issues of congestion and delay at the New York area’s three major commercial airports, while also promoting fair access and competition. The rulemaking would help ensure that congestion and delays are managed by limiting scheduled and unscheduled operations. The rulemaking would also establish a secondary market for U.S. and foreign air carriers to buy, sell, trade, and lease slots amongst each other at each of the three airports. This would allow carriers serving or seeking to serve the New York area airports to exchange slots as their business models and strategic goals require.

16. **Part 121 Exiting Icing**

Red

Popular Title: Part 121 Exiting Icing

RIN 2120-AJ95

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would establish the standards for when flightcrews need to take action to exit icing conditions. If adopted, this rulemaking would apply to aircraft with a maximum takeoff weight of less than 60,000 pounds. This rulemaking is based on recommendations from an Aviation Rulemaking Advisory Committee working group after reviewing certain accidents and incidents. The intended affect of this action is to avoid similar accidents and incidents in the future. This rulemaking replaces RIN 2120-AJ74, for which an NPRM had originally been scheduled for 11/02/2011. This rulemaking has expanded the scope of RIN 2120-AJ74 to include requirements for design approval holders.

17. **Production and Airworthiness Certification**

Green

Popular Title: P & A Cert.

RIN 2120-AK04

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would change requirements for certifying aeronautical products and articles. The rulemaking would allow manufacture of certain airframe components by engine manufacturers; add a requirement that an accountable person be named for certain production approval holders; add new marking requirements of articles that have undergone major alteration and for owner-produced articles, and change marking requirements for some wood propellers. These changes are intended to address deficiencies in oversight of supplier facilities.

18.	Orbital Debris Mitigation Requirements	Green
-----	---	-------

Popular Title: Orbital Debris
RIN 2120-AK05
Stage: NPRM
Previous Stage:None

Abstract: This rulemaking would reduce the likelihood of creating orbital debris from a launch vehicle’s upper stages discarded on orbit. Specifically, the rulemaking would more closely align the FAA regulations with the U.S. Government Orbital Debris Mitigation Standard Practices, as directed by the 2010 National Space Policy. This action is necessary to prevent the near Earth space environment from slowly being littered with debris, which increases the likelihood of collisions either between debris and spacecraft or debris and other debris. The intended effect of this action would preserve the viability of the Low Earth Orbit region, and preserve the future space environment.

25.	Unified Registration System	Red
-----	------------------------------------	-----

Popular Title: URS

RIN 2126-AA22

Stage: Final Rule

Previous Stage: ANPRM: Publication Date 08/26/96; End of Comment Period 10/26/96.

NPRM: Publication Date 05/19/05; End of Comment Period 08/17/05. SNPRM: Publication Date 10/26/11; End of Comment Period 12/27/11.

Abstract: This rule would establish a new Unified Registration System (URS) to replace four legacy systems in support of FMCSA’s safety and commercial oversight responsibilities. It would require all entities subject to FMCSA jurisdiction to comply with a new URS registration and biennial update requirement, disclose the cumulative registration information collected by URS and provides a cross-reference to all regulatory requirements necessary to obtain permanent registration. It implements statutory provisions in the ICC Termination Act and SAFTEA-LU. URS would serve as a clearinghouse and depository of information on, and identification of, brokers, freight forwarders, and others required to register with the Department of Transportation.

26.	Application by Certain Mexico-Domiciled Motor Carriers to Operate Beyond U.S. Municipalities and Commercial Zones on the U.S.-Mexico Border	Red
-----	--	-----

Popular Title: Mexico-Domiciled Motor Carriers

RIN 2126-AA34

Stage: Undetermined

Previous Stage: IFR: Publication Date 03/19/2002; End of Comment Period 04/18/2002.

Abstract: This rulemaking would change FMCSA regulations to govern applications by Mexican carriers to operate beyond municipalities and commercial zones at the United State-Mexico border. It would also revise the application form, OP-1MX, to be filed by these Mexican motor carriers. The revised form would require additional information about the applicant’s business and operating practices to allow the FMCSA to determine if the applicant can meet the safety standards established for operating in interstate commerce in the United States. Carriers that had previously submitted an application would have to submit the updated form. These changes are needed to implement part of the North American Free Trade Agreement (NAFTA). On January 16, 2003, the Ninth Circuit Court remanded this rule, along with two other NAFTA-related rules, to the agency, requiring a full environmental impact statement and an analysis required by the Clean Air Act. On June

7, 2004, the Supreme Court reversed the Ninth Circuit and remanded the case, holding that FMCSA is not required to prepare the environmental documents as ruled by the Ninth Circuit. FMCSA originally planned to publish a final rule by November 20, 2003. FMCSA will determine the next steps to be taken after the pilot program on the long haul trucking provisions of NAFTA is completed.

27. **Safety Monitoring System and Compliance Initiative for Mexico-Domiciled Motor Carriers Operating in the United States** Red

Popular Title: Safety Monitoring

RIN 2126-AA35

Stage: Undetermined

Previous Stage: IFR: Publication Date 03/19/2002; End of Comment Period 04/18/2002.

Abstract: This rule would implement a safety monitoring system and compliance initiative designed to evaluate the continuing safety fitness of all Mexico-domiciled carriers within 18 months after receiving a provisional Certificate of Registration or provisional authority to operate in the United States. It also would establish suspension and revocation procedures for provisional Certificates of Registration and operating authority, and incorporate criteria to be used by FMCSA in evaluating whether Mexico-domiciled carriers exercise basic safety management controls. The interim rule included requirements that were not proposed in the NPRM but which are necessary to comply with the FY-2002 DOT Appropriations Act. On January 16, 2003, the Ninth Circuit Court of Appeals remanded this rule, along with two other NAFTA-related rules, to the agency, requiring a full environmental impact statement and an analysis required by the Clean Air Act. On June 7, 2004, the Supreme Court reversed the Ninth Circuit and remanded the case, holding that FMCSA is not required to prepare the environmental documents. FMCSA originally planned to publish a final rule by November 28, 2003. FMCSA will determine the next steps to be taken after the pilot program on the long haul trucking provisions of NAFTA is completed.

29.	Limitations on the Issuance of Commercial Driver Licenses with a Hazardous Materials Endorsement	Black
-----	---	-------

Popular Title: USA PATRIOT Act Rule

RIN 2126-AA70

Stage: Undetermined

Previous Stage: IFR: Publication Date 04/29/2005.

Abstract: This rulemaking would prohibit States from issuing, renewing, transferring or upgrading a commercial driver’s license (CDL) with a hazardous materials endorsement, unless the Transportation Security Administration (TSA) has first conducted a background check on the applicant and determined the applicant does not pose a security risk warranting denial of the hazardous materials endorsement. FMCSA and TSA simultaneously published interim final rules. FMCSA has published another IFR corresponding to TSA’s extension of compliance date. Since this rulemaking conforms to TSA’s rulemaking, the rulemaking is dependent upon TSA action. This action is considered significant because of substantial public and congressional interest, and national security.

Federal Motor Carrier Safety Administration

34. **Carrier Safety Fitness Determination** Red

Popular Title: Carrier Safety Fitness Determination

RIN 2126-AB11

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would revise 49 CFR Part 385, Safety Fitness Procedures, in accordance with the Agency's Compliance, Safety, Accountability (CSA) initiative. CSA is an operational model FMCSA implemented that is designed to help the Agency carry out its compliance and enforcement programs more efficiently and effectively. Currently, the safety fitness rating of a motor carrier is determined based on the results of a very labor intensive compliance review conducted at the carrier's place of business. Aside from roadside inspections and new entrant audits, the compliance review is the Agency's primary intervention. Under CSA, FMCSA would propose to implement a broader array of progressive interventions, some of which allow FMCSA to make contact with more carriers.

Through this rulemaking FMCSA would establish safety fitness determinations based on safety data from crashes, inspections, investigations, and violation history rather than just the standard compliance review. This will enable the Agency to assess the safety performance of a greater segment of the motor carrier industry with the goal of further reducing large truck and bus crashes and fatalities.

36. **Commercial Driver's License Drug and Alcohol Clearinghouse**

Red

Popular Title: CDL Drug and Alcohol Database

RIN 2126-AB18

Stage: NPRM

Previous Stage: None

Abstract: This rulemaking would create a central database for verified positive controlled substances and alcohol test results for commercial driver’s license (CDL) holders and refusals by such drivers to submit to testing. This rulemaking would require employers of CDL holders and service agents to report positive test results and refusals to test into the database. Prospective employers, acting on an application for a CDL driver position with the applicant’s written consent to access the database, would query the database to determine if any specific information about the driver applicant is in the database before allowing the applicant to be hired and to drive CMVs. This rulemaking is intended to increase highway safety by ensuring CDL holders, who have tested positive or have refused to submit to testing, have completed the U.S. DOT’s return-to-duty process before driving CMVs in interstate or intrastate commerce. It is also intended to ensure that employers are meeting their drug and alcohol testing responsibilities.

37.	Electronic On-Board Recorders and Hours of Service Supporting Documents	Green
-----	--	-------

Popular Title: EOBR and HOS supporting documents

RIN 2126-AB20

Stage: SNPRM

Previous Stage: NPRM: Publication Date 02/01/11; End of Comment Period 04/04/2011, NPRM: Extension of Comment Period 04/13/2011; End of Extended Comment Period 05/23/11; Notice of Intent 02/13/2012.

Abstract: This rulemaking will consider revisions to RIN 2126-AA89 (Electronic On-Board Recorders for Hours of Service Drivers) to expand the number of motor carriers required to install and operate Electronic On-Board Recorders (EOBRs). FMCSA has consolidated this follow-up to the EOBR rule with the Hours Of Service Of Drivers: Supporting Documents rulemaking for development of a single NPRM in RIN 2126-AB20. In addressing Hours of Service Supporting Documents requirements in this new rulemaking, FMCSA will consider reducing or eliminating current paperwork burdens associated with supporting documents in favor of expanded EOBR use. In addition it will propose technical standards for an EOBR, address driver harassment issues, and provide clarification and request further comments on several issues. On January 15, 2010, the American Trucking Associations (ATA) filed a Petition for a Writ of Mandamus in the United States Court of Appeals for the District of Columbia Circuit (D.C. Cir. No. 10-1009). ATA petitioned the court to direct FMCSA to issue an NPRM on supporting documents in conformance with the requirements set forth in section 113 of the HMTAA within 60 days after the issuance of the writ and a final rule no later than 6 months after the issuance of the NPRM. The court granted the petition for writ of mandamus on September 30, 2010, ordering FMCSA to issue an NPRM on the supporting document regulations by December 30, 2010. At the request of the agency, the DC Circuit extended the deadline to January 31, 2011. On April 5, 2010, FMCSA issued a related final rule (RIN 2126-AA89) that required the use of EOBRs by motor carriers with significant hours-of-service violations (75 FR 17208). A petition for judicial review was filed with the Seventh Circuit. On August 26, 2011, the Court vacated the final rule, which removed the technical specifications relied on in this rulemaking.

41.	Lease and Interchange of Vehicles; Commercial Motor Vehicles Designed to Transport Passengers	Yellow
-----	--	--------

Popular Title: Bus Leasing

RIN 2126-AB44

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would amend the lease and interchange of vehicle regulations in 49 CFR Part 376 to add buses and passenger coaches. FMCSA has been discovering in its passenger bus crash investigations and roadside inspections a need for better documentation of bus equipment lease and interchange agreements. The National Transportation Safety Board (NTSB) has also recommended FMCSA require documentation of bus motor vehicle leases and interchanges based on a crash investigation in 2008 near Victoria, Texas. The rulemaking would determine two things: First, whether any or all of the present practices of motor carriers of passengers, with respect to the performance of transportation by the use of vehicles owned by others, the interchange of vehicles, and the leasing of vehicles to private motor carriers and shippers, should be discontinued because they are contrary to the public interest; and, if any or all of the present practices should be continued. Second, whether the motor carriers' practices should be governed by regulations similar to those currently in 49 CFR Part 376 applicable presently only to motor carriers of property. The intended effect of this action is to require lessee-motor carriers of passengers to assume complete responsibility for the operation of the bus equipment for the duration of the lease and document full operational control by the lessee-motor carriers of passengers over all drivers, bus vehicles, and trip operations being conducted under its USDOT registration.

Popular Title: Vehicle/Track Interaction, High Speed, High Cant**RIN 2130-AC09****Stage:** Final Rule**Previous Stage:** NPRM: Publication Date 5/10/2010; End of Comment Period 7/9/2010.

Abstract: This rulemaking would amend the Track Safety Standards and Passenger Equipment Safety Standards for high-speed train operations and train operations at high cant deficiencies to promote the safe interaction of rail vehicles with the track over which they operate. It would revise both the safety limits for these operations and the process to qualify them. It accounts for a range of vehicle types that are currently used and may likely be used on future high-speed or high cant deficiency rail operations, and would provide safety assurance for train operations in all classes of track. It is based on the results of simulation studies designed to identify track geometry irregularities associated with unsafe wheel forces and acceleration, thorough reviews of vehicle qualification and revenue service test data, and consideration of international practices.

45.	Alcohol and Controlled Substance Testing for Maintenance-of-Way Employees	Red
-----	--	-----

Popular Title: Controlled Substance Testing/Maintenance Employees**RIN 2130-AC10****Stage:** NPRM**Previous Stage:**None

Abstract: This rulemaking would revise the Federal Railroad Administration's (FRA) alcohol and drug regulations to cover all employees of railroads, railroad contractors, and subcontractors who perform maintenance-of-way activities. FRA's alcohol and drug regulations (49 CFR Part 219) contain certain prohibitions on the use and possession of alcohol and drugs. The regulations also contain requirements for post-accident toxicological (PAT) testing, random testing, reasonable cause testing, reasonable suspicion testing, co-worker and voluntary referral policies, pre-employment drug testing, and reporting. Currently, the regulations only apply to covered employees (defined as employees assigned to perform covered service subject to the Hours of Service Act, 49 CFR Ch. 211). In response to a statutory mandate, the proposed rulemaking would expand coverage of part 219 to employees who perform maintenance-of-way (MOW) activities. This rulemaking would also make other miscellaneous updates to 49 CFR Part 219.

49.	High-Speed Intercity Passenger Rail (HSIPR) Program; Buy America Program Requirements	Green
-----	--	-------

Popular Title: Buy America Program Requirements

RIN 2130-AC23

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would establish regulations for FRA’s Buy America requirements as part of the High-Speed Intercity Passenger Rail (HSIPR) program. The Passenger Rail Investment and Improvement Act of 2008 (PRIIA) (Division B of Pub. L. 110-432) authorized the appropriation of funds to establish several new passenger rail grant programs, including capital investment grants to support intercity passenger rail service (Â§301), high-speed corridor development (Â§501), and congestion grants (Â§302). FRA has consolidated these and other closely related programs into the HSIPR program, as detailed in FRA’s HSIPR Interim Guidance (74 Fed. Reg. 29900 (June 23, 2009)) and FY 2010 Interim Guidance (75 Fed. Reg. 38344 and 38365 (July 1, 2010)). Spending authorized under PRIIA is subject to the Buy America provision of 49 U.S.C. Â§ 24405(a). This rulemaking would provide standards to govern FRA’s application of the Buy America provision of 49 U.S.C. Â§ 24405(a) to all PRIIA-authorized spending as part of the HSIPR program.

Popular Title: PTC Amendments Grade Crossing & Signal (RRR)

RIN 2130-AC32

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would revise Positive Train Control regulations by defining the de minimis exception and en route failures, proposing exceptions relating to yard movements that may not be considered on the main line system, and amending regulations governing grade crossing and signal and train control systems. The rulemaking is in response to a petition for rulemaking from the Association of American Railroads.

Abstract: This rulemaking would transform the FTA's Project Management Oversight rule at 49 CFR part 633 into a Capital Project Management rule governing all major capital projects funded under 49 U.S.C. Chapter 53. The rulemaking would consider the appropriate scope of such a rule; the definition of "major capital project"; the management capacity and capability of project sponsors; the requirements for Project Management Plans; the use of risk assessments in project development; and the role and responsibilities of FTA oversight contractors.

56. Environmental Impact and Related Procedures (RRR)

Green

Popular Title: Environmental Impact

RIN 2132-AB03

Stage: NPRM

Previous Stage: None

Abstract: This rulemaking proposes to establish a number of categorical exclusions (CE) from the requirement that an environmental assessment or an environmental impact statement be prepared under section 102 of the National Environmental Policy Act of 1969 (NEPA) for FTA-funded actions. The proposed CEs were developed after an extensive effort, in line with Council on Environmental Quality guidance, to identify activities that FTA believes do not have a significant effect on the environment. The proposed CEs covers

some of the same actions as existing CEs, but would provide a tool that would expedite the delivery of transit projects without compromising environmental quality. The rulemaking would also make targeted revisions to the joint FTA/FHWA NEPA regulation that would only apply to FTA and would serve to support FTA's focus on streamlining its environmental process.

-----	---	-----

Popular Title: Cargo Preference (RRR)

RIN 2133-AB74

Stage: NPRM

Previous Stage: ANPRM: Publication Date 01/28/99; End of Comment Period 03/29/99; Withdrawn 02/14/05

Abstract: This rulemaking would revise and clarify the Cargo Preference rules that have not been revised substantially since 1971. Revisions would include an updated purpose and definitions section along with the removal of obsolete provisions. This rulemaking also would establish a new Part 383 of the Cargo Preference regulations. This rulemaking would cover P.L. 110-417, Section 3511, National Defense Authorization Act for FY2009 changes to the cargo preference rules, which have not been substantially revised since 1971. The rulemaking also would include compromise, assessment, mitigation, settlement, and collection of civil penalties. Originally the agency had two separate rulemakings in process under RIN 2133-AB74 and 2133-AB75. RIN 2133-AB74 would have revised existing regulations and RIN 2133-AB75 would have established a new part 383: Guidance and Civil Penalties and implement P.L. 110-417, Section 3511, National Defense Authorization Act for FY 2009. MARAD has decided it would be more efficient to merge both efforts under one; RIN 2133-AB75 has been merged with this action.

Abstract: This rulemaking would amend Federal Motor Vehicle Standard No. 111; Rearview Mirrors, to reflect requirements contained in the Cameron Gulbransen Kids Transportation Safety Act of 2007. The Act requires that NHTSA expand the required field of view to enable the driver of a motor vehicle to detect areas behind the motor vehicle to reduce death and injury resulting from backing incidents, particularly incidents involving small children and disabled persons. According to the Act, such a standard may be met by the provision of additional mirrors, sensors, cameras, or other technology to expand the driver’s field of view.

-----	---	-----

Popular Title: Alternative Fuel Usage Labeling & Badging

RIN 2127-AK75

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would respond to requirements of the Energy Independence and Security Act of 2007 (EISA), Title 1, Subtitle A, Section 105, as it amends 49 USC Â§ 32908, to implement Consumer Information and Consumer Education programs related to fuel economy, GHG, other emissions, and alternative fuels. EISA directs the Secretary of Transportation to label vehicles with a permanent and prominent display that an automobile is capable of operating on alternative fuels, and to include in the owner's manual for vehicles capable of operating on alternative fuels information that describes that capability and the benefits of using alternative fuels, including the renewable nature and environmental benefits of using alternative fuels. Additionally, EISA requires a label to be attached to the fuel compartment of vehicles capable of operating on alternative fuels, with the form of alternative fuel stated on the label. EISA, signed into Law on December 19, 2007, requires that the Secretary issue a final rule not later than 42 months after the date of the enactment.

62.	Passenger Car and Light Truck Corporate Average Fuel Economy Standards MYs 2017 and Beyond (RRR)	Red
-----	---	-----

Popular Title: CAFE 2017 and Beyond**RIN 2127-AK79****Stage:** Final Rule

Previous Stage: Notice of Intent: 10/13/2010. Supplemental Notice of Intent: Publication Date 12/08/2010. Supplemental Notice of Intent: Signed by DOT Secretary and EPA Administrator 7/29/2011.

Abstract: This rulemaking would establish Corporate Average Fuel Economy (CAFE) standards for light trucks and passenger cars for model years 2017 and beyond. This rulemaking would respond to requirements of the Energy Policy and Conservation Act, as amended by the Energy Independence and Security Act of 2007. The statute requires that CAFE standards be prescribed separately for passenger automobiles and non-passenger automobiles to achieve a combined fleet fuel economy of at least 35 mpg by model year 2020. For model years 2021 and beyond, the statute requires that the average fuel economy required to be attained by each fleet of passenger and non-passenger automobiles be the

maximum feasible for each model year. The law requires the standards be set at least 18 months prior to the start of the model year. On May 21, 2010, President Obama issued a memorandum directing NHTSA and EPA to conduct a joint rulemaking (NHTSA regulating fuel economy and EPA regulating greenhouse gas emissions), and to issue a Notice of Intent to Issue a Proposed Rule (NOI) by September 30, 2010.

63. **Mandatory Event Data Recorder Requirements (RRR)** Yellow

Popular Title: Mandatory EDR Requirements

RIN 2127-AK86

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would establish a new Federal motor vehicle safety standard to mandate the installation of Event Data Recorders (EDR) in light vehicles. The standard would incorporate the current 49 CFR Part 563, which established the current reporting requirement of voluntarily installed EDRs in light vehicles. Part 563 presently requires vehicle manufacturers who are voluntarily installing EDRs to be in compliance with the regulation by September 1, 2012. This rulemaking would not affect the 2012 compliance date for voluntarily-installed EDRs. Furthermore, this rulemaking would not modify any of the Part 563 data elements, data capture and format requirements, data retrieval specifications, or data survivability and crash test requirements. Moreover, this rulemaking to mandate EDRs across the entire light vehicle fleet could contribute to advancements in vehicle designs, and advanced restraint and other safety countermeasures. The estimated total incremental costs associated with this rulemaking would be \$24.4 million (2009 dollars), which is measured from a baseline of 91.6 percent EDR installation to 100 percent installation, assuming the sale of 15.5 million light vehicles per year.

National Highway Traffic Safety Administration

64. **Upgrade of Event Data Recorder Requirements** Red**Popular Title:** Light Vehicle Upgrade of EDR Requirements**RIN 2127-AK87****Stage:** Undetermined**Previous Stage:**None

Abstract: This rulemaking would expand the utility of the amount and type of data Event Data Recorders (EDRs) capture in light vehicles in the event of a crash. The rulemaking would consider requiring some of the optional data elements specified in 49 CFR Part 563. Part 563 established the current reporting requirement of voluntarily installed EDRs in light vehicles. In addition, this rulemaking would make revisions to the optional data elements to account for the latest advances in vehicle safety. Part 563 presently requires vehicle manufacturers who are voluntarily installing EDRs to be in compliance with the regulation by September 1, 2012. In a separate rulemaking (2127-AK86 Mandatory Part 563 Event Data Recorder Requirements), the agency would propose requiring that all light vehicles comply with the requirements specified in current 49 CFR 563. This rulemaking would seek additional information from the public and expand upon that initiative. Moreover, this rulemaking would contribute to advancements in vehicle designs, advanced restraints and other safety countermeasures. The costs are expected to be minimal since some vehicle manufacturers presently capture additional data beyond Part 563 in their EDRs. Originally, an ANPRM was scheduled for 12/31/2011.

65. **Heavy Vehicle Speed Limiters**

Red

Popular Title: Heavy Vehicle Speed Limiters

RIN 2127-AK92

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would respond to petitions from ATA and Roadsafe America to require the installation of speed limiting devices on heavy trucks. In response, NHTSA requested public comment on the subject and received thousands of comments supporting the petitioner's request. Based on the available safety data and the ancillary benefit of reduced fuel consumption, this rulemaking would consider a new Federal Motor Vehicle Safety Standard that would require the installation of speed limiting devices on heavy trucks. We believe this rule would have minimal cost, as all heavy trucks already have these devices installed, although some vehicles do not have the limit set. This rule would decrease the estimated 8991 fatalities caused by crashes involving heavy trucks and buses. It would also increase the fleet fuel efficiency of these vehicles.

68. **Electronic Stability Control Systems for Heavy Vehicles** Red

Popular Title: Truck Tractor Electronic Stability Control

RIN 2127-AK97

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would promulgate a new Federal standard that would require stability control systems on truck tractors and motorcoaches that address both rollover and loss of control crashes, after an extensive research program to evaluate the available technologies, an evaluation of the costs and benefits, and a review of manufacturer's product plans. Rollover and loss of control crashes involving heavy vehicles is a serious safety issue that is responsible for 304 fatalities and 2,738 injuries annually. They are also a major cause of traffic tie-ups, resulting in millions of dollars of lost productivity and excess energy consumption each year. Suppliers and truck and motorcoach manufacturers have developed stability control technology for heavy vehicles to mitigate these types of crashes. Our preliminary estimate produces an effectiveness range of thirty-seven to fifty-six percent against single-vehicle tractor-trailer rollover crashes and three to fourteen percent against loss of control crashes that result from skidding on the road surface. With these effectiveness estimates, annually, we estimate 29 - 66 lives would be saved, 517 - 979 MAIS 1-5 injuries would be reduced, and 810 - 1,693 crashes that involved property damage only would be eliminated. Additionally, it would save \$10 - \$26 million in property damage and travel delays. Based on the technology unit costs and affected vehicles, we estimate technology costs would be \$55 to 107 million, annually. However, the costs savings from reducing travel delay and property damage would produce net benefits of \$128 - \$372 million.

69. **FMVSS No. 218 and Enforcement Policy Concerning Novelty Helmets** Red

Popular Title: Novelty Helmets Enforcement

RIN 2127-AL01

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would reduce the sale and use of novelty motorcycle helmets. The rulemaking would set forth an interpretation that clarifies that novelty helmets are within the reach of 49 USC 30102(a)(7), motor vehicle equipment. In addition, this rulemaking would propose preliminary screening requirements that could be used by laboratories, law enforcement, or Customs and Border Protection to identify helmets that are not designed to comply with FMVSS No. 218.

70. **Part 571 FMVSS No. 205, Glazing Materials, GTR (RRR)** Yellow

Popular Title: Window Glazing (RRR)

RIN 2127-AL03

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would enhance FMVSS No. 205 by adopting a Global Technical Regulation (GTR), which contains updated performance tests for glazing materials that are composed of glass, laminated glass, or glass faced with plastic compared to what is currently in FMVSS No. 205. The tests in the GTR would allow manufacturers to achieve efficiencies in the certification process while not degrading safety or imposing new burdens. This rulemaking was recently downgraded to nonsignificant and will not appear on next month's report.

72.	Prioritization and Allocation Authority Exercised By the Secretary of Transportation Under the Defense Production Act	Red
-----	--	-----

Popular Title: Defense Production Act (DPA)

RIN 2105-AD83

Stage: Final Rule

Previous Stage: NPRM: Publication Date 02/15/2011; End of Comment Period 03/17/2011.

Abstract: This rulemaking would clarify the prioritization and allocation authorities exercised by the Secretary of Transportation under the Defense Production Act (DPA). The DPA is the President’s primary authority to ensure timely availability of private sector resources for national defense. In addition to military and energy activities, the definition of "national defense" includes emergency preparedness activities conducted pursuant to Title VI of The Robert T. Stafford Disaster Relief and Emergency Assistance Act and the protection and restoration of critical infrastructure. Under Title I of the DPA, the President has the authority to require the acceptance and prioritization of contracts and orders -- and to allocate materials, services, and facilities -- in support of the national defense. Under Section 201 of Executive Order 12919, the President has delegated these prioritization and allocation authorities to the Secretary of Transportation for all forms of civil transportation. In the 2009 DPA reauthorization legislation, Congress mandated that each Federal agency with delegated authority under Title I of the DPA develop final rules that establish standards and procedures for implementing its delegated authority in emergency and nonemergency conditions. Additionally, Congress mandated that, to the extent practicable, the rules be consistent and unified. DOT is part of an interagency working group, along with the other delegated agencies, that is developing consistent unified rules.

Popular Title: Stowage and Assistive Devices

RIN 2105-AD90

Stage: Undetermined

Previous Stage:None

Abstract: This rulemaking would amend 14 CFR Part 382 (Part 382) by including Subpart I (14 CFR 382.121-382.133) in the list of subparts with which a U.S. carrier must comply with respect to passengers traveling under its code on flights operated by a foreign carrier between two foreign points. This rulemaking would also amend Part 382 to eliminate the labeling requirements for FAA approved portable oxygen concentrators and specify that ventilators, respirators and Continuous Positive Airway Pressure (CPAP) machines must be allowed for use in the passenger cabin as long as they comply with applicable safety, security, and hazardous materials rules. In addition, this rule would amend the provision in Part 382 that allows carriers to require a passenger who wishes to use an FAA-approved

portable oxygen concentrator in the aircraft cabin to provide a medical certificate dated within 10 days of the passenger’s initial flight.

RIN 2105-AE12

Stage: SNPRM

Previous Stage: NPRM: Publication Date 06/08/2010; Comment Period End 08/09/2010.

Abstract: This is the second of two supplemental notices of proposed rulemaking (SNPRM) to follow-up on air travel accessibility issues discussed in the preamble of the 2008 final Air Carrier Access Act (ACAA) rule but deferred for final decision to a later rulemaking. (The first SNPRM is RIN 2105-AD96.) This rulemaking action would consider (1) whether there are safety-related reasons for excluding service animals other than dogs that may be specific to foreign carriers; (2) whether carriers should be required to supply in-flight medical oxygen for a fee to passengers who require it to access air transportation; (3) whether providing accessible in-flight entertainment to passengers with disabilities is technically and economically feasible; (4) whether certain changes should be made to provisions allowing carriers to require medical documentation and 48 hours advance notice from users of emotional support and psychiatric service animals; and (5) whether carriers should be required to report to the Department annually the number of requests for wheelchair assistance they receive. The rulemaking would also seek public comment on the feasibility of requiring accessible lavatories on certain single-aisle aircraft, expanding the applicability of certain required seating accommodations, and clarifications of certain requirements pertaining to the carriage of service animals.

Pipeline and Hazardous Materials Safety Administration

Pipeline and Hazardous Materials Safety Administration

81. **Hazardous Materials; Combination Packages Containing Liquids Intended for Transport by Aircraft** Red

Popular Title: Air Packaging

RIN 2137-AE32

Stage: Final Rule

Previous Stage: ANPRM: 7/07/2008; End of C/P: 9/5/2008. NPRM: 5/14/2010; End of C/P: 7/13/2010, FR: 04/16/2012

Abstract: Incident data and testing conducted on behalf of DOT indicate many combination packagings authorized for the transportation of hazardous materials may not withstand conditions normally incident to air transportation. PHMSA is considering measures to reduce the incidence of package failures and to minimize the consequences of failures should they occur. This rulemaking would require additional measures to verify packaging integrity, such as performance testing, and revisions to packaging requirements, such as the addition of liners or absorbent material. This rulemaking was recently downgraded to nonsignificant and will not appear on next month's report.

Stage: Final Rule

Previous Stage: NPRM: Publication Date 03/11/2011; End of Comment Period 05/10/2011. End of extended Comment Period 06/09/2011.

Abstract: This rulemaking would amend the Hazardous Materials Regulations to require each person (i.e., carrier or facility) who engages in cargo tank loading or unloading operations to perform a risk assessment of the loading and unloading operation and develop and implement safe operating procedures based upon the results of the risk assessment. These amendments would include the operational procedures requirements to address several aspects of loading and unloading, including provisions for facilities to develop maintenance testing programs for transfer equipment (i.e., hose maintenance programs) used to load or unload cargo tank motor vehicles (CTMVs). In addition, this rulemaking would require each employee who engages in cargo tank loading or unloading operations to receive training and be evaluated on the employee's qualifications to perform loading or unloading functions. This rulemaking is intended to reduce the risk associated with the loading and unloading of cargo tank motor vehicles that contain hazardous materials.

Pipeline and Hazardous Materials Safety Administration

87. **Pipeline Safety: Safety of On-Shore Liquid Hazardous Pipelines** Red

Popular Title: Liquid Hazardous Pipelines

RIN 2137-AE66

Stage: NPRM

Previous Stage: ANPRM: Publication Date 10/18/2010; End of Comment Period 01/18/2011; Extension of Comment Period 01/04/2011; End of Extended Comment Period 02/18/2011.

Abstract: This rulemaking would address effective procedures that hazardous liquid operators can use to improve the protection of High Consequence Areas (HCA) and other vulnerable areas along their hazardous liquid onshore pipelines. PHMSA is considering whether changes are needed to the regulations covering hazardous liquid onshore pipelines, whether other areas should be included as HCAs for integrity management (IM) protections, what the repair timeframes should be for areas outside the HCAs that are assessed as part of the IM program, whether leak detection standards are necessary, valve spacing requirements are needed on new construction or existing pipelines, and PHMSA should extend regulation to certain pipelines currently exempt from regulation. The agency would also address the public safety and environmental aspects any new requirements, as well as the cost implications and regulatory burden.

Pipeline and Hazardous Materials Safety Administration

88. **Hazardous Materials: Revision of Requirements for Fireworks Approvals** Red

Popular Title: Fireworks Approvals

RIN 2137-AE70

Stage: NPRM

Previous Stage: None

Abstract: This rulemaking would amend the HMR by revising and clarifying requirements for the examination, testing, certification, and transportation of fireworks. This action would include consolidating the fireworks requirements into one section, limiting fireworks approvals to manufacturers only, requiring manufacturers to assign a unique "product identification number" to each firework, require 1.3G and 1.4G fireworks to be examined by authorized test labs, and implement an on-line application process.

Pipeline and Hazardous Materials Safety Administration

89. **Pipeline Safety: Excess Flow Valves In Applications Other Than Single-Family Residences in Gas Distribution Systems** Red

Popular Title: Excess Flow Valves

RIN 2137-AE71

Stage: ANPRM

Previous Stage: ANPRM 11/25/2011; CP ended 2/18/12; CP extended to 3/19/2012

Abstract: This rulemaking would require excess flow valves (EFVs) be installed in all new and renewed gas service lines, for structures other than single family dwellings, when the operating conditions are compatible with readily available valves. These changes would be in response to NTSB and PHMSA investigations of current EFV installation practices. The intended effect of the rule is to increase the level of safety for structures other than single family dwellings currently subject to Federal pipeline safety regulation.

Pipeline and Hazardous Materials Safety Administration

90. **Pipeline Safety: Gas Transmission (RRR)** Red

Popular Title: Gas Transmission (RRR)

RIN 2137-AE72

Stage: ANPRM

Previous Stage: ANPRM 8/25/2011; CP ended 12/02/2011; CP extended to 1/20/2012

Abstract: In this rulemaking PHMSA will be revisiting the requirements in the Pipeline Safety Regulations addressing integrity management principles for Gas Transmission pipelines. In particular, PHMSA will be reviewing the definition of an HCA (including the concept of a potential impact radius), the repair criteria for both HCA and non-HCA areas, requiring the use of automatic and remote controlled shut off valves, valve spacing, and whether applying the integrity management program requirements to additional areas would mitigate the need for class location requirements.

Pipeline and Hazardous Materials Safety Administration

91. **Hazardous Materials: Reverse Logistics (RRR)** Black

Popular Title: Reverse Logistics (RRR)

RIN 2137-AE81

Stage: ANPRM

Previous Stage:None

Abstract: This rulemaking would address changes to the Hazardous Materials Regulations (HMR) that are applicable to reverse logistics. The issue of reverse logistics involves the transportation of hazardous materials that have been damaged or returned from the retailer to

a return center. Specifically, the rulemaking would establish a regulatory definition of ‘reverse logistics’ and outline the responsibilities of those that offer hazardous materials returned by retail customers.

Pipeline and Hazardous Materials Safety Administration

92.	Hazardous Materials: Incorporation of Certain Special Permits and Competent Authorities into the HMR (RRR)	Black
-----	---	-------

Popular Title: Special Permits and Competent Authorities (RRR)

RIN 2137-AE82

Stage: NPRM

Previous Stage: None

Abstract: This rulemaking would amend the Hazardous Materials Regulations (HMR) to incorporate provisions contained in certain widely used or longstanding special permits and competent authorities that have established safety records. Incorporating such provisions into the HMR is intended to provide wider access to the regulatory flexibility offered in the special permits and competent authorities. The adoption of the provisions would eliminate the need for numerous application and renewal requests. The special permits proposed to be added to the regulations here would allow the transportation of 'Self-heating' solid, organic n.o.s. (spent bleaching earth) in sift-proof bulk packaging; would allow the use of regulated medical waste shipping names and markings that differ from those prescribed in the HMR; would allow for the transportation of Class 9 solid coal pitch compounds in non-specification open top or closed-top sift-proof metal cans or fiber drums; and would allow for the transportation of self-inflating life-saving appliances that contain non-specification steel cylinders when being transported between a vessel and an authorized facility for servicing. This rulemaking action would facilitate commerce activity and reduce paperwork burdens while maintaining an appropriate level of safety. Incorporation of these provisions would reduce the compliance burden and cost on both industry and government.

Research and Innovative Technology Administration

Research and Innovative Technology Administration

93. **Reporting Ancillary Airline Passenger Revenues** Green

Popular Title: Reporting Ancillary Airline Passenger Revenues

RIN 2139-AA13

Stage: Final Rule

Previous Stage: NPRM: Publication Date 07/15/2011; End of Comment Period 09/13/2011.

Abstract: This rulemaking would collect more detailed revenue information regarding airline imposed fees from those air carriers meeting the definition of "large certificated air carriers." Many air carriers have adopted fees for such services as checked baggage, carry-on baggage, meals, on-board entertainment, internet connections, pillows, blankets, early boarding, canceling or changing reservations, unaccompanied minors, pet transportation, etc. The rulemaking would also change the way the Department computes mishandled baggage rates from mishandled baggage reports per domestic enplanement to mishandled bags per checked bags.
