Federal Aviation Administration

1. **Safe, Efficient Use and Preservation of the Navigable Airspace** Red

Popular Title: Safe Efficient Navigable Airspace

RIN 2120-AH31

Stage: Final Rule

Previous Stage: NPRM: Publication date 6/13/2006; End of Comment Period 9/11/2006.

Abstract: This rulemaking would amend the regulations governing objects that may affect the navigable airspace. These rules have not been revised in several decades, and the FAA has determined it is necessary to update the regulations, incorporate case law and legislative action, and simplify the rule language. These changes will improve safety and promote the efficient use of the National Airspace System.

Effects:

2. **Aging Aircraft Program (Widespread Fatigue Damage)** Red

Popular Title: Aging Aircraft Widespread Fatigue

RIN 2120-AI05

Stage: Final Rule

Previous Stage: NPRM: Publication Date 4/18/2006; End of Comment Period 7/17/2006; Extended Comment Period 7/17/2006; End of Extended Comment Period 9/18/2006.

Abstract: This rulemaking would require design approval holders to establish limits of validity (LOVs) of the engineering data that support the maintenance programs for certain transport category airplanes, and it would require them to determine if maintenance actions

are needed to prevent widespread fatigue damage before an airplane reaches its LOV. This rulemaking would require operators of any affected airplane to incorporate the LOV into the airworthiness limitations section of the instructions for continued airworthiness. This rulemaking would also prohibit operation of an affected airplane beyond the LOV, unless an operator has incorporated an extended LOV and any necessary service information into its maintenance program.

Federal Aviation Administration

3. Commuter Operations in Very Light Jets (VLJs)	Black
---	--------------

Popular Title: VLJ

RIN 2120-AI84

Stage: Undetermined

Previous Stage:None

Abstract: This rulemaking would establish a rule to allow passenger-carrying commuter operations to be conducted under the provisions of part 135 using multiengine turbojets, certificated under either part 23 or part 25, configured with 9 or fewer passenger seats. The rulemaking would allow multiengine turbojet operators to provide commuter service to the traveling public, thus accommodating new technologies and a new generation of turbojet airplanes that otherwise would not be allowed in part 135 commuter service. Since 1995, turbojets used in scheduled operations must operate under the provisions of part 121. This current rulemaking resulted, in part, from recommendations from the Aviation Rulemaking Committee for parts 14 CFR 135/125 and covers pilot crew, equipment, training, and dispatch requirements for the safe operation of this new generation airplane. An earlier internet report listed this item as an NPRM with a scheduled publication date of 10/20/09. FAA is now reconsidering what action to take with respect to this rulemaking.

4. **Re-registration and Renewal of Aircraft Registration** Red

Popular Title: Re-registration & Renewal of Aircraft Registration

RIN 2120-AI89

Stage: Final Rule

Previous Stage: NPRM: Publication Date 2/28/2008; End of Comment Period 8/28/2008

Abstract: This rulemaking would amend requirements concerning the registration of aircraft. The rulemaking is based on the need to increase and maintain the accuracy of aircraft registration information in the Civil Aviation Registry. This rulemaking would ensure aircraft owners periodically provide information regarding changes in registration. The rulemaking would respond to the concerns of law enforcement and other government agencies and would provide more accurate, up-to-date aircraft registration information to all users of the Civil Aviation Registry database.

5. **Automatic Dependent Surveillance - Broadcast (ADS-B) Equipage Mandate To Support Air Traffic Control Service** Red

Popular Title: ADS-B

RIN 2120-AI92

Stage: Final Rule

Previous Stage: NPRM: Publication Date 10/05/2007; End of Comment Period 11/19/07; Comment Period Extended 01/03/2008; End of Extended Comment Period 03/03/2008.

Abstract: This rulemaking would add equipage requirements and performance standards for Automatic Dependent Surveillance-Broadcast (ADS-B) Out avionics on aircraft operating in specified classes of airspace within the U.S. National Airspace System. This action facilitates the use of ADS-B for aircraft surveillance by FAA and Department of Defense (DOD) air traffic controllers to safely and efficiently accommodate aircraft operations and the expected increase in demand for air transportation. This rule would also provide aircraft operators with a platform for additional flight applications and services.

6. **Qualification, Service, and Use of Crewmembers and Aircraft Dispatchers** Green

Popular Title: Part 121, Subparts N and O

RIN 2120-AJ00

Stage: SNPRM

Previous Stage: NPRM: Publication Approved 06/16/2008; Publication Date 01/12/2009; End of Comment Period 05/12/2009; Extension of Comment Period 04/20/2009; End of Extension of Comment Period 08/10/2009.

Abstract: This rulemaking would amend the regulations for crewmember and dispatcher training programs in domestic, flag, and supplemental operations. The rulemaking would enhance traditional training programs by requiring the use of flight simulation training devices for flight crewmembers and including additional training requirements in areas that are critical to safety. The rulemaking would also reorganize and revise the qualification and training requirements. The changes are intended to contribute significantly to reducing aviation accidents.

7. **Safety Management Systems (SMS)** Black

Popular Title: SMS

RIN 2120-AJ15

Stage: Undetermined

Previous Stage: ANPRM: Publication Date 7/23/2009; End of Comment Period 10/21/2009.

Abstract: This rulemaking would require a Safety Management System (SMS) for FAA certificate holders, certain product manufacturers, applicants, and employers. This action is being taken to further enhance the practice of managing safety, conducting risk and system assessments and analysis, undertaking preventive and corrective actions, and creating a safety culture. The intended effect of this action would make the United States compliant with International Civil Aviation Organization (ICAO) annexes.

8. **Pilot-in-Command Proficiency Check in Single-Piloted Turbojet Airplanes** Black

Popular Title: PIC Proficiency

RIN 2120-AJ18

Stage: Undetermined

Previous Stage: NPRM: Publication Date 08/31/2009; End of Comment Period 11/30/2009

Abstract: This rulemaking would require proficiency checks for pilots in command (PIC) of single-piloted turbojet powered airplanes, allow pilot schools to use Internet-based training without requiring schools to have a physical ground training facility, allow pilot schools and provisional pilot schools to apply for a combined private pilot certification and instrument rating course, and revise the definitions of "complex airplane" and "high performance airplane." FAA believes these actions are necessary to respond to changes in the aviation industry and to avoid imposing unnecessary regulatory burdens. The intended effect of this rulemaking would be to ensure flight crewmembers have the training and qualifications necessary to operate aircraft safely.

10. **Supercooled Large Droplet Icing Conditions** Red**Popular Title:** Supercooled Large Droplet Icing Conditions**RIN 2120-AJ34****Stage:** NPRM**Previous Stage:**None**Abstract:** This rulemaking would amend the airworthiness standards applicable to transport category airplanes certificated for flight in icing conditions and the icing airworthiness standards applicable to aircraft engines. The rulemaking would improve safety by taking into account supercooled large drop icing conditions for transport category airplanes most affected by supercooled large drop icing conditions. The rulemaking would also include mixed phase and ice crystal conditions for all transport category airplanes, and supercooled large drop, mixed phase, and ice crystal icing conditions for all turbine engines. This rulemaking is the result of information gathered from a review of icing accidents and incidents, and is intended to improve the level of safety for new airplane and engine designs for operations in icing conditions.**Effects:**

11. **Flightcrew Alerting (Formerly Warning, Caution and Advisory Lights)** Green

Popular Title: Flightcrew Alerting

RIN 2120-AJ35

Stage: Final Rule

Previous Stage: NPRM: Publication Date 7/09/2009; End of Comment Period 9/08/09; Reopening of Comment Period 9/16/2009; End of Reopened Comment Period 10/1/2009.

Abstract: This rulemaking would amend the airworthiness standards for transport category airplanes regarding definitions, prioritization, color requirements, and performance. These changes would update the latest technology and functionality concerning flightcrew alerting. This rulemaking is necessary to add additional alerting functions and to consolidate and standardize definitions and regulations for flightcrew warning, caution, and advisory systems.

12.	Restrictions on Operators Employing Former Flight Standards Service Aviation Safety Inspectors	Yellow
-----	---	--------

Popular Title: Post Employment Restrictions

RIN 2120-AJ36

Stage: NPRM

Previous Stage: NPRM: Publication Date 11/20/2009; End of Comment Period 02/18/2010

Abstract: This rulemaking would prohibit a certificate holder from employing or contracting with a former Aviation Safety Inspector (ASI) or other person with certificate holder oversight responsibilities to act as an agent or to represent that certificate holder in any matter before the FAA. This restriction would apply if the person, in the proceeding two year period, has (a) served as, or was responsible for oversight of, a Flight Standards Service ASI; and (b) had the responsibility to inspect, or oversee the inspection of, the operations of the certificate holder. The rulemaking would enhance the FAA's ability to properly perform its safety mission and to ensure that every passenger can have complete confidence in the integrity of the programs and operations administered by the FAA.

RIN 2120-AJ43

Stage: NPRM

Previous Stage: NPRM: Publication Date 11/23/2009; End of Comment Period 02/22/2010

Abstract: This rulemaking would amend the regulations applicable to operators of certain airplanes used in air carrier service and certificated for flight in icing conditions. The standards would require either the installation of ice detection equipment or changes to the Airplane Flight Manual to ensure timely activation of the airframe ice protection system. This regulation is the result of information gathered from a review of icing accidents and incidents, and it is intended to improve the level of safety when airplanes are operated in icing conditions.

17. **Fatigue Tolerance Evaluation of Metallic Structures** Yellow

Popular Title: Fatigue Tolerance Evaluation of Metallic Structure

RIN 2120-AJ51

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would address advances in the fatigue tolerance evaluation safety requirements for transport category metallic structures. This action is necessary to avoid or reduce catastrophic fatigue failures. The intended effect is increased safety requirements and harmonization with international standards.

NPRM: Publication Date 05/19/2005; End of Comment Period 08/17/2005.

Abstract: This rulemaking would replace three current identification and registration systems: the US DOT number identification system, the commercial registration system, and the financial responsibility system, with an online Federal unified registration system (URS). This program would serve as a clearinghouse and depository of information on, and identification of, brokers, freight forwarders, and others required to register with the Department of Transportation. The Agency is revising this rulemaking to address amendments directed by SAFETEA-LU. The replacement system for the Single State Registration System, which the ICC Termination Act originally directed be merged under URS, will be addressed separately. The cargo insurance portion of this rulemaking has been split off into RIN 2126-AB21.

Federal Motor Carrier Safety Administration

27.	Application by Certain Mexico-Domiciled Motor Carriers to Operate Beyond U.S. Municipalities and Commercial Zones on the U.S.-Mexico Border	Red
-----	--	-----

Popular Title: Mexico-Domiciled Motor Carriers

RIN 2126-AA34

Stage: Undetermined

Previous Stage: NPRM: Publication Date 05/03/2001; End of Comment Period 07/02/2001.
Interim Final Rule: Publication Date 03/19/2002; End of Comment Period 04/18/2002.

Abstract: This rulemaking would change FMCSA regulations to govern applications by Mexican carriers to operate beyond municipalities and commercial zones at the United State-Mexico border. It would also revise the application form, OP-1MX, to be filed by these Mexican motor carriers. The revised form would require additional information about the applicant's business and operating practices to allow the FMCSA to determine if the applicant can meet the safety standards established for operating in interstate commerce in the United States. Carriers that had previously submitted an application would have to submit the updated form. These changes are needed to implement part of the North American Free Trade Agreement (NAFTA). On January 16, 2003, the Ninth Circuit Court remanded this rule, along with two other NAFTA-related rules, to the agency, requiring a full environmental impact statement and an analysis required by the Clean Air Act. On June 7, 2004, the Supreme Court reversed the Ninth Circuit and remanded the case, holding that FMCSA is not required to prepare the environmental documents as ruled by the Ninth Circuit. FMCSA originally planned to publish a final rule by November 20, 2003. FMCSA will determine the next steps to be taken after enactment of any pending legislation authorizing cross border trucking.

Interim Final Rule: Publication Date 03/19/2002; End of Comment Period 04/18/2002.

Abstract: This rule would implement a safety monitoring system and compliance initiative designed to evaluate the continuing safety fitness of all Mexico-domiciled carriers within 18 months after receiving a provisional Certificate of Registration or provisional authority to operate in the United States. It also would establish suspension and revocation procedures for provisional Certificates of Registration and operating authority, and incorporate criteria to be used by FMCSA in evaluating whether Mexico-domiciled carriers exercise basic safety management controls. The interim rule included requirements that were not proposed in the NPRM but which are necessary to comply with the FY-2002 DOT Appropriations Act. On January 16, 2003, the Ninth Circuit Court of Appeals remanded this rule, along with two other NAFTA-related rules, to the agency, requiring a full environmental impact statement and an analysis required by the Clean Air Act. On June 7, 2004, the Supreme Court reversed the Ninth Circuit and remanded the case, holding that FMCSA is not required to prepare the environmental documents. FMCSA originally planned to publish a final rule by November 28, 2003. FMCSA will determine the next steps to be taken after enactment of any pending legislation authorizing cross border trucking.

30. **Limitations on the Issuance of Commercial Driver Licenses with a Hazardous Materials Endorsement** Green

Popular Title: USA PATRIOT Act Rule

RIN 2126-AA70

Stage: Interim Final Rule/4

Previous Stage: Interim Final Rule: Publication Date 05/05/2003; End of Comment Period 07/07/2003. IFR Delay of Compliance Date: Publication Date 11/07/2003; End of Comment

Period 01/06/2004. IFR Delay of Compliance Date: Publication Date 08/19/2004; Interim Final Rule/3: Publication Date 08/19/2004.

Abstract: This rulemaking would prohibit States from issuing, renewing, transferring or upgrading a commercial driver's license (CDL) with a hazardous materials endorsement, unless the Transportation Security Administration (TSA) has first conducted a background check on the applicant and determined the applicant does not pose a security risk warranting denial of the hazardous materials endorsement. FMCSA and TSA simultaneously published interim final rules. FMCSA has published another IFR corresponding to TSA's extension of compliance date. Since this rulemaking conforms to TSA's rulemaking, the rulemaking is dependent upon TSA action. This action is considered significant because of substantial public and congressional interest, and national security.

32. **Electronic On-Board Recorders for Hours-of-Service Compliance** Red

Popular Title: Electronic On-Board Recorders

RIN 2126-AA89

Stage: Final Rule

Previous Stage: ANPRM: Publication Date 9/01/2004; End of Comment Period 11/30/2004.
NPRM: Publication Date 01/18/2007;End of Comment Period 04/18/2007.

Abstract: This rulemaking would amend the Federal Motor Carrier Safety Regulations (FMCSRs) to incorporate new performance standards for electronic on-board recorders (EOBRs) installed in commercial motor vehicles (CMVs) manufactured 2 years after the effective date of a final rule. On-board hours-of-service recording devices meeting FMCSA's current requirements and voluntarily installed in CMVs manufactured before that date could continue to be used for the remainder of the service life of those CMVs. Motor carriers that have demonstrated a history of serious noncompliance with the hours-of-service (HOS) rules would be subject to mandatory installation of EOBRs meeting the new performance standards (a remedial directive). The motor carrier would then be required to install EOBRs in all of its CMVs regardless of their date of manufacture and to use the devices for HOS recordkeeping for a period of 2 years, unless the carrier already had equipped its vehicles with automatic on-board recording devices (AOBRDs) meeting the Agency's current requirements under 49 CFR 395.15 and could demonstrate to FMCSA that its drivers understand how to use the devices. FMCSA would encourage industry-wide use of EOBRs by providing the following incentives for motor carriers to voluntarily use EOBRs in their CMVs: Revising the Agency's compliance review procedures to permit examination of a random sample of drivers' records of duty status; and providing partial relief from HOS supporting documents requirements, if certain conditions are satisfied.

Previous Stage: NPRM: Publication Date 12/01/08; End of Comment Period 01/30/09

Abstract: This rulemaking would establish training, testing and certification standards for medical examiners responsible for certifying that interstate commercial motor vehicle drivers meet established physical qualifications standards; provide a database (or National Registry) of medical examiners that meet the prescribed standards for use by motor carriers, drivers, and Federal and State enforcement personnel in determining whether a medical examiner is qualified to conduct examinations of interstate truck and bus drivers; and require medical examiners to transmit electronically to FMCSA the name of the driver and a numerical identifier for each driver that is examined. The rulemaking would also establish the process by which medical examiners that fail to meet or maintain the minimum standards would be removed from the National Registry. This action is in response to section 4116 of Safe, Accountable, Flexible, Efficient, Transportation Equity Act: A Legacy for Users.

Popular Title: Commercial Learner's Permit

RIN 2126-AB02

Stage: Final Rule

Previous Stage: NPRM: Publication Date 4/9/2008 ;End of Comment Period 6/9/2008; End of Extended Comment Period 7/9/2008.

Abstract: This rulemaking would establish revisions to the commercial driver's license knowledge and skills testing standards as required by section 4019 of TEA-21, implement fraud detection and prevention initiatives at the State driver licensing agencies as required by the SAFE Port Act of 2006, and establish new minimum Federal standards for States to issue commercial learner's permits (CLPs), based in part on the requirements of section 4122 of SAFETEA-LU. In addition, to ensuring the applicant has the appropriate knowledge and skills to operate a commercial motor vehicle, this rule would establish the minimum information that must be on the CLP document and the electronic driver's record. The rule would also establish maximum issuance and renewal periods, establish a minimum age limit, address issues related to a driver's State of Domicile, and incorporate previous regulatory guidance into the Federal regulations. This rule would also address issues raised in the SAFE Port Act.

38.	Carrier Safety Fitness Determination	Red
-----	---	-----

Popular Title: CSA 2010 Carrier Safety Fitness Determination

RIN 2126-AB11**Stage:** NPRM**Previous Stage:**None

Abstract: This rulemaking would revise 49 CFR Part 385, Safety Fitness Procedures, in accordance with the Agency's major new initiative, Comprehensive Safety Analysis (CSA) 2010. CSA 2010 is a new operational model FMCSA plans to implement that is designed to help the Agency carry out its compliance and enforcement programs more efficiently and effectively. Currently, the safety fitness rating of a motor carrier is determined based on the results of a very labor intensive compliance review conducted at the carrier's place of business. Aside from roadside inspections and new audits, the compliance review is the Agency's primary intervention. Under CSA 2010, FMCSA would propose to implement a broader array of progressive interventions, some of which allow FMCSA to make contact with more carriers. Through this rulemaking FMCSA would establish safety fitness determinations based on safety data consisting of crashes, inspections, and violation history rather than the standard compliance review. This will enable the Agency to assess the safety performance of a greater segment of the motor carrier industry with the goal of further reducing large truck and bus crashes and fatalities.

40.	CMV Driver Positive Controlled Substances and Alcohol Test Results Database	Red
-----	--	-----

Popular Title: CMV Driver Drug Testing Database

RIN 2126-AB18

Stage: NPRM

Previous Stage: None

Abstract: This rulemaking would create a central database for verified positive controlled substances and alcohol test results for commercial driver's license (CDL) holders and refusals by such drivers to submit to testing. This rulemaking would require employers of CDL holders and service agents to report positive test results and refusals to test into the database. Prospective employers, acting on an application for a CDL driver position with the applicant's written consent to access the database, would query the database to determine if any specific information about the specific driver applicant is in the database before allowing the applicant to be hired and to drive CMVs. This rulemaking is intended to increase highway safety by ensuring CDL holders, who have tested positive or have refused to submit to testing, have completed the U.S. DOT's return-to-duty process before driving CMVs in interstate or intrastate commerce.

RIN 2126-AB20

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking will consider revisions to RIN 2126-AA89 (Electronic On-Board Recorders for Hours of Service Drivers) to expand the number of motor carriers required to install and operate Electronic On-Board Recorders (EOBRs). FMCSA is consolidating this follow-up to the EOBR rule with the Hours Of Service Of Drivers: Supporting Documents rulemaking for development of a single NPRM in RIN 2126-AB20. In addressing Hours of Service Supporting Documents requirements in this new rulemaking, FMCSA will consider reducing or eliminating current paperwork burdens associated with supporting documents in favor of expanded EOBR use.

RIN 2130-AB96

Stage: Final Rule

Previous Stage: NPRM: Publication Date 11/25/2009; End of Comment Period 1/25/2010.

Abstract: This rulemaking would simplify the determination regarding whether or not adjacent track protection is required for roadway work groups engaged in large-scale maintenance or construction, pursuant to 49 CFR Part 214. The recent increase in roadway worker fatalities that have occurred on adjacent track has caused some concern at FRA and throughout the industry, even prompting the filing of a petition for emergency order. FRA issued a notice of safety advisory to address the issue in May of 2004; however, it appears that the effects were not long-lasting. This rulemaking is based on the consensus language developed through the Roadway Worker Protection (RWP) Working Group of FRA's Railroad Safety Advisory Committee (RSAC).

Previous Stage:None

Abstract: This rulemaking, mandated specifically by 49 U.S.C. 5309(e)(9), is intended to make changes to the regulations that govern the New Starts discretionary funding program authorized by 49 U.S.C. 5309. FTA's initial rulemaking on this subject (RIN 2132-AA81), initiated to meet the statutory deadline, was terminated as the result of subsequent Congressional action prohibiting FTA from issuing a rule. This ANPRM is FTA's new start on a rulemaking on this subject; this rulemaking was initiated 3/8/10.

SNPRM: Publication Date 1/23/2008; End of Comment Period 3/24/2008.

Abstract: This rulemaking would respond to Sections 4(b) and 3(b)(2) of Anton's Law (PL 107-318), which directed NHTSA to initiate rulemaking on child restraint system safety, by amending FMVSS No. 213 to incorporate the Hybrid III ten-year-old dummy for child restraint systems rated for children up to 80 pounds. Previously, the agency extended the applicability of FMVSS No. 213 from restraints recommended for children up to 50 lbs. to restraints recommended for children up to 65 lbs.

58. **Ejection Mitigation** Red

Popular Title: Ejection Mitigation

RIN 2127-AK23

Stage: Final Rule

Previous Stage: NPRM: Publication Date 12/2/2009; End of Comment Period 2/2/2010.

Abstract: This rulemaking would create a new Federal Motor Vehicle Safety Standard (FMVSS) for reducing occupant ejection. Currently, there are over 52,000 annual ejections in motor vehicle crashes, and over 10,000 ejected fatalities per year. This rulemaking would propose new requirements for reducing occupant ejection through passenger vehicle side windows. The requirement would be an occupant containment requirement on the amount of allowable excursion through passenger vehicle side windows. The SAFETEA-LU legislation requires that: "[t]he Secretary shall also initiate a rulemaking proceeding to establish performance standards to reduce complete and partial ejections of vehicle occupants from outboard seating positions. In formulating the standards the Secretary shall consider various ejection mitigation systems. The Secretary shall issue a final rule under this paragraph no later than October 1, 2009." The SAFETEA-LU legislation also requires that, if the Secretary determines that the subject final rule deadline cannot be met, the Secretary shall notify and provide an explanation to the Senate Committee on Commerce, Science and Transportation and the House of Representatives Committee on Energy and Commerce of the delay. On September 24, 2009, the Secretary provided appropriate notification to Congress that the

final rule will be delayed until January 31, 2011.

Popular Title: Rearview Mirrors

RIN 2127-AK43

Stage: NPRM

Previous Stage: ANPRM: Publication Date 03/04/09; End of Comment Period 05/04/09

Abstract: This rulemaking would amend Federal Motor Vehicle Standard No. 111; Rearview Mirrors, to reflect requirements contained in the Cameron Gulbransen Kids Transportation Safety Act of 2007. The Act requires that NHTSA expand the required field of view to enable the driver of a motor vehicle to detect areas behind the motor vehicle to reduce death and injury resulting from backing incidents, particularly incidents involving small children and disabled persons. According to the Act, such a standard may be met by the provision of additional mirrors, sensors, cameras, or other technology to expand the driver's field of view.

60. **Tire Fuel Efficiency Consumer Information** Red

Popular Title: Tire Fuel Efficiency Consumer Information

RIN 2127-AK45

Stage: Final Rule

Previous Stage: NPRM: Publication Date 06/22/2009; End of Comment Period 8/21/2009.

Abstract: This rulemaking would establish a new program that would make information about the relative rolling resistance of tires available to purchasers of replacement tires and educate consumers about the effect of tires on automobile fuel efficiency, safety, and durability. The agency is required by the Energy Independence and Security Act of 2007 to establish a national tire fuel efficiency consumer information program for replacement tires designed for use on motor vehicles. Vehicle manufacturers often use low rolling resistance tires on new vehicles to help meet CAFE goals. This rulemaking is significant because it has a statutory mandate and it relates to fuel efficiency.

63. **Require Installation of Seat Belts on Motorcoaches, FMVSS No. 208** Green

Popular Title: Seat Belts on Motorcoaches

RIN 2127-AK56

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would require the installation of lap/shoulder belts in newly-manufactured motorcoaches. Specifically, this rulemaking would establish a new definition for motorcoaches in 49 CFR Part 571.3. It would also amend Federal Motor Vehicle Safety Standard No. 208, "Occupant crash protection," to require the installation of lap/shoulder belts at all driver and passenger seating positions. It would also require the installation of lap/shoulder belts at driver seating positions of large school buses in FMVSS No. 208. This rulemaking responds, in part, to recommendations made by the National Transportation Safety Board for improving bus safety.

67.	Prioritization and Allocation Authority Exercised By the Secretary of Transportation Under the Defense Production Act	Red
-----	--	-----

Popular Title: DPA

RIN 2105-AD83

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would clarify the prioritization and allocation authorities exercised by the Secretary of Transportation under the Defense Production Act (DPA). The DPA is the President's primary authority to ensure timely availability of private sector resources for national defense. In addition to military and energy activities, the definition of "national defense" includes emergency preparedness activities conducted pursuant to Title VI of The Robert T. Stafford Disaster Relief and Emergency Assistance Act and the protection and restoration of critical infrastructure. Under Title I of the DPA, the President has the authority to require the acceptance and prioritization of contracts and orders -- and to allocate materials, services, and facilities -- in support of the national defense. Under Section 201 of Executive Order 12919, the President has delegated these prioritization and allocation authorities to the Secretary of Transportation for all forms of civil transportation. In the 2009 DPA reauthorization, Congress mandated that each Federal agency with delegated authority under Title I of the DPA develop final rules that establish standards and procedures for implementing its delegated authority in emergency and nonemergency conditons. Additionally, Congress mandated that, to the extent practicable, the rules be consistent and unified. DOT is part of an interagency working group, along with the other delegated agencies, that is developing consistent unified rules.

70.	Hazardous Materials: Requirements for Storage of Explosives During Transportation	Red
-----	--	-----

Popular Title: Storage of Explosives

RIN 2137-AE06

Stage: NPRM

Previous Stage: ANPRM: Publication Date 11/16/2005; End of Comment Period 02/14/2006; Reopening of Comment Period 7/03/2008; End of Reopened Comment Period 10/01/2008.

Abstract: This rulemaking would address the current safety and security risks associated with the storage of explosives during transportation. The Hazardous Materials Regulations (HMR) require shipments stored during transportation to conform to the same requirements that apply when the shipments are actually moving and for the shipping company to have security plans covering its shipments. Otherwise, the HMR do not include specific requirements for facilities at which explosives or other high-hazard materials are stored during transportation. The HMR do not establish specific standards for storage facilities nor do they limit the amount of material that may be stored in a single location. Through this rulemaking, the agency will evaluate the adequacy of existing regulations and the need for additional, more specific requirements. In particular, the agency is considering whether current industry standards applicable to the storage of explosives should be incorporated by reference into the HMR.

RIN 2137-AE22

Stage: Final Rule

Previous Stage: NPRM: Publication Date 9/8/2008; End of Comment Period 11/10/2008.

Abstract: In response to two industry petitions for rulemaking, this rulemaking will reconsider and refine the list of hazardous materials for which security plans are currently required. The industry petitioners asked PHMSA to amend the security plan regulations to create a distinction between hazardous materials that present a significant security risk while in transportation and the vast majority of hazardous materials that pose no significant security risk in transportation.

Pipeline and Hazardous Materials Safety Administration

73.	Hazardous Materials; Combination Packages Containing Liquids Intended for Transport by Aircraft	Red
-----	--	-----

Popular Title: Air Packaging

RIN 2137-AE32

Stage: NPRM

Previous Stage: ANPRM: Publication 7/07/2008; End of Comment Period 9/5/2008.

Abstract: Incident data and testing conducted on behalf of DOT indicate many combination packagings authorized for the transportation of hazardous materials may not withstand conditions normally incident to air transportation. PHMSA is considering measures to reduce the incidence of package failures and to minimize the consequences of failures should they occur. This rulemaking would require additional measures to verify packaging integrity, such as performance testing, and revisions to packaging requirements, such as the addition of liners or absorbent material.

Pipeline and Hazardous Materials Safety Administration

74.	Pipeline Safety: Completing regulation of hazardous liquid pipelines operating at low stress	Green
-----	---	-------

Popular Title: Low stress liquid pipelines

RIN 2137-AE36

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would extend existing pipeline safety regulation to rural hazardous liquid pipelines operating at low stress that are currently unregulated. Previous rulemakings have extended safety regulation to low stress pipelines located in populated areas, crossing navigable water, or potentially impacting unusually sensitive areas.

Pipeline and Hazardous Materials Safety Administration

75. **Hazardous Materials: Bulk Loading and Unloading Operations** Red

Popular Title: Loading/Unloading

RIN 2137-AE37

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would request information from industry that would consider whether additional requirements governing bulk loading and unloading operations are necessary. PHMSA has reviewed transportation incident data and findings of several National Transportation Safety Board and Chemical Safety Board accident investigations involving bulk hazardous materials loading and unloading operations, which suggest there may be opportunities to enhance the safety of such operations. In particular, PHMSA is examining what, if any, safety benefits would accrue from a requirement for persons conducting bulk loading and unloading operations to develop and implement operating procedures governing these operations. PHMSA has decided to publish a proposed rule instead of a pre-rule.

Pipeline and Hazardous Materials Safety Administration

76. **Hazardous Materials: Revisions to Requirements for the Transportation of Lithium Batteries** Red

Popular Title: Transportation of Lithium Batteries

RIN 2137-AE44

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would amend the Hazardous Materials Regulations to comprehensively address the safe transportation of lithium cells and batteries. The intent of the rulemaking is to strengthen the current regulatory framework by imposing more effective

safeguards, including design testing to address risks related to internal short circuits, and enhanced packaging, hazard communication, and operational measures for various types and sizes of lithium batteries in specific transportation contexts. The rulemaking responds to several recommendations issued by the National Transportation Safety Board.
