|--|-----|
| 1. Revisions to Digital Flight Data Recorder Regulations for B-737 Airplanes and for Part 125 Operators | Red |
|--|-----|

Popular Title: Digital Flight Data Recorder/B-737

RIN 2120-AG87

Stage: Final Rule

Previous Stage: NPRM: Publication Date 11/18/1999; End of Comment Period 12/20/1999; SNPRM Publication Date 09/05/06; End of Comment Period 12/04/06

Abstract: This rulemaking would amend the digital flight data recorder (DFDR) regulations for transport category airplanes to add a requirement for all Boeing 737 (B-737) series airplanes to record additional flight data parameters. It is based on safety recommendations issued by the National Transportation Safety Board (NTSB) following the investigation of the 1994 USAir FLight 427 accident. This rulemaking is significant because of substantial public interest. A final rule had been scheduled for August 11, 2000. Since publication of the NPRM, the FAA has mandated significant changes to the rudder system on 737s. Accordingly, the proposed rule would apply to a different set of airplanes than originally anticipated. The FAA has requested comment on this change in applicability and updated economic information about the installation of the proposed monitoring equipment.

2. **Revisions to Cockpit Voice Recorder and Digital Flight Data Recorder Regulations** Red

Popular Title: Cockpit Voice Recorder

RIN 2120-AH88

Stage: Final Rule

Previous Stage: NPRM: Publication Date 02/28/2005; End of Comment Period 04/29/2005; Extension of Comment Period 04/27/2005; End of Extended Comment Period 06/28/2005.

Abstract: This rulemaking would amend the cockpit voice recorder (CVR) and digital flight data recorder (DFDR) regulations for certain air carriers, operators, and aircraft manufacturers. This rulemaking would increase the duration of CVR and flight data recorder (FDR) recordings; increase the data recording rate of certain DFDR parameters; require physical separation of the DFDR and CVR; improve the reliability of the power supply to both the CVR and DFDR; and, if data-link communication equipment is installed, require that all data-link communications received by an aircraft be recorded.

3. Aging Aircraft Program (Widespread Fatigue Damage)	Red
--	-----

Popular Title: Aging Aircraft Widespread Fatigue

RIN 2120-AI05

Stage: Final Rule

Previous Stage: NPRM: Publication Date 4/18/2006; End of Comment Period 7/17/2006; Extended Comment Period 7/17/2006; End of Extended Comment Period 9/18/2006.

Abstract: This rulemaking would require design approval holders to establish limits of validity (LOVs) of the engineering data that support the maintenance programs for certain transport category airplanes, and it would require them to determine if maintenance actions are needed to prevent widespread fatigue damage before an airplane reaches its LOV. This rulemaking would require operators of any affected airplane to incorporate the LOV and any necessary service information into their maintenance programs. This rulemaking would also prohibit operation of an affected airplane beyond the operational limit, unless an operator has incorporated an extended LOV and any necessary service information into its maintenance program.

4. **Washington, DC, Metropolitan Area Special Flight Rules Area** | Black

Popular Title: DC Flight Rules

RIN 2120-AI17

Stage: Undetermined

Previous Stage: NPRM: Publication Date: 08/04/2005; End of Comment Period 11/02/2005; Publication Date for Extension of Comment Period 11/07/2005; End of Extended Comment Period 02/06/2006.

Abstract: This rulemaking would codify restrictions for certain aircraft operations in the Washington, DC, Metropolitan Area. This action is necessary because of the ongoing threat of terrorist attacks. The FAA intends by this action to help the Department of Homeland Security and the Department of Defense protect national assets in the National Capital region. We are developing the rule in conjunction with the Department of Defense and Department of Homeland Security.

6. **Part 145: Repair Stations--Ratings and Quality System** Green**Popular Title:** Part 145**RIN 2120-AI53****Stage:** Final Rule**Previous Stage:**None

Abstract: This rulemaking would amend the regulations for repair stations by revising the system of ratings and requiring repair stations to establish a quality program. This rulemaking would add changes critical to maintaining safety. These include: requiring a repair station to maintain a capability list; requiring a repair station to designate a chief inspector; requiring permanent housing for all repair stations for their facilities, equipment, materials, and personnel; and identifying reasons for denying a repair station certificate, especially when a previously held certificate has been revoked. In addition, the rulemaking would clarify recent revisions to the repair station regulations. This action is necessary to reflect changes in aviation technology and repair station business practices.

7. **Special Awareness Training for the Washington, DC Metropolitan Area** Green

Popular Title: Special Training for DC ADIZ

RIN 2120-AI63

Stage: Final Rule

Previous Stage: NPRM: Publication date 7/5/2006; End of Comment Period 9/5/2006.

Abstract: This rulemaking would establish training requirements for any pilot who flies under visual flight rules within 100 nautical miles of Ronald Reagan Washington National Airport's omni-directional range/distance measuring equipment. The training primarily focuses on the procedures for flying in and around Washington, DC's Special Flight Rules Area and Flight Restricted Zone.

8.	Security Related Considerations in the Design and Operation of Transport Category Airplanes	Green
----	--	-------

Popular Title: Security Considerations

RIN 2120-AI66

Stage: Final Rule

Previous Stage: NPRM: Publication Date 01/05/07; End of Comment Period 04/05/07

Abstract: This rulemaking would implement certain security related requirements governing the design of transport category airplanes. The requirements would provide improved airplane design features and greater protection of the cabin, flightdeck, and cargo compartments from the detonation of explosive or incendiary devices, penetration by projectiles, and intrusion by unauthorized persons. The FAA would also require operators to establish a "least risk bomb location" on all affected airplanes and to incorporate certain information into relevant manuals. This rule would adopt several International Civil Aviation Organization standards and harmonize FAA and international regulations.

9. **Congestion Management Rule for LaGuardia Airport** Black

Popular Title: LaGuardia Airport

RIN 2120-AI70

Stage: Undetermined

Previous Stage: NPRM: Publication Date 08/09/06; End of Comment Period 10/30/06; Comment Period Extended 10/24/06; End of Extended Comment Period 12/26/06.

Abstract: This rulemaking would provide a long-term solution to increased congestion and delay at New York's LaGuardia Airport (Laguardia). The rulemaking, if adopted, would establish an operational limit on the number of aircraft landing and taking off at the airport. To offset the effect of this limit, the rulemaking would increase utilization of the airport by encouraging the use of larger aircraft through implementing an airport-wide, average aircraft size requirement designed to increase the number of passengers that may use the airport within the overall proposed operational limits.

Federal Aviation Administration

10.	Special Federal Aviation Regulation No. XX -- Mitsubishi MU-2B Series Airplane Special Training, Experience, and Operating Requirements	Red
-----	--	-----

Popular Title: MU-2B

RIN 2120-AI82

Stage: Final Rule

Previous Stage: NPRM: Publication Date 09/28/06; End of Comment Period 10/30/06; SNPRM: Publication Date 01/03/07; End of Comment Period 02/03/07

Abstract: This rulemaking would create new pilot training, experience, and operating requirements in a Special Federal Aviation Regulation applicable to the Mitsubishi MU-2B series airplane. Following an increased accident and incident rate in the MU-2B airplane, the Federal Aviation Administration (FAA) conducted a safety evaluation of the MU-2B series airplane and found that changes in the training and operating requirements for that airplane are needed. These regulations would improve pilot training for the MU-2B airplane.

11. **Commuter Operations in Very Light Jets (VLJS)** Red**Popular Title:** VLJ**RIN 2120-AI84****Stage:** NPRM**Previous Stage:**None

Abstract: This rulemaking would change the operation regulations to accommodate the entry into the airspace system of very light jets. These changes are necessary because of the introduction of a new type of airplane as a result of significant changes in the aviation industry. The rulemaking resulted, in part, from recommendations from the Aviation Rulemaking Advisory Committee for Parts 14 CFR 135/125. The rulemaking would cover pilot crew, equipment, training, and dispatch requirements for the safe operation of this new type of airplane.

12. **Re-registration and Renewal of Aircraft Registration** Red**Popular Title:** Re-registration & Renewal of Aircraft Registration**RIN 2120-AI89****Stage:** NPRM**Previous Stage:**None

Abstract: This rulemaking would amend requirements concerning the registration of aircraft. The rulemaking is based on the need to increase and maintain the accuracy of aircraft registration information in the Civil Aviation Registry. This rulemaking would ensure aircraft owners periodically provide information regarding changes in registration. The rulemaking would respond to the concerns of law enforcement and other government agencies and would provide more accurate, up-to-date aircraft registration information to all users of the Civil Aviation Registry database.

Federal Aviation Administration

13.	Automatic Dependent Surveillance - Broadcast (ADS-B) Equipage Mandate To Support Air Traffic Control Service	Red
-----	---	-----

Popular Title: ADS-B

RIN 2120-AI92

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would require Automatic Dependent Surveillance - Broadcast (ADS-B) Out equipment on aircraft to operate in certain classes of airspace within the United States National Airspace System. The rulemaking is necessary to accommodate the expected increase in demand for air transportation, as described in the Next Generation Air Transportation System Integrated Plan. The intended effect of this rule is to provide the Federal Aviation Administration with a comprehensive surveillance system that accommodates the anticipated increase in operations and would provide a platform for additional flight applications and services.

15. **Qualification, Service, and Use of Crewmembers and Aircraft Dispatchers** Red

Popular Title: Part 121, Subparts N and O

RIN 2120-AJ00

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would amend the regulations for crewmember and dispatcher training programs in domestic, flag, and supplemental operations. The rulemaking would enhance traditional training programs by requiring the use of flight simulation training devices for flight crewmembers and including additional training requirements in areas that are critical to safety. The rulemaking would also reorganize and revise the qualification and training requirements. The changes are intended to contribute significantly to reducing aviation accidents.

16. **Part 121 Pilot Age Limit** Black**Popular Title:** Age 65**RIN 2120-AJ01****Stage:** NPRM**Previous Stage:**None

Abstract: This rulemaking would amend the Code of Federal Regulations to bring it into conformance with recent legislation raising the upper age limit for pilots serving in domestic, flag, and supplemental operations until they reach their 65th birthday. Congress recently enacted legislation, effective December 13,2007, mandating an Age-65 limit for pilots for purposes of Title 49 USC. Because this rulemaking will only be implementing the new legislation, it has been reclassified as nonsignificant.

RIN 2125-AF14

Stage: Final Rule

Previous Stage: NPRM: Publication Date 7/27/2006; End of Comment Period 9/26/2006.

Abstract: This FHWA/FTA joint rulemaking would clarify the factors to be considered and the standards to be applied in determining the prudence and feasibility of alternatives under section 4(f) (138 of title 23, U.S. Code, and section 303 of title 49, U.S. Code). Section 4(f) properties include certain parks, recreation areas, wildlife and waterfowl refuges, and historic sites described in section 4(f) of the Department of Transportation Act of 1966 (P.L. 89-670). Section 4(f) generally prohibits the use of such properties for transportation projects unless the Secretary of Transportation finds there is no feasible and prudent alternative and all possible planning to minimize the harm is undertaken.

Federal Motor Carrier Safety Administration

22. **Medical Certification Requirements as Part of the Commercial Driver's License** Yellow

Popular Title: Medical CDL

RIN 2126-AA10

Stage: Final Rule

Previous Stage: ANPRM: Publication Date 7/15/1994; End of Comment Period 11/14/1994. NPRM: Publication date 11/16/2006; End of Comment Period 2/14/2007.

Abstract: This rulemaking would require those commercial driver's license (CDL) drivers who are required to obtain a Federal medical certification for the current status of that certification be made part of the commercial driver's licensing and renewal process, as required by Section 215 of the Motor Carrier Safety Improvement Act. Incorporating the current medical certification status information into the State-administered Commercial Driver's License Information System (CDLIS) driver record would improve highway safety by requiring those drivers who are required by Federal regulations to obtain a medical certificate to provide proof of that medical certification in order to obtain or retain a CDL. It would enable electronic verification of the current medical certification status as part of existing employer and enforcement programs. It would eliminate the requirement for those CDL operators who are required by Federal regulations to obtain a medical certificate to carry their medical examiner's certificate in addition to their CDL since an electronic record would verify that there is a valid medical certificate. FMCSA is currently reviewing comments to the docket.

Abstract: This rulemaking would replace three current identification and registration systems: the US DOT number identification system, the commercial registration system, and the financial responsibility system, with an online Federal unified registration system. This program would serve as a clearinghouse and depository of information on, and identification of, brokers, freight forwarders, and others required to register with the Department of Transportation. The Agency is revising this rulemaking to address amendments directed by SAFETEA-LU. The replacement system for the Single State Registration System, which the ICC Termination Act originally directed be merged under URS, will be addressed separately.

Federal Motor Carrier Safety Administration

24.	Application by Certain Mexico-Domiciled Motor Carriers to Operate Beyond U.S. Municipalities and Commercial Zones on the U.S.-Mexico Border	Red
-----	--	-----

Popular Title: Mexico-Domiciled Motor Carriers

RIN 2126-AA34

Stage: Undetermined

Previous Stage: NPRM: Publication Date 05/03/2001; End of Comment Period 07/02/2001. Interim Final Rule: Publication Date 03/19/2002; End of Comment Period 04/18/2002.

Abstract: This rulemaking would change FMCSA regulations to govern applications by Mexican carriers to operate beyond municipalities and commercial zones at the United State-Mexico border. It would also revise the application form, OP-1MX, to be filed by these Mexican motor carriers. The revised form would require additional information about the applicant's business and operating practices to allow the FMCSA to determine if the applicant can meet the safety standards established for operating in interstate commerce in the United States. Carriers that had previously submitted an application would have to submit the updated form. These changes are needed to implement part of the North American Free Trade Agreement (NAFTA). On January 16, 2003, the Ninth Circuit Court remanded this rule, along with two other NAFTA-related rules, to the agency, requiring a full environmental impact statement and an analysis required by the Clean Air Act. On June 7, 2004, the Supreme Court reversed the Ninth Circuit and remanded the case, holding that FMCSA is not required to prepare the environmental documents as ruled by the Ninth Circuit. FMCSA is waiting for Interim Final Rule experience after the border opens before deciding what to do next on this rulemaking. FMCSA originally planned to publish a final rule by November 20, 2003.

25.	Safety Monitoring System and Compliance Initiative for Mexico-Domiciled Motor Carriers Operating in the United States	Red
-----	--	-----

Popular Title: Safety Monitoring

RIN 2126-AA35

Stage: Undetermined

Previous Stage: NPRM: Publication Date 05/03/2001; End of Comment Period 07/02/2001. Interim Final Rule: Publication Date 03/19/2002; End of Comment Period 04/18/2002.

Abstract: This rule would implement a safety monitoring system and compliance initiative designed to evaluate the continuing safety fitness of all Mexico-domiciled carriers within 18 months after receiving a provisional Certificate of Registration or provisional authority to operate in the United States. It also would establish suspension and revocation procedures for provisional Certificates of Registration and operating authority, and incorporate criteria to be used by FMCSA in evaluating whether Mexico-domiciled carriers exercise basic safety management controls. The interim rule included requirements that were not proposed in the NPRM but which are necessary to comply with the FY-2002 DOT Appropriations Act. On January 16, 2003, the Ninth Circuit Court of Appeals remanded this rule, along with two other NAFTA-related rules, to the agency, requiring a full environmental impact statement and an analysis required by the Clean Air Act. On June 7, 2004, the Supreme Court reversed the Ninth Circuit and remanded the case, holding that FMCSA is not required to prepare the environmental documents. FMCSA is waiting for Interim Final Rule experience after the border opens before deciding what to do next on this rulemaking. FMCSA originally planned to publish a final rule by November 28, 2003.

26.	New Entrant Safety Assurance Process	Red
-----	---	-----

Popular Title: New Entrant

RIN 2126-AA59

Stage: Final Rule

Previous Stage: Interim Final Rule: Publication Date 05/13/2002; End of Comment Period 7/12/2002; IFR Effective Date 01/01/2003. NPRM: Publication Date 12/21/2006; End of Comment Period 2/20/2007.

Abstract: This rulemaking would change the New Entrant Safety Assurance Process by raising the standard of compliance for passing the new entrant safety audit. It also would make clarifying changes to some of the existing new entrant regulations. The rule also proposes a separate application procedure and safety oversight system for non-North America-domiciled motor carriers. The proposed rule would improve the Agency's ability to identify at-risk new entrant carriers and would ensure deficiencies in basic safety management controls are corrected before the new entrant is granted permanent registration. These changes would not impose additional operational requirements on any new entrant carrier. All new entrants would continue to receive educational information on how to comply with the safety regulations and be given an opportunity to correct any deficiencies found. FMCSA recognizes many new entrants are small businesses that are unaware of these requirements and continue to need our assistance.

28.	Limitations on the Issuance of Commercial Driver Licenses with a Hazardous Materials Endorsement	Green
-----	---	-------

Popular Title: USA PATRIOT Act Rule

RIN 2126-AA70

Stage: Interim Final Rule/4

Previous Stage: Interim Final Rule: Publication Date 05/05/2003; End of Comment Period 07/07/2003. IFR Delay of Compliance Date: Publication Date 11/07/2003; End of Comment Period 01/06/2004. IFR Delay of Compliance Date: Publication Date 08/19/2004; Interim Final Rule/3: Publication Date 08/19/2004.

Abstract: This rulemaking would prohibit States from issuing, renewing, transferring or upgrading a commercial driver's license (CDL) with a hazardous materials endorsement, unless the Transportation Security Administration (TSA) has first conducted a background check on the applicant and determined the applicant does not pose a security risk warranting denial of the hazardous materials endorsement. FMCSA and TSA simultaneously published interim final rules. FMCSA has published another IFR corresponding to TSA's extension of compliance date. Since this rulemaking conforms to TSA's rulemaking, the rulemaking is dependent upon TSA action. This action is considered significant because of substantial public and congressional interest, and national security.

-----	--	-------

Popular Title: Electronic On-Board Recorders

RIN 2126-AA89

Stage: Final Rule

Previous Stage: ANPRM: Publication Date 9/01/2004; End of Comment Period 11/30/2004. NPRM: Publication Date 01/18/2007;End of Comment Period 04/18/2007.

Abstract: This rulemaking would amend the Federal Motor Carrier Safety Regulations to incorporate new performance standards for electronic on-board recorders (EOBRs) to document compliance with the Federal hours-of-service rules. This would help ensure that performance standards for EOBRs are appropriate and reflect state-of-the-art communication and information management technologies. The rulemaking would consider the potential benefits and costs of requiring motor carriers to install and use EOBRs and evaluate alternative approaches including: 1) mandating such practice industry-wide, 2) limiting the requirement to motor carriers with certain characteristics, and 3) allowing EOBR use to remain voluntary.

34. **Interstate Van Operations** Red

Popular Title: Interstate Van Operations

RIN 2126-AA98

Stage: Final Rule

Previous Stage: None

Abstract: This rulemaking would make the requirements concerning driver qualifications; driving of CMVs; parts and accessories necessary for safe operations; hours of service; and inspection, repair, and maintenance applicable to the operation of vehicles designed or used to transport between 9 and 15 passengers (including the driver) for direct compensation, in interstate commerce, regardless of the distance traveled. Currently the safety regulations apply to such vans when the vehicle is operated beyond a 75 air-mile radius of the driver's work reporting location. This action is in response to SAFETEA-LU.

36. **Commercial Driver's License Testing and Commercial Learner's Permit Standards** Red

Popular Title: Commercial Learner's Permit

RIN 2126-AB02

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would establish revisions to the commercial driver's license knowledge and skills testing standards as required by section 4019 of TEA-21, implement fraud detection and prevention initiatives at the State driver licensing agencies as required by the SAFE Port Act of 2006, and establish new minimum Federal standards for States to issue commercial learner's permits (CLPs), based in part on the requirements of section 4122 of SAFETEA-LU. In addition, to ensuring the applicant has the appropriate knowledge and skills to operate a commercial motor vehicle, this rule would establish the minimum information that must be on the CLP document and the electronic driver's record. The rule would also establish maximum issuance and renewal periods, establish a minimum age limit, address issues related to a driver's State of Domicile, and incorporate previous regulatory guidance into the Federal regulations. This rule would also address issues raised in the SAFE Port Act.

39.	Carrier Safety Fitness Determination	Red
-----	---	-----

Popular Title: CSA 2010 Carrier Safety Fitness Determination

RIN 2126-AB11

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would revise 49 CFR Part 385, Safety Fitness Procedures, in accordance with the Agency’s major new initiative, Comprehensive Safety Analysis (CSA) 2010. CSA 2010 is a new operational model FMCSA plans to implement that is designed to help the Agency carry out its compliance and enforcement programs more efficiently and effectively. Currently, the safety fitness rating of a motor carrier is determined based on the results of a very labor intensive compliance review conducted at the carrier’s place of business. Aside from roadside inspections and new audits, the compliance review is the Agency’s primary intervention. Under CSA 2010, FMCSA would propose to implement a broader array of progressive interventions, some of which allow FMCSA to make contact with more carriers. Through this rulemaking FMCSA would establish safety fitness determinations based on safety data consisting of crashes, inspections, and violation history rather than the standard compliance review. This will enable the Agency to assess the safety performance of a greater segment of the motor carrier industry with the goal of further reducing large truck and bus crashes and fatalities. In 1999, the National Transportation Safety Board (NTSB) recommended that FMCSA base its safety fitness determinations on carrier performance data derived from inspections and not solely the compliance review. NTSB recently classified FMCSA’s response to this recommendation as Open-Unacceptable, because it is planning to implement it as part of a more comprehensive program. CSA 2010 will take additional time to put in place, but it ultimately will generate more useful data for making safety fitness determinations.

40. **Hours of Service of Drivers**

Green

Popular Title: Hours of Service of Drivers**RIN 2126-AB14****Stage:** Interim Final Rule**Previous Stage:** None

Abstract: A rulemaking action was initiated in response to the July 2007 decision by the US Court of Appeals for the District of Columbia Circuit that vacated specific provisions of the Agency's Hours of Service rule published on August 25, 2005. The Court invalidated two provisions: the first relates to increasing the daily driving limit from 10 to 11 hours; the second provision permits drivers to restart their count of weekly accumulations of hours after taking 34 consecutive hours off duty. The Court's mandate will issue on December 27, 2007. At that time, parts of the current 2005 rule will no longer be in effect and the Agency must issue or promulgate some form of rulemaking notice to inform the public of what hours of service are in effect.

Abstract: This rulemaking would address the establishment of a grant program authorizing the Secretary to provide financial assistance to States for local rail line relocation and improvement projects. This rulemaking would create a new part to title 49 of the Code of Federal Regulations; establish regulations governing financial assistance under Part 261, including the project selection criteria; and solicit applications for Capital Grants for Rail Line Relocation Projects. This rulemaking is required by Section 9002 of the Safe Accountable, Flexible, Efficient Transportation Act: A legacy for Users (SAFETEA-LU). Section 9002 authorizes, but does not appropriate, \$350,000,000 per year for each of the fiscal years (FY) 2006 through 2009 for the purpose of funding a grant program to provide financial assistance for local rail line relocation and improvement projects. Congress has not appropriated any funding for the program for FY 2006.

48. **Contractor Performance Assessment for Capital Investment Program**

Green

Popular Title: Contractor Performance**RIN 2132-AA96****Stage:** NPRM**Previous Stage:**None

Abstract: On August 10, 2005, the President signed the Safe, Accountable, Flexible, and Efficient Transportation Equity Act-A Legacy for Users (SAFETEA-LU). Section 3011 of SAFETEA-LU made a number of changes to 49 U.S.C. 5309 ("Section 5309"), which authorizes the Federal Transit Administration's (FTA's) capital investment grant program. SAFETEA-LU emphasized the need to improve the accuracy of the estimates of ridership and costs used to support the selection of a major capital investment ("New Start") as a locally preferred alternative (LPA) for Section 5309 funds. Federal transit law supports the use of incentives to encourage the development of more reliable cost and ridership estimates for New Starts funded under Section 5309. A number of provisions in Section 5309 recognize that contractors to grant recipients play an important role in increasing the reliability of forecasting methods to estimate costs and utilization of New Starts projects. This rulemaking would establish a new part 612 in the Code of Federal Regulations. It would encourage accurate cost and ridership estimates through the award of additional New Starts funds to project sponsors, which they can choose to pass along to their contractors. FTA is considering the effect of recently-enacted statutory language concerning the issuance of final rules under 49 U.S.C. 5309 on this rulemaking.

50. **Roof Crush Resistance** Red**Popular Title:** Roof Crush Resistance**RIN 2127-AG51****Stage:** SNPRM**Previous Stage:** Request for Comments: Publication Date 10/22/01; End of Comment Period 12/06/01. NPRM: Publication Date 8/23/05; End of Comment Period 11/21/05.

Abstract: This rulemaking would upgrade vehicle roof crush requirements. It is part of the agency's comprehensive response to mitigate the number of fatalities and injuries resulting from vehicle rollovers. Rollover crashes constitute about 3 percent of passenger vehicle crashes, but about one third of the fatalities. Light trucks are more prone to rollover, and their percentage of the U.S. fleet continues to increase. This crash mode constitutes a disproportionate segment of the Nation's highway safety problem.

52. **Reduced Stopping Distance Requirements for Truck Tractors** Red**Popular Title:** Reduced Stopping Distance for Truck Tractors**RIN 2127-AJ37****Stage:** Final Rule**Previous Stage:** NPRM: Publication Date: 12/15/2005; End of Comment Period 4/14/2006.

Abstract: This rulemaking would reduce stopping distance requirements for truck tractors equipped with air brake systems. Advances in heavy vehicle braking systems show that improved stopping performance is attainable for these vehicles. Such improvements would reduce the stopping distance disparity with light vehicles, and would result in fewer deaths and injuries and reduce property damage due to fewer crashes between truck tractors and light vehicles.

53. **Subpart T Hybrid III-10C Dummy, 10-Year-Old Child** Red

Popular Title: Hybrid Dummy

RIN 2127-AJ49

Stage: Final Rule

Previous Stage: NPRM: Publication Date 07/13/2005; End of Comment Period 09/12/2005.

Abstract: This rulemaking would incorporate the Hybrid III ten-year old dummy into Part 572 for potential application in Federal motor vehicle safety standards (FMVSS) such as FMVSS No. 213, Child restraint systems. Anton's Law, signed by the President on December 4, 2002, specified in Section 4 that within 24 months, the Secretary of Transportation shall develop and evaluate an anthropomorphic test device that simulates a 10-year old child for use in testing child restraints used in passenger motor vehicles. The evaluation and testing of such a device has been completed by NHTSA. This rulemaking would include rationale for the dummy performance response requirements; detailed dummy design drawings and specifications; and a procedures manual for the dummy inspection, assembly and disassembly.

54. **Automotive Fuel Economy Manufacturing Incentives for Alternative Fueled Vehicles** Red

Popular Title: AMFA Extension

RIN 2127-AK00

Stage: Other

Previous Stage:None

Abstract: This rulemaking would extend the alternative fueled vehicles incentive created by the Alternative Motor Fuels Act of 1988 for Model years 2011 - 2014, at a maximum incentive of 0.9 miles per gallon (mpg) per fleet. This rulemaking would extend the incentive to vehicle manufacturers under 49 Code of Federal Regulations (CFR) section 538.9 for an additional four years. The incentive allows manufacturers to calculate a higher average fuel economy level for dual-fueled vehicles, as defined at 49 USC section 32901(a)(8), permitting up to a 0.9 mpg increase in their overall corporate average fuel economy (CAFE). NHTSA is required by the Energy Policy Act of 2005 to either extend the incentive or explain to Congress why it has not done so by December 31, 2007. The Energy Independence and Security Act of 2007 (EISA), which was signed by the President on December 19, 2007, extended the CAFE credit provision of AMFA and eventually phases it out, making this action moot. It will be terminated in the Department's next Regulatory Agenda.

Abstract: The Department's Americans with Disabilities Act (ADA) final rule, published September 6, 1991, reserved portions of the rule concerning passenger vessels. The ADA covers passenger vessels, but issuing accessibility requirements for vessels involves complex issues unlike those affecting land transportation. This rulemaking would address these issues and propose feasible requirements to make passenger vessels accessible to, and usable by, individuals with disabilities.

58.	Use of Oxygen by Air Carrier Passengers	Red
-----	--	-----

Popular Title: Oxygen by Air Carrier Passengers**RIN 2105-AC29****Stage:** Final Rule**Previous Stage:** NPRM: Publication Date 09/07/2005;End of Comment Period 11/07/2005;Extension of Comment Period 10/21/2005 ; End of Extended Comment Period 01/30/2006.

Abstract: This significant OST final rule would consolidate three notices of proposed rulemaking (NPRMs) to update and expand coverage under the Air Carrier Access Act (ACAA). The ACAA prohibits discrimination on the basis of disability in air travel. The final rule would amend the ACAA rules to apply to foreign air carriers. It would also add new provisions concerning passengers who use electronic respiratory assistive devices (including portable oxygen concentrators) and passengers who are deaf or hard of hearing. In addition, the rule would reorganize and update the entire ACAA rule. This rulemaking is being incorporated into RIN 2105-AC97.

70.	Hazardous Materials: Enhancing Rail Transportation Safety and Security for Hazardous Materials Shipments	Red
-----	---	-----

Popular Title: Rail routing rule

RIN 2137-AE02

Stage: Interim Final Rule

Previous Stage: NPRM: Publication Date 12/21/2006; End of Comment Period: 02/20/2007

Abstract: In consultation with the Federal Railroad Administration (FRA), PHMSA would revise the current requirements on the safe and secure transportation of hazardous materials transported in commerce by rail. It may require rail carriers to (1) compile annual data on certain shipments of hazardous materials and use the data to analyze safety and security risks along rail transportation routes where those materials are transported; (2) assess alternative routing options and make routing decisions based on those assessments; and (3) clarify the current security plan requirements to address en route storage and delays in transit. This rulemaking was scheduled to have a final rule published by 12/24/2007. However, to address matters raised by the Implementing Recommendations of the 9/11 Commission Act of 2007 (Pub.L110-53, 121 Stat. 266), PHMSA will first issue the rule as an IFR.

72.	Hazardous Materials: Enforcement Regulations	Red
-----	---	-----

Popular Title: Package Inspection Authority

RIN 2137-AE13

Stage: NPRM

Previous Stage:None

Abstract: Pursuant to a mandate in SAFETEA-LU (section 7118 of P.L. 109-59), this rulemaking would establish procedural regulations to implement authority provided to DOT to open packages believed to contain hazardous materials; remove such packages from transportation; gather information; order the package transported to a facility for examination and analysis; obtain assistance from qualified persons; and issue emergency restrictions, prohibitions, recalls, or out-of-service orders to abate an imminent hazard.

Effects:

Explanation for any delay: Additional coordination necessary

Federal Register Citation for NPRM: None

73. **Pipeline Safety: Distribution Integrity Management** Red

Popular Title: Distribution Integrity Management

RIN 2137-AE15

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would establish integrity management program requirements appropriate for gas distribution pipeline operators. This rulemaking would require gas distribution pipeline operators to develop and implement programs to better assure the integrity of their pipeline systems.

Effects:

- Economically Significant
- Major
- Information Collection

Prompting action: Statute

Legal Deadline: None

Rulemaking Project Initiated: 03/02/2006

74.	Hazardous Materials: Revision of Requirements for Security Plans	Green
-----	---	-------

Popular Title: Security Plans

RIN 2137-AE22

Stage: NPRM

Previous Stage:None

Abstract: In response to two industry petitions for rulemaking, this rulemaking will reconsider and refine the list of hazardous materials for which security plans are currently required. The industry petitioners asked PHMSA to amend the security plan regulations to create a distinction between hazardous materials that present a significant security risk while in transportation and the vast majority of hazardous materials that pose no significant security risk in transportation.

Pipeline and Hazardous Materials Safety Administration

75.	Pipeline Safety: Standards for Increasing the Maximum Allowable Operating Pressure for Gas Transmission Pipelines	Yellow
-----	--	--------

Popular Title: MAOP for Gas Transmission Pipelines

RIN 2137-AE25

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would propose to allow operation of certain steel gas transmission pipelines at pressures based on higher stress levels, resulting in an increase of maximum allowable operating pressure (MAOP) over that currently allowed in the regulations. The rulemaking would also require a new pipeline to meet more rigorous design and construction standards as a condition for an operator to calculate the MAOP based on higher stress levels. The rulemaking would also require the operator of a new or existing pipeline operating at the increased MAOP to comply with added operation and maintenance requirements.

Effects:

Economically Significant
Major

76.	Control Room Management/Human Factors	Red
-----	--	-----

Popular Title: Control Room Management/Human Factors

RIN 2137-AE28

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would require operators of natural gas pipelines, hazardous liquid pipelines, and liquefied natural gas (LNG) facilities, to identify and employ specific procedures to improve control room operations, controller training, and controller qualifications. It would require operators to develop, implement, and submit to PHMSA (or the appropriate State), a human factors management plan designed to reduce risks associated with human factors. This would require operators to include in their plans a maximum limit on the hours of service for individuals employed as controllers. It would also require operators to periodically review their management of computer-based control system alarms and to verify that the control systems provide accurate and timely information to controllers. This rulemaking would further require each operator to validate the implementation of the program elements applicable to their individual control system.

77.	Hazardous Materials; Combination Packages Containing Liquids Intended for Transport by Aircraft	Green
-----	--	-------

Popular Title: Air Packaging

RIN 2137-AE32

Stage: ANPRM

Previous Stage: None

Abstract: Incident data and testing conducted on behalf of DOT indicate many combination packagings authorized for the transportation of hazardous materials may not withstand conditions normally incident to air transportation. PHMSA is considering measures to reduce the incidence of package failures and to minimize the consequences of failures should they occur. PHMSA is soliciting comments on how to accomplish these goals, including measures to verify packaging integrity, such as performance testing, and revisions to packaging requirements, such as the addition of liners or absorbent material.
