|--|-----|
| 1. Aging Aircraft Program (Widespread Fatigue Damage) | Red |
|--|-----|

Popular Title: Aging Aircraft Widespread Fatigue

RIN 2120-AI05

Stage: Final Rule

Previous Stage: NPRM: Publication Date 4/18/2006; End of Comment Period 7/17/2006; Extended Comment Period 7/17/2006; End of Extended Comment Period 9/18/2006.

Abstract: This rulemaking would require design approval holders to establish limits of validity (LOVs) of the engineering data that support the maintenance programs for certain transport category airplanes, and it would require them to determine if maintenance actions are needed to prevent widespread fatigue damage before an airplane reaches its LOV. This rulemaking would require operators of any affected airplane to incorporate the LOV into the airworthiness limitations section of the instructions for continued airworthiness. This rulemaking would also prohibit operation of an affected airplane beyond the LOV, unless an operator has incorporated an extended LOV and any necessary service information into its maintenance program.

Federal Aviation Administration

2. **Commuter Operations in Very Light Jets (VLJs)** Green

Popular Title: VLJ

RIN 2120-AI84

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would establish a rule to allow passenger-carrying commuter operations to be conducted under the provisions of part 135 using multiengine turbojets, certificated under either part 23 or part 25, configured with 9 or fewer passenger seats. The rulemaking would allow multiengine turbojet operators to provide commuter service to the traveling public, thus accommodating new technologies and a new generation of turbojet airplanes that otherwise would not be allowed in part 135 commuter service. Since 1995, turbojets used in scheduled operations must operate under the provisions of part 121. This current rulemaking resulted, in part, from recommendations from the Aviation Rulemaking Committee for parts 14 CFR 135/125 and covers pilot crew, equipment, training, and dispatch requirements for the safe operation of this new generation airplane. An earlier internet report listed this item as an NPRM with a scheduled publication date of 10/20/09. FAA has decided to terminate this rulemaking.

3. **Qualification, Service, and Use of Crewmembers and Aircraft Dispatchers** Red

Popular Title: Part 121, Subparts N and O

RIN 2120-AJ00

Stage: SNPRM

Previous Stage: NPRM: Publication Date 01/12/2009;End of Comment Period 05/12/2009;Extension of Comment Period 04/20/2009;End of Extension of Comment Period 08/10/2009.

Abstract: This rulemaking would amend the regulations for crewmember and dispatcher training programs in domestic, flag, and supplemental operations. The rulemaking would enhance traditional training programs by requiring the use of flight simulation training devices for flight crewmembers and including additional training requirements in areas that are critical to safety. The rulemaking would also reorganize and revise the qualification and training requirements. The changes are intended to contribute significantly to reducing aviation accidents.

4. **Safety Management Systems (SMS)** Black

Popular Title: SMS

RIN 2120-AJ15

Stage: Undetermined

Previous Stage: ANPRM: Publication Date 7/23/2009; End of Comment Period 10/21/2009.

Abstract: This rulemaking would require a Safety Management System (SMS) for FAA certificate holders, certain product manufacturers, applicants, and employers. This action is being taken to further enhance the practice of managing safety, conducting risk and system assessments and analysis, undertaking preventive and corrective actions, and creating a safety culture. The intended effect of this action would make the United States compliant with International Civil Aviation Organization (ICAO) annexes.

5.	Pilot-in-Command Proficiency Check and Other Changes to the Pilot and Pilot School Certification Rules	Yellow
----	---	--------

Popular Title: PIC Proficiency

RIN 2120-AJ18

Stage: Final Rule

Previous Stage: NPRM: Publication Date 08/31/2009; End of Comment Period 11/30/2009

Abstract: This rulemaking would require proficiency checks for pilots in command (PICs) of single-piloted turbojet powered airplanes, allow pilot schools to use Internet-based training without requiring schools to have a physical ground training facility, allow pilot schools and provisional pilot schools to apply for a combined private pilot certification and instrument rating course, and revise the definition of "complex airplane." FAA believes these actions are necessary to respond to changes in the aviation industry and to avoid imposing unnecessary regulatory burdens. The intended effect of this rulemaking would be to ensure flight crewmembers have the training and qualifications necessary to operate aircraft safely.

6.	Certification of Turbofan Powered Airplanes and Miscellaneous Amendments	Green
----	---	-------

Popular Title: Turbofan Powered Airplanes

RIN 2120-AJ22

Stage: Final Rule

Previous Stage: NPRM: Publication Date 8/17/2009; End of Comment Period 11/16/2009; Extension of Comment Period 11/16/2009; End of Extended Comment Period 12/16/2009.

Abstract: This rulemaking would address certification and operational issues surrounding the introduction of turbofan powered airplanes. This action is necessary to standardize certification requirements and consolidate these requirements into one location. The intent is to ensure the same standards apply to all light aircraft.

7.	Supercooled Large Droplet Icing Conditions	Red
----	---	-----

Popular Title: Supercooled Large Droplet Icing Conditions

RIN 2120-AJ34

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would amend the airworthiness standards applicable to transport category airplanes certificated for flight in icing conditions and the icing airworthiness standards applicable to aircraft engines. The rulemaking would improve safety by taking into account supercooled large drop icing conditions for transport category airplanes most affected by supercooled large drop icing conditions. The rulemaking would also include mixed phase and ice crystal conditions for all transport category airplanes, and supercooled large drop, mixed phase, and ice crystal icing conditions for all turbine engines. This rulemaking is the result of information gathered from a review of icing accidents and incidents, and is intended to improve the level of safety for new airplane and engine

designs for operations in icing conditions.

8.	Restrictions on Operators Employing Former Flight Standards Service Aviation Safety Inspectors	Green
----	---	-------

Popular Title: Post Employment Restrictions

RIN 2120-AJ36

Stage: Final Rule

Previous Stage: NPRM: Publication Date 11/20/2009; End of Comment Period 2/18/2010.

Abstract: This rulemaking would prohibit a certificate holder from employing or contracting with a former Aviation Safety Inspector (ASI) or other person with certificate holder oversight responsibilities to act as an agent or to represent that certificate holder in any matter before the FAA. This restriction would apply if the person, in the proceeding two year period, has (a) served as, or was responsible for oversight of, a Flight Standards Service ASI; and (b) had the responsibility to inspect, or oversee the inspection of, the operations of the certificate holder. The rulemaking would enhance the FAA's ability to properly perform its safety mission and to ensure that every passenger can have complete confidence in the integrity of the programs and operations administered by the FAA.

9. **Airport Safety Management System** Red

Popular Title: Airport SMS

RIN 2120-AJ38

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would require airport operators to institute a safety management system at their airports. This action is necessary to improve safety through conformance with best practices in risk management and promote international harmonization with ICAO standards. The rule is intended to facilitate integration of formal risk management processes within the airport's day-to-day operations.

RIN 2120-AJ43

Stage: Final Rule

Previous Stage: NPRM: Publication Date 11/23/2009; End of Comment Period 02/22/2010

Abstract: This rulemaking would amend the regulations applicable to operators of certain airplanes used in air carrier service and certificated for flight in icing conditions. The standards would require either the installation of ice detection equipment or changes to the Airplane Flight Manual to ensure timely activation of the airframe ice protection system. This regulation is the result of information gathered from a review of icing accidents and incidents, and it is intended to improve the level of safety when airplanes are operated in icing conditions.

RIN 2120-AJ45

Stage: Final Rule

Previous Stage: NPRM: Publication Date 05/07/2010; End of Comment Period 08/06/2010.

Abstract: This rulemaking would clarify and standardize the rules for application, amendment, suspension or revocation of operations specifications issued to foreign air carriers operating in the United States. This action is necessary to update the process for issuing operations specifications and establishes a regulatory basis for current practices, such as amending, terminating or suspending operations specifications. The intent of this action is to permit operations specifications to be easily revised and updated to meet international standards and the changing aviation environment.

RIN 2120-AJ58

Stage: NPRM

Previous Stage: NPRM: Publication date 09/14/2010; End of Comment Period 11/15/2010.

Abstract: This rulemaking would establish one set of flight time limitations, duty period limits, and rest requirements for pilots. The rulemaking is necessary to ensure that pilots have the opportunity to obtain sufficient rest to perform their duties. The objective of the rule is to contribute to and to improve aviation safety. This rulemaking is related to the following: an NPRM (RIN 2120-AF63), and a Withdrawal (RIN 2120-AI93).

15. **Operation and Certification of Small Unmanned Aircraft Systems (sUAS)** Green

Popular Title: Small Unmanned Aircraft

RIN 2120-AJ60

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would enable small unmanned aircraft to safely operate in limited portions of the national airspace system (NAS). This action is necessary because it addresses the novel legal or policy issues about the minimum safety parameters for operating recreational remote control model and toy aircraft in the NAS. The intended effect of this action is to develop requirements and standards to ensure that risks are adequately mitigated, such that safety is maintained for the entire aviation community.

16. **Pilot Certification and Qualification Requirements (formerly First Officer Qualification Requirements) (HR 5900)** Green

Popular Title: Pilot Certification and Qualification Requirements

RIN 2120-AJ67

Stage: NPRM

Previous Stage: ANPRM: Publication Date 02/08/2010; End of Comment Period 04/09/2010

Abstract: This rulemaking would amend the eligibility and qualification requirements for

pilots engaged in part 121 air carrier operations. Additionally, it would modify the requirements for an airline transport pilot certificate. These actions are necessary because recent airline accidents and incidents have brought considerable attention to the experience level and training of air carrier flight crews.

18.	Prohibition Against Certain Flights Within the Territory and Airspace of Afghanistan	Red
-----	---	-----

Popular Title: Afghan SFAR

RIN 2120-AJ69

Stage: Final Rule

Previous Stage: NPRM: Publication Date 05/26/2010;End of Comment Period 06/10/2010.

Abstract: This rulemaking would prohibit flight operations below flight level (FL) 160 within the territory and airspace of Afghanistan by all: U.S. air carriers; U.S. commercial operators; persons exercising the privileges of a U.S. airman certificate, except if the flight is on behalf of a foreign air carrier; and operators of U.S.-registered aircraft, except when such operators are foreign air carriers. The FAA finds this action necessary to prevent a potential hazard to persons and aircraft in engaged in such flight operations.

19.	Requirement for Wildlife Assessments at Certificated Airports	Green
-----	--	-------

Popular Title: Wildlife Hazard Assessment (WHA)

RIN 2120-AJ71

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would require a Wildlife Hazard Assessment (scientific evaluation of wildlife populations and their attractants) for certificated airports. This rulemaking would also require periodic completion of a wildlife hazard assessment, or continuous wildlife monitoring as an alternative to the assessment, and clarify requirements for those conducting an assessment. This rulemaking is intended to decrease direct hazards (animals striking aircraft) and indirect hazards (animal burrowing and nesting in or near aircraft or aircraft operations areas).

22. **Safety Management Systems for Part 121 Certificate Holders** Green

Popular Title: SMS for Part 121

RIN 2120-AJ86

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would require all part 121 air carriers to implement a safety management system (SMS). Congress passed Public Law 111-216 instructing FAA to conduct a rulemaking to require all part 121 air carriers to implement an SMS. The proposed rule must include the following safety management elements: requirements based on risk management, quality management techniques to develop safety assurance, use of interrelated systems to measure effectiveness of safety measures, and promotion of an organization-wide safety culture. Congress further required that the FAA consider at a minimum each of the following as part of the SMS rulemaking: (1) An Aviation Safety Action Program (ASAP), (2) A Flight Operational Quality Assurance Program (FOQA), (3) A Line Operations Safety

Audit, and (4) An Advance Qualification Program.

NPRM: Publication Date 05/19/2005; End of Comment Period 08/17/2005.

Abstract: This rulemaking would replace three current identification and registration systems: the US DOT number identification system, the commercial registration system, and the financial responsibility system, with an online Federal unified registration system (URS). This program would serve as a clearinghouse and depository of information on, and identification of, brokers, freight forwarders, and others required to register with the Department of Transportation. The Agency is revising this rulemaking to address amendments directed by Safe, Accountable, Flexible, Efficient, Transportation Equity Act: A Legacy for Users (SAFETEA-LU). The replacement system for the Single State Registration System, which the ICC Termination Act originally directed be merged under URS, was addressed separately in RIN 2126-AB09. The cargo insurance portion of this rulemaking has been split off into RIN 2126-AB21.

27.	Application by Certain Mexico-Domiciled Motor Carriers to Operate Beyond U.S. Municipalities and Commercial Zones on the U.S.-Mexico Border	Red
-----	--	-----

Popular Title: Mexico-Domiciled Motor Carriers

RIN 2126-AA34

Stage: Undetermined

Previous Stage: NPRM: Publication Date 05/03/2001; End of Comment Period 07/02/2001.
Interim Final Rule: Publication Date 03/19/2002; End of Comment Period 04/18/2002.

Abstract: This rulemaking would change FMCSA regulations to govern applications by Mexican carriers to operate beyond municipalities and commercial zones at the United State-Mexico border. It would also revise the application form, OP-1MX, to be filed by these Mexican motor carriers. The revised form would require additional information about the applicant's business and operating practices to allow the FMCSA to determine if the applicant can meet the safety standards established for operating in interstate commerce in the United States. Carriers that had previously submitted an application would have to submit the updated form. These changes are needed to implement part of the North American Free Trade Agreement (NAFTA). On January 16, 2003, the Ninth Circuit Court remanded this rule, along with two other NAFTA-related rules, to the agency, requiring a full environmental impact statement and an analysis required by the Clean Air Act. On June 7, 2004, the Supreme Court reversed the Ninth Circuit and remanded the case, holding that FMCSA is not required to prepare the environmental documents as ruled by the Ninth Circuit. FMCSA originally planned to publish a final rule by November 20, 2003. FMCSA will determine the next steps to be taken after enactment of any pending legislation authorizing cross border trucking.

Abstract: This rule would implement a safety monitoring system and compliance initiative designed to evaluate the continuing safety fitness of all Mexico-domiciled carriers within 18 months after receiving a provisional Certificate of Registration or provisional authority to operate in the United States. It also would establish suspension and revocation procedures for provisional Certificates of Registration and operating authority, and incorporate criteria to be used by FMCSA in evaluating whether Mexico-domiciled carriers exercise basic safety management controls. The interim rule included requirements that were not proposed in the NPRM but which are necessary to comply with the FY-2002 DOT Appropriations Act. On January 16, 2003, the Ninth Circuit Court of Appeals remanded this rule, along with two other NAFTA-related rules, to the agency, requiring a full environmental impact statement and an analysis required by the Clean Air Act. On June 7, 2004, the Supreme Court reversed the Ninth Circuit and remanded the case, holding that FMCSA is not required to prepare the environmental documents. FMCSA originally planned to publish a final rule by November 28, 2003. FMCSA will determine the next steps to be taken after enactment of any pending legislation authorizing cross border trucking.

30. **Limitations on the Issuance of Commercial Driver Licenses with a Hazardous Materials Endorsement** Green

Popular Title: USA PATRIOT Act Rule

RIN 2126-AA70

Stage: Interim Final Rule/4

Previous Stage: Interim Final Rule: Publication Date 05/05/2003; End of Comment Period 07/07/2003. IFR Delay of Compliance Date: Publication Date 11/07/2003; End of Comment Period 01/06/2004. IFR Delay of Compliance Date: Publication Date 08/19/2004; Interim Final Rule/3: Publication Date 08/19/2004.

Abstract: This rulemaking would prohibit States from issuing, renewing, transferring or upgrading a commercial driver's license (CDL) with a hazardous materials endorsement, unless the Transportation Security Administration (TSA) has first conducted a background check on the applicant and determined the applicant does not pose a security risk warranting denial of the hazardous materials endorsement. FMCSA and TSA simultaneously published interim final rules. FMCSA has published another IFR corresponding to TSA's extension of compliance date. Since this rulemaking conforms to TSA's rulemaking, the rulemaking is dependent upon TSA action. This action is considered significant because of substantial public and congressional interest, and national security.

34. **Commercial Driver's License Testing and Commercial Learner's Permit Standards** Red

Popular Title: Commercial Learner's Permit

RIN 2126-AB02

Stage: Final Rule

Previous Stage: NPRM: Publication Date 4/9/2008 ;End of Comment Period 6/9/2008; End of Extended Comment Period 7/9/2008.

Abstract: This rulemaking would establish revisions to the commercial driver's license knowledge and skills testing standards as required by section 4019 of TEA-21, implement

fraud detection and prevention initiatives at the State driver licensing agencies as required by the SAFE Port Act of 2006, and establish new minimum Federal standards for States to issue commercial learner's permits (CLPs), based in part on the requirements of section 4122 of Safe, Accountable, Flexible, Efficient, Transportation Equity Act: A Legacy for Users (SAFETEA-LU). In addition to ensuring the applicant has the appropriate knowledge and skills to operate a commercial motor vehicle, this rule would establish the minimum information that must be on the CLP document and the electronic driver's record. The rule would also establish maximum issuance and renewal periods, establish a minimum age limit, address issues related to a driver's State of Domicile, and incorporate previous regulatory guidance into the Federal regulations. This rulemaking would also address issues raised in the SAFE Port Act.

35.	Minimum Training Requirements for Entry Level Commercial Motor Vehicle Operations	Red
-----	--	-----

Popular Title: Entry Level Driver Training

RIN 2126-AB06

Stage: Final Rule

Previous Stage: NPRM: Publication Date 12/26/2007; End of Comment Period 3/28/2008; Publication Date for Extension of Comment Period 3/21/2008; End of Extended Comment Period 5/23/2008.

Abstract: This rulemaking would require behind-the-wheel and classroom training for persons who must hold a commercial driver's license to operate commercial motor vehicles. This action is in response to the U.S. Court of Appeals for the District of Columbia Circuit's December 2005 decision remanding the May 21, 2004, Final Rule, "Minimum Training Requirements for Entry-Level Commercial Motor Vehicle Operators" to the Agency for further consideration. The rulemaking will consider the effectiveness of CMV driver training in reducing crashes, the appropriate types and levels of training that should be mandated, and related costs.

36. **Carrier Safety Fitness Determination** Red

Popular Title: Carrier Safety Fitness Determination

RIN 2126-AB11

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would revise 49 CFR Part 385, Safety Fitness Procedures, in accordance with the Agency's major new initiative, Comprehensive Safety Analysis (CSA) 2010. CSA 2010 is a new operational model FMCSA plans to implement that is designed to help the Agency carry out its compliance and enforcement programs more efficiently and effectively. Currently, the safety fitness rating of a motor carrier is determined based on the results of a very labor intensive compliance review conducted at the carrier's place of business. Aside from roadside inspections and new audits, the compliance review is the Agency's primary intervention. Under CSA 2010, FMCSA would propose to implement a broader array of progressive interventions, some of which allow FMCSA to make contact with more carriers. Through this rulemaking FMCSA would establish safety fitness determinations based on safety data consisting of crashes, inspections, and violation history rather than the standard compliance review. This will enable the Agency to assess the safety performance of a greater segment of the motor carrier industry with the goal of further reducing large truck and bus crashes and fatalities.

Federal Motor Carrier Safety Administration

38. Commercial Driver's License Drug and Alcohol Clearinghouse**Red****Popular Title:** CDL Drug and Alcohol Database**RIN 2126-AB18****Stage:** NPRM**Previous Stage:** None

Abstract: This rulemaking would create a central database for verified positive controlled substances and alcohol test results for commercial driver's license (CDL) holders and refusals by such drivers to submit to testing. This rulemaking would require employers of CDL holders and service agents to report positive test results and refusals to test into the database. Prospective employers, acting on an application for a CDL driver position with the applicant's written consent to access the database, would query the database to determine if any specific information about the driver applicant is in the database before allowing the applicant to be hired and to drive CMVs. This rulemaking is intended to increase highway safety by ensuring CDL holders, who have tested positive or have refused to submit to testing, have completed the U.S. DOT's return-to-duty process before driving CMVs in interstate or intrastate commerce. It is also intended to ensure that employers are meeting their drug and alcohol testing responsibilities.

39. Electronic On-Board Recorders and Hours of Service Supporting Documents**Red****Popular Title:** EOBR and HOS supporting documents**RIN 2126-AB20****Stage:** NPRM**Previous Stage:**None

Abstract: This rulemaking will consider revisions to RIN 2126-AA89 (Electronic On-Board Recorders for Hours of Service Drivers) to expand the number of motor carriers required to install and operate Electronic On-Board Recorders (EOBRs). FMCSA is consolidating this

follow-up to the EOBR rule with the Hours Of Service Of Drivers: Supporting Documents rulemaking for development of a single NPRM in RIN 2126-AB20. In addressing Hours of Service Supporting Documents requirements in this new rulemaking, FMCSA will consider reducing or eliminating current paperwork burdens associated with supporting documents in favor of expanded EOBR use. On January 15, 2010, the American Trucking Associations (ATA) filed a Petition for a Writ of Mandamus in the United States Court of Appeals for the District of Columbia Circuit (D.C. Cir. No. 10-1009). ATA petitioned the court to direct FMCSA to issue an NPRM on supporting documents in conformance with the requirements set forth in section 113 of the HMTAA within 60 days after the issuance of the writ and a final rule no later than 6 months after the issuance of the NPRM. The court granted the petition for writ of mandamus on September 30, 2010, ordering FMCSA to issue an NPRM on the supporting document regulations by December 30, 2010.

RIN 2130-AB96**Stage:** Final Rule**Previous Stage:** NPRM: Publication Date 11/25/2009; End of Comment Period 1/25/2010.

Abstract: This rulemaking would simplify the determination regarding whether or not adjacent track protection is required for roadway work groups engaged in large-scale maintenance or construction, pursuant to 49 CFR Part 214. The recent increase in roadway worker fatalities that have occurred on adjacent track has caused some concern at FRA and throughout the industry, even prompting the filing of a petition for emergency order. FRA issued a notice of safety advisory to address the issue in May of 2004; however, it appears that the effects were not long-lasting. This rulemaking is based on the consensus language developed through the Roadway Worker Protection (RWP) Working Group of FRAA's Railroad Safety Advisory Committee (RSAC).

Vehicle/Track Interaction Safety Standards; High-Speed and High Cant Green

46. **Deficiency Operations**

Popular Title: Vehicle/Track Interaction, High Speed, High Cant

RIN 2130-AC09

Stage: Final Rule

Previous Stage:None

Abstract: This rulemaking would amend the Track Safety Standards and Passenger Equipment Safety Standards for high-speed train operations and train operations at high cant deficiencies to promote the safe interaction of rail vehicles with the track over which they operate. It would revise both the safety limits for these operations and the process to qualify them. It accounts for a range of vehicle types that are currently used and may likely be used on future high-speed or high cant deficiency rail operations, and would provide safety assurance for train operations in all classes of track. It is based on the results of simulation studies designed to identify track geometry irregularities associated with unsafe wheel forces and acceleration, thorough reviews of vehicle qualification and revenue service test data, and consideration of international practices. This rulemaking was recently upgraded to significant.

Abstract: This rulemaking would transform the FTA's Project Management Oversight rule at 49 CFR Part 633 into a Capital Project Management rule governing all major capital projects funded under 49 U.S.C. Chapter 53. The rulemaking will consider the appropriate scope of such a rule; the definition of "major capital project"; the technical capacity and capability of project sponsors; the requirements for Project Management Plans; readiness criteria for major capital projects; the role of risk assessments in project development; and financial plans for major capital projects. This rulemaking was recently upgraded to significant.

57. **Ejection Mitigation** Red

Popular Title: Ejection Mitigation

RIN 2127-AK23

Stage: Final Rule

Previous Stage: NPRM: Publication Date 12/2/2009; End of Comment Period 2/2/2010.

Abstract: This rulemaking would create a new Federal Motor Vehicle Safety Standard (FMVSS) for reducing occupant ejection. Currently, there are over 52,000 annual ejections in motor vehicle crashes, and over 10,000 ejected fatalities per year. This rulemaking would propose new requirements for reducing occupant ejection through passenger vehicle side windows. The requirement would be an occupant containment requirement on the amount of allowable excursion through passenger vehicle side windows. The Safe, Accountable, Flexible, Efficient, Transportation Equity Act (SAFETEA-LU) requires that "[t]he Secretary shall also initiate a rulemaking proceeding to establish performance standards to reduce complete and partial ejections of vehicle occupants from outboard seating positions. In formulating the standards the Secretary shall consider various ejection mitigation systems. The Secretary shall issue a final rule under this paragraph no later than October 1, 2009." SAFETEA-LU also requires that, if the Secretary determines that the subject final rule deadline cannot be met, the Secretary shall notify and provide an explanation to the Senate Committee on Commerce, Science and Transportation and the House of Representatives Committee on Energy and Commerce of the delay. On September 24, 2009, the Secretary provided appropriate notification to Congress that the final rule will be delayed until January 31, 2011.

Popular Title: Rearview Mirrors

RIN 2127-AK43

Stage: NPRM

Previous Stage: ANPRM: Publication Date 03/04/09; End of Comment Period 05/04/09

Abstract: This rulemaking would amend Federal Motor Vehicle Standard No. 111; Rearview Mirrors, to reflect requirements contained in the Cameron Gulbransen Kids Transportation Safety Act of 2007. The Act requires that NHTSA expand the required field of view to enable the driver of a motor vehicle to detect areas behind the motor vehicle to reduce death and injury resulting from backing incidents, particularly incidents involving small children and disabled persons. According to the Act, such a standard may be met by the provision of additional mirrors, sensors, cameras, or other technology to expand the driver's field of view.

62.	Commercial Medium- and Heavy-Duty On-Highway Vehicles and Work Truck Fuel Efficiency Standards	Green
-----	---	-------

Popular Title: Medium- and Heavy-Duty Truck Fuel Efficiency

RIN 2127-AK74

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would respond to requirements of the Energy Policy and Conservation Act, as amended by the Energy Independence and Security Act of 2007. The statute requires that rulemaking begin with a report by the National Academy of Sciences evaluating medium-duty and heavy-duty truck fuel economy standards. The National Academy provided Congress and NHTSA with this report on March 18, 2010. EISA then requires that NHTSA complete a study that examines the fuel efficiency of commercial medium- and heavy-duty on-highway vehicles and work trucks and determines the appropriate test procedures and methodologies for measuring the fuel efficiency of such vehicles, the appropriate metric for measuring the fuel efficiency of such vehicles, the range of factors that affect the fuel efficiency of these vehicles, and other factors that could impact a program to improve the fuel efficiency of these vehicles. The NHTSA study was issued October 25, 2010. Once that study is completed, NHTSA has 24 months to complete a final rule establishing a fuel efficiency program for these vehicles. The law provides that the new standards must provide at least 4 full model years of regulatory leadtime and 3 full model years of regulatory stability (i.e., the standards must remain in effect for 3 years before they may be amended). On May 21, 2010, President Obama issued a memorandum directing NHTSA and EPA conduct a joint rulemaking (NHTSA regulating fuel efficiency and EPA regulating greenhouse gas emissions), and to issue a final rule by July 30, 2011.

-----	---	-----

Popular Title: Alternative Fuel Badges, Labels and Consumer Info

RIN 2127-AK75

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would respond to requirements of the Energy Independence and Security Act of 2007 (EISA), Title 1, Subtitle A, Section 105, as it amends 49 USC Â§ 32908, to implement Consumer Information and Consumer Education programs related to fuel economy, GHG, other emissions, and alternative fuels. EISA directs the Secretary of Transportation to label vehicles with a permanent and prominent display that an automobile is capable of operating on alternative fuels, and to include in the owner's manual for vehicles capable of operating on alternative fuels information that describes that capability and the benefits of using alternative fuels, including the renewable nature and environmental benefits of using alternative fuels. Additionally, EISA requires a label to be attached to the fuel compartment of vehicles capable of operating on alternative fuels, with the form of alternative fuel stated on the label. EISA, signed into Law on December 19, 2007, requires that the Secretary issue a final rule not later than 42 months after the date of the enactment.

65.	Passenger Car and Light Truck Corporate Average Fuel Economy Standards MYs 2017 and Beyond	Green
-----	---	-------

Popular Title: CAFE 2017 and Beyond

RIN 2127-AK79

Stage: Supplemental Notice of Intent

Previous Stage: Notice of Intent: Published 10/13/2010.

Abstract: This rulemaking would establish Corporate Average Fuel Economy (CAFE) standards for light trucks and passenger cars for model years 2017 and beyond. This rulemaking would respond to requirements of the Energy Policy and Conservation Act, as amended by the Energy Independence and Security Act of 2007. The statute requires that CAFE standards be prescribed separately for passenger automobiles and non-passenger automobiles to achieve a combined fleet fuel economy of at least 35 mpg by model year 2020. For model years 2021 and beyond, the statute requires that the average fuel economy required to be attained by each fleet of passenger and non-passenger automobiles be the maximum feasible for each model year. The law requires the standards be set at least 18 months prior to the start of the model year. On May 21, 2010, President Obama issued a memorandum directing NHTSA and EPA to conduct a joint rulemaking (NHTSA regulating

fuel economy and EPA regulating greenhouse gas emissions), and to issue a Notice of Intent to Issue a Proposed Rule (NOI) by September 30, 2010.

Abstract: This rulemaking would clarify the prioritization and allocation authorities exercised by the Secretary of Transportation under the Defense Production Act (DPA). The DPA is the President's primary authority to ensure timely availability of private sector resources for national defense. In addition to military and energy activities, the definition of "national defense" includes emergency preparedness activities conducted pursuant to Title VI of The Robert T. Stafford Disaster Relief and Emergency Assistance Act and the protection and restoration of critical infrastructure. Under Title I of the DPA, the President has the authority to require the acceptance and prioritization of contracts and orders -- and to allocate materials, services, and facilities -- in support of the national defense. Under Section 201 of Executive Order 12919, the President has delegated these prioritization and allocation authorities to the Secretary of Transportation for all forms of civil transportation. In the 2009 DPA reauthorization legislation, Congress mandated that each Federal agency with delegated authority under Title I of the DPA develop final rules that establish standards and procedures for implementing its delegated authority in emergency and nonemergency conditons. Additionally, Congress mandated that, to the extent practicable, the rules be consistent and unified. DOT is part of an interagency working group, along with the other delegated agencies, that is developing consistent unified rules.

Abstract: This rulemaking would amend 14 CFR Part 382 (Part 382) by including Subpart I (14 CFR 382.121-382.133) in the list of subparts with which a U.S. carrier must comply with respect to passengers traveling under its code on flights operated by a foreign carrier between two foreign points. This rulemaking would also amend Part 382 to eliminate the labeling requirements for FAA approved portable oxygen concentrators and specify that ventilators, respirators and Continuous Positive Airway Pressure (CPAP) machines must be allowed for use in the passenger cabin as long as they comply with applicable safety, security, and hazardous materials rules. In addition, this rule would amend the provision in Part 382 that allows carriers to require a passenger who wishes to use an FAA-approved portable oxygen concentrator in the aircraft cabin to provide a medical certificate dated within 10 days of the passenger's initial flight.

Pipeline and Hazardous Materials Safety Administration

78.	Pipeline Safety: Completing regulation of hazardous liquid pipelines operating at low stress	Green
-----	---	-------

Popular Title: Low stress liquid pipelines

RIN 2137-AE36

Stage: Final Rule

Previous Stage: NPRM: Publication Date 6/22/2010 ;End of Comment Period 8/23/2010.

Abstract: This rulemaking would amend pipeline safety regulations to apply safety regulation to rural low-stress hazardous liquid pipelines that are not covered by safety regulations in 49 CFR Part 195. This change complies with a mandate in the Pipeline Inspection, Protection, Enforcement, and Safety Act of 2006 (PIPES Act). Until 2008, unless a rural low stress pipeline crossed a commercially navigable waterway, a hazardous liquid pipeline operating at low-stress in a rural area was not regulated under Federal pipeline safety regulations in 49 CFR Part 195. Section four of the Pipeline Inspection, Protection, Enforcement, and Safety Act of 2006 (PIPES Act), requires PHMSA to "issue regulations subjecting low-stress hazardous liquid pipelines to the same standards and regulations as other hazardous liquid pipelines." The Act also provides that the new regulations could be issued in phases. PHMSA decided to implement the PIPES Act mandate in phases, in part because PHMSA did not have complete data on the extent of rural low stress pipelines that would be covered by the statutory mandate. Phase one, published in a final rule on June 3, 2008, applied full Part 195 regulation to the higher-risk, larger-diameter, rural low-stress pipelines, i.e., those low-stress pipelines with a diameter of 8 5/8-inches or greater located in or within one-half mile of an unusually sensitive area (USA). These are the rural low stress pipelines that have more potential to cause harm to unusually sensitive areas. In phase two (this rulemaking), we are applying Part 195 safety requirements to all rural low-stress pipelines not included in the phase one rule. Thus, the pipelines addressed by this rulemaking are those rural low-stress pipelines of any diameter located more than one-half mile from a USA and those less than 8 5/8 inches in diameter located within one-half mile of a USA. This rulemaking was recently upgraded to "significant."

79. **Hazardous Materials: Bulk Loading and Unloading Operations** Red

Popular Title: Loading/Unloading

RIN 2137-AE37

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would request information from industry that would consider whether additional requirements governing bulk loading and unloading operations are necessary. PHMSA has reviewed transportation incident data and findings of several National Transportation Safety Board and Chemical Safety Board accident investigations involving bulk hazardous materials loading and unloading operations, which suggest there may be opportunities to enhance the safety of such operations. In particular, PHMSA is examining what, if any, safety benefits would accrue from a requirement for persons conducting bulk loading and unloading operations to develop and implement operating procedures governing these operations. PHMSA has decided to publish a proposed rule instead of a pre-rule.
