| 1. Qualification, Service, and Use of Crewmembers and Aircraft Dispatchers | Red |
|---|-----|

Popular Title: Part 121, Subparts N and O

RIN 2120-AJ00

Stage: SNPRM

Previous Stage: NPRM: Publication Date 01/12/2009;End of Comment Period 05/12/2009;Extension of Comment Period 04/20/2009;End of Extended of Comment Period 08/10/2009.

Abstract: This rulemaking would amend the regulations for crewmember and dispatcher training programs in domestic, flag, and supplemental operations. The rulemaking would enhance traditional training programs by requiring the use of flight simulation training devices for flight crewmembers and including additional training requirements in areas that

are critical to safety. The rulemaking would also reorganize and revise the qualification and training requirements. The changes are intended to contribute significantly to reducing aviation accidents.

2.	Certification of Turbofan Powered Airplanes and Miscellaneous Amendments	Red
----	---	-----

Popular Title: Turbofan Powered Airplanes

RIN 2120-AJ22

Stage: Final Rule

Previous Stage: NPRM: Publication Date 8/17/2009; End of Comment Period 11/16/2009; Extension of Comment Period 11/16/2009; End of Extended Comment Period 12/16/2009.

Abstract: This rulemaking would address certification and operational issues surrounding the introduction of turbofan powered airplanes. This action is necessary to standardize certification requirements and consolidate these requirements into one location. The intent is to ensure the same standards apply to all light aircraft.

3. **Supercooled Large Droplet Icing Conditions** Yellow

Popular Title: Supercooled Large Droplet Icing Conditions

RIN 2120-AJ34

Stage: Final Rule

Previous Stage: NPRM: Publication Date 6/29/2010; End of Comment Period 08/30/2010; Publication of Extended Comment Period 08/16/2010; End of Extended Comment Period 9/29/2010.

Abstract: This rulemaking would amend the airworthiness standards applicable to certain transport category airplanes certificated for flight in icing conditions and the icing airworthiness standards applicable to certain aircraft engines. The rulemaking would improve safety by addressing supercooled large drop icing conditions for transport category airplanes most affected by supercooled large drop icing conditions, mixed phase and ice crystal conditions for all transport category airplanes, and supercooled large drop, mixed phase, and ice crystal icing conditions for all turbine engines. This rulemaking is the result of information gathered from a review of icing accidents and incidents.

4. **Airport Safety Management System**

Red

Popular Title: Airport SMS

RIN 2120-AJ38

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would require airport operators to institute a safety management system at their airports. This action is necessary to improve safety through conformance with best practices in risk management and promote international harmonization with ICAO standards. The rule is intended to facilitate integration of formal risk management processes within the airport's day-to-day operations.

Green

Popular Title: Photo Requirements

RIN 2120-AJ42

Stage: Final Rule

Previous Stage: NPRM: Publication Date 11/19/2010; End of Comment Period 02/17/2011

Abstract: This rulemaking would require digital photos on all pilot certificates. This action is necessary to update regulations about pilot plastic certificates. The intended effect of this action is to meet all requirements of the Intelligence Reform and Terrorism Prevention Act.

|----|--|-----|
| 6. | Air Ambulance and Commercial Helicopter Operations; Safety Initiatives and Miscellaneous Amendments | Red |
|----|--|-----|

Popular Title: Helicopter Safety Initiatives and Misc Amendments

RIN 2120-AJ53

Stage: Final Rule

Previous Stage: NPRM: Publication Date 10/12/2010; End of Comment Period 01/01/2011.

Abstract: This rulemaking would change equipment and operating requirements for commercial helicopter operations, including many specifically for helicopter air ambulance operations. This rulemaking is necessary to increase crew, passenger, and patient safety. The intended effect is to implement National Transportation Safety Board, Aviation Rulemaking Committee, and internal FAA recommendations.

Effects:

Regulatory Flexibility Act

Prompting action: Secretarial/Head of Operating Administration Decision

| 7. | Flight and Duty Time Limitations and Rest Requirements | Red |
|----|---|-----|

Popular Title: Flight/Duty/Rest Requirements

RIN 2120-AJ58**Stage:** Final Rule**Previous Stage:** NPRM: Publication Date 09/14/2010;End of Comment Period 11/15/2010.

Abstract: This rulemaking would amend existing flight, duty, and rest regulations applicable to certificate holders and their flightcrew members operating under 14 CFR part 121. The new requirements would eliminate the current distinctions between domestic, flag, and supplemental operations. Also, the rulemaking would provide different requirements based on the time of day, whether an individual is acclimated to a new time zone, and the likelihood of being able to sleep under different circumstances. This rulemaking is necessary to improve aviation safety by providing applicable persons with the opportunity for sufficient rest.

Effects:

Economically Significant

Federal Aviation Administration

8. **Operation and Certification of Small Unmanned Aircraft Systems (sUAS)** Red**Popular Title:** Small Unmanned Aircraft**RIN 2120-AJ60****Stage:** NPRM**Previous Stage:**None

Abstract: This rulemaking would enable small unmanned aircraft to safely operate in limited portions of the national airspace system (NAS). This action is necessary because it addresses the novel legal or policy issues about the minimum safety parameters for operating recreational remote control model and toy aircraft in the NAS. The intended effect of this action is to develop requirements and standards to ensure that risks are adequately mitigated, such that safety is maintained for the entire aviation community.

Federal Register Citation for NPRM: None

Federal Aviation Administration

9. **Repair Stations** Red

Popular Title: Repair Stations

RIN 2120-AJ61

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would update and revise the regulations for repair stations. The action is necessary because many portions of the current regulations do not reflect current repair station business practices, aircraft maintenance practices, or advances in aircraft technology.

10. **Pilot Certification and Qualification Requirements (formerly First Officer Qualification Requirements) (HR 5900)** Red

Popular Title: Pilot Certification and Qualification Requirements

RIN 2120-AJ67

Stage: NPRM

Previous Stage: ANPRM: Publication Date 02/08/2010; End of Comment Period 04/09/2010

Abstract: This rulemaking would amend the eligibility and qualification requirements for pilots engaged in part 121 air carrier operations. Additionally, it would modify the requirements for an airline transport pilot certificate. These actions are necessary because recent airline accidents and incidents have brought considerable attention to the experience level and training of air carrier flight crews.

| 11. | Prohibition Against Certain Flights Within the Territory and Airspace of Afghanistan | Red |
|-----|---|-----|

Popular Title: Afghanistan SFAR

RIN 2120-AJ69

Stage: Final Rule

Previous Stage: NPRM: Publication Date 05/26/2010;End of Comment Period 06/10/2010.

Abstract: This rulemaking would prohibit flight operations below flight level (FL) 160 within the territory and airspace of Afghanistan by all: U.S. air carriers; U.S. commercial operators; persons exercising the privileges of a U.S. airman certificate, except if the flight is on behalf of a foreign air carrier; and operators of U.S.-registered aircraft, except when such operators are foreign air carriers. The FAA finds this action necessary to prevent a potential hazard to persons and aircraft in engaged in such flight operations.

12. **Requirement for Wildlife Assessments at Certificated Airports** Red

Popular Title: Wildlife Hazard Assessment (WHA)

RIN 2120-AJ71

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would require a Wildlife Hazard Assessment (scientific evaluation of wildlife populations and their attractants) for certificated airports. This rulemaking would also require periodic completion of a wildlife hazard assessment, or continuous wildlife monitoring as an alternative to the assessment, and clarify requirements for those conducting an assessment. This rulemaking is intended to decrease direct hazards (animals striking aircraft) and indirect hazards (animal burrowing and nesting in or near aircraft or aircraft operations areas).

14. **Air Carrier Maintenance Training Program** Red

Popular Title: Air Carrier Maintenance Training

RIN 2120-AJ79

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would require FAA approval of maintenance training programs of air carriers that operate aircraft type certificated for a passenger seating configuration of 10 seats or more (excluding any pilot seat). The intent of this rulemaking is to reduce the number of accidents and incidents caused by human error, improper maintenance, inspection, or repair practices.

15. **Safety Management Systems for Part 121 Certificate Holders** Green

Popular Title: SMS for Part 121

RIN 2120-AJ86

Stage: Final Rule

Previous Stage: NPRM: Publication Date 11/05/2010; End of Comment Period 02/03/2011; Extended Comment Period 01/31/2011; End of Extended Comment Period 03/07/2011.

Abstract: This rulemaking would require each certificate holder operating under 14 CFR part 121 to develop and implement a safety management system (SMS) to improve the safety of its aviation related activities. A safety management system is a comprehensive, process-oriented approach to managing safety throughout an organization. An SMS includes an organization-wide safety policy; formal methods for identifying hazards, controlling, and continually assessing risk and safety performance; and promotion of a safety culture. SMS stresses not only compliance with technical standards but increased emphasis on the overall safety performance of the organization.

16. **Flight Crewmember Mentoring, Leadership and Professional Development (HR 5900)** Red

Popular Title: Flight Crewmember Mentoring

RIN 2120-AJ87

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would amend the regulations for air carrier training programs under part 121. The action is necessary to ensure that air carriers establish or modify training programs that address mentoring, leadership, and professional development of flight crewmembers in part 121 operations. The amendments are intended to contribute significantly to airline safety by reducing aviation accidents.

|-----|---|-----|
| 17. | New York Congestion Management Rule for LaGuardia Airport, John F. Kennedy International Airport, and Newark Liberty International Airport | Red |
|-----|---|-----|

Popular Title: NY Congestion Management

RIN 2120-AJ89

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would replace the current temporary orders limiting scheduled operations at LaGuardia Airport, John F. Kennedy International Airport, and Newark Liberty International Airport with a more permanent rule to address the issues of congestion and delay at the New York area's three major commercial airports, while also promoting fair access and competition. The rulemaking would help ensure that congestion and delays are managed by limiting scheduled and unscheduled operations. The rulemaking would also establish a secondary market for U.S. and foreign air carriers to buy, sell, trade, and lease slots amongst each other at each of the three airports. This would allow carriers serving or seeking to serve the New York area airports to exchange slots as their business models and strategic goals require.

19. **Part 121 Exiting Icing** Red

Popular Title: Part 121 Exiting Icing

RIN 2120-AJ95

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would establish the standards for when flightcrews need to take action to exit icing conditions. If adopted, this rulemaking would apply to aircraft with a maximum takeoff weight of less than 60,000 pounds. This rulemaking is based on recommendations from an Aviation Rulemaking Advisory Committee working group after reviewing certain accidents and incidents. The intended affect of this action is to avoid similar accidents and incidents in the future. This rulemaking replaces RIN 2120-AJ74, for which an NPRM had originally been scheduled for 11/02/2011. This rulemaking has expanded the scope of RIN 2120-AJ74 to include requirements for design approval holders.

22. **Manual for Assessing Safety Hardware** Black

Popular Title: Safety Hardware IBR

RIN 2125-AF39

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would amend 23 CFR Part 625 to incorporate by reference the AASHTO Manual for Assessing Safety Hardware. The FHWA, as a service to the highway industry, periodically reviews crash test reports of roadside safety devices in order to acknowledge that the testing meets current crash testing criteria, and that the device is acceptable for use on the National Highway System. The AASHTO Manual for Assessing Safety Hardware is being incorporated by reference to update existing standards used by U.S. crash test laboratories. The FHWA has decided to withdraw this rulemaking. The FHWA has determined that incorporating this material by reference is not necessary to the operation of this program.

Stage: SNPRM

Previous Stage: ANPRM 08/26/96, End of C/P 10/26/96. NPRM 05/19/05, End of C/P 08/17/05.

Abstract: This rulemaking would replace three current identification and registration systems: the US DOT number identification system, the commercial registration system, and the financial responsibility system, with an online Federal unified registration system (URS). This program would serve as a clearinghouse and depository of information on, and identification of, brokers, freight forwarders, and others required to register with the Department of Transportation. The Agency is revising this rulemaking to address amendments directed by Safe, Accountable, Flexible, Efficient, Transportation Equity Act: A Legacy for Users (SAFETEA-LU). The replacement system for the Single State Registration System, which the ICC Termination Act originally directed be merged under URS, was addressed separately in RIN 2126-AB09. The cargo insurance portion of this rulemaking has been split off into RIN 2126-AB21.

26.	Application by Certain Mexico-Domiciled Motor Carriers to Operate Beyond U.S. Municipalities and Commercial Zones on the U.S.-Mexico Border	Red
-----	--	-----

Popular Title: Mexico-Domiciled Motor Carriers

RIN 2126-AA34

Stage: Undetermined

Previous Stage: IFR 03/19/02

Abstract: This rulemaking would change FMCSA regulations to govern applications by Mexican carriers to operate beyond municipalities and commercial zones at the United State-Mexico border. It would also revise the application form, OP-1MX, to be filed by these Mexican motor carriers. The revised form would require additional information about the

applicant's business and operating practices to allow the FMCSA to determine if the applicant can meet the safety standards established for operating in interstate commerce in the United States. Carriers that had previously submitted an application would have to submit the updated form. These changes are needed to implement part of the North American Free Trade Agreement (NAFTA). On January 16, 2003, the Ninth Circuit Court remanded this rule, along with two other NAFTA-related rules, to the agency, requiring a full environmental impact statement and an analysis required by the Clean Air Act. On June 7, 2004, the Supreme Court reversed the Ninth Circuit and remanded the case, holding that FMCSA is not required to prepare the environmental documents as ruled by the Ninth Circuit. FMCSA originally planned to publish a final rule by November 20, 2003. FMCSA will determine the next steps to be taken after the pilot program on the long haul trucking provisions of NAFTA is completed.

27.	Safety Monitoring System and Compliance Initiative for Mexico-Domiciled Motor Carriers Operating in the United States	Red
-----	--	-----

Popular Title: Safety Monitoring

RIN 2126-AA35

Stage: Undetermined

Previous Stage: IFR 03/19/02

Abstract: This rule would implement a safety monitoring system and compliance initiative designed to evaluate the continuing safety fitness of all Mexico-domiciled carriers within 18 months after receiving a provisional Certificate of Registration or provisional authority to operate in the United States. It also would establish suspension and revocation procedures for provisional Certificates of Registration and operating authority, and incorporate criteria to be used by FMCSA in evaluating whether Mexico-domiciled carriers exercise basic safety management controls. The interim rule included requirements that were not proposed in the NPRM but which are necessary to comply with the FY-2002 DOT Appropriations Act. On January 16, 2003, the Ninth Circuit Court of Appeals remanded this rule, along with two other NAFTA-related rules, to the agency, requiring a full environmental impact statement and an analysis required by the Clean Air Act. On June 7, 2004, the Supreme Court reversed

the Ninth Circuit and remanded the case, holding that FMCSA is not required to prepare the environmental documents. FMCSA originally planned to publish a final rule by November 28, 2003. FMCSA will determine the next steps to be taken after the pilot program on the long haul trucking provisions of NAFTA is completed.

29.	Limitations on the Issuance of Commercial Driver Licenses with a Hazardous Materials Endorsement	Black
-----	---	-------

Popular Title: USA PATRIOT Act Rule

RIN 2126-AA70

Stage: Undetermined

Previous Stage: IFR: Publication Date 04/29/2005.

Abstract: This rulemaking would prohibit States from issuing, renewing, transferring or upgrading a commercial driver's license (CDL) with a hazardous materials endorsement, unless the Transportation Security Administration (TSA) has first conducted a background check on the applicant and determined the applicant does not pose a security risk warranting denial of the hazardous materials endorsement. FMCSA and TSA simultaneously published interim final rules. FMCSA has published another IFR corresponding to TSA's extension of compliance date. Since this rulemaking conforms to TSA's rulemaking, the rulemaking is dependent upon TSA action. This action is considered significant because of substantial public and congressional interest, and national security.

Federal Motor Carrier Safety Administration

34. **Carrier Safety Fitness Determination** Red

Popular Title: Carrier Safety Fitness Determination

RIN 2126-AB11

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would revise 49 CFR Part 385, Safety Fitness Procedures, in accordance with the Agency's major new initiative, Comprehensive Safety Analysis

(CSA). CSA is a new operational model FMCSA plans to implement that is designed to help the Agency carry out its compliance and enforcement programs more efficiently and effectively. Currently, the safety fitness rating of a motor carrier is determined based on the results of a very labor intensive compliance review conducted at the carrier's place of business. Aside from roadside inspections and new audits, the compliance review is the Agency's primary intervention. Under CSA, FMCSA would propose to implement a broader array of progressive interventions, some of which allow FMCSA to make contact with more carriers. Through this rulemaking FMCSA would establish safety fitness determinations based on safety data from crashes, inspections, and violation history rather than just the standard compliance review. This will enable the Agency to assess the safety performance of a greater segment of the motor carrier industry with the goal of further reducing large truck and bus crashes and fatalities.

35.	New Entrant Safety Assurance Process: Implementation of Section 210(b) of the Motor Carrier Safety Improvement Act of 1999	Black
-----	---	-------

Popular Title: MCSIA 210(b)

RIN 2126-AB17

Stage: Undetermined

Previous Stage: ANPRM: Publication Date 08/25/2009;End of Comment Period 10/26/2009.

Abstract: This rulemaking would consider methods for ensuring a new applicant carrier is knowledgeable about the applicable safety requirements before being granted New Entrant authority. The agency is considering whether to implement a proficiency examination as part of its revised New Entrant Safety Assurance Process as well as other alternatives. This rulemaking responds to issues raised in a petition from Advocates for Highway and Auto Safety regarding new entrant applicant knowledge.

36. **Commercial Driver's License Drug and Alcohol Clearinghouse** Red**Popular Title:** CDL Drug and Alcohol Database**RIN 2126-AB18****Stage:** NPRM**Previous Stage:** None

Abstract: This rulemaking would create a central database for verified positive controlled substances and alcohol test results for commercial driver's license (CDL) holders and refusals by such drivers to submit to testing. This rulemaking would require employers of CDL holders and service agents to report positive test results and refusals to test into the database. Prospective employers, acting on an application for a CDL driver position with the applicant's written consent to access the database, would query the database to determine if any specific information about the driver applicant is in the database before allowing the applicant to be hired and to drive CMVs. This rulemaking is intended to increase highway safety by ensuring CDL holders, who have tested positive or have refused to submit to testing, have completed the U.S. DOT's return-to-duty process before driving CMVs in interstate or intrastate commerce. It is also intended to ensure that employers are meeting their drug and alcohol testing responsibilities.

37.	Electronic On-Board Recorders and Hours of Service Supporting Documents	Red
-----	--	-----

Popular Title: EOBR and HOS supporting documents

RIN 2126-AB20

Stage: Undetermined

Previous Stage: NPRM: Publication Date 02/01/11; End of Comment Period 04/04/2011, NPRM: Extension of Comment Period 04/13/2011; End of Extended Comment Period 05/23/11.

Abstract: This rulemaking will consider revisions to RIN 2126-AA89 (Electronic On-Board Recorders for Hours of Service Drivers) to expand the number of motor carriers required to install and operate Electronic On-Board Recorders (EOBRs). FMCSA is consolidating this follow-up to the EOBR rule with the Hours Of Service Of Drivers: Supporting Documents rulemaking for development of a single NPRM in RIN 2126-AB20. In addressing Hours of Service Supporting Documents requirements in this new rulemaking, FMCSA will consider reducing or eliminating current paperwork burdens associated with supporting documents in favor of expanded EOBR use. On January 15, 2010, the American Trucking Associations (ATA) filed a Petition for a Writ of Mandamus in the United States Court of Appeals for the District of Columbia Circuit (D.C. Cir. No. 10-1009). ATA petitioned the court to direct FMCSA to issue an NPRM on supporting documents in conformance with the requirements set forth in section 113 of the HMTAA within 60 days after the issuance of the writ and a final rule no later than 6 months after the issuance of the NPRM. The court granted the petition for writ of mandamus on September 30, 2010, ordering FMCSA to issue an NPRM on the supporting document regulations by December 30, 2010. At the request of the agency, the DC Circuit extended the deadline to January 31, 2011. On April 5, 2010, FMCSA issued a final rule (RIN 2126-AA89) that required the use of EOBRs by motor carriers with significant hours-of-service violations (75 FR 17208). A petition for judicial review was filed with the Seventh Circuit. On August 26, 2011, the Court vacated the final rule, which removed the technical specifications relied on in this rulemaking. The Agency is currently evaluating alternatives in continuing this rulemaking, and at this time is uncertain of the rule's schedule.

41. **Medical Examiner's Certification Integration** Green

Popular Title: Medical Examiner's Certification Integration

RIN 2126-AB40

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would build upon the National Registry (2126-AA97) and Medical Certification (2126-AA10) final rules. This rulemaking would (1) provide for the medical examiner to transmit data from the medical examiner's certificate through FMCSA to the State Driver Licensing Agencies (SDLAs) for Commercial Driver's License (CDL) holders and (2) require increased frequency of medical examiner reporting of medical examiner's certificate data to the National Registry database. This should streamline the process for SDLAs to verify the physical qualifications of CDL holders.

42.	Lease and Interchange of Vehicles; Commercial Motor Vehicles Designed to Transport Passengers	Black
-----	--	-------

Popular Title: Bus Leasing

RIN 2126-AB44

Stage: NPRM

Previous Stage:None

Abstract: FMCSA proposes to amend the Federal Motor Carrier Commercial Regulations (FMCCRs) to amend the lease and interchange of vehicle regulations in 49 CFR Part 376 to add busses and passenger coaches. FMCSA has been discovering in its passenger bus crash investigations and roadside inspections a need for better documentation of bus equipment lease and interchange agreements. The National Transportation Safety Board (NTSB) has also recommended FMCSA require documentation of bus motor vehicle leases and interchanges based on a crash investigation in 2008 near Victoria, Texas. The preliminary scope of the proposal would be to determine two things. First, whether any or all of the present practices of motor carriers of passengers, with respect to the performance of transportation by the use of vehicles owned by others, the interchange of vehicles, and the leasing of vehicles to private motor carriers and shippers, should be discontinued because they are contrary to the public interest; and, if any or all of the present practices should be continued. Second, whether the motor carriers' practices should be governed by regulations similar to those currently in 49 CFR Part 376 applicable presently only to motor carriers of property. The intended effect of this action is to require lessee-motor carriers of passengers assume complete responsibility for the operation of the bus equipment for the duration of the lease and document full operational control by the lessee-motor carriers of passengers over all drivers, bus vehicles, and trip operations being conducted under its USDOT registration.

Popular Title: Roadway Worker Protection; Adjacent-Track On-Track

RIN 2130-AB96

Stage: Final Rule

Previous Stage: NPRM: Publication Date 11/25/2009; End of Comment Period 1/25/2010.

Abstract: This rulemaking would simplify the determination regarding whether or not adjacent track protection is required for roadway work groups engaged in large-scale maintenance or construction, pursuant to 49 CFR Part 214. The recent increase in roadway worker fatalities that have occurred on adjacent track has caused some concern at FRA and throughout the industry, even prompting the filing of a petition for emergency order. FRA issued a notice of safety advisory to address the issue in May of 2004; however, it appears that the effects were not long-lasting. This rulemaking is based on the consensus language developed through the Roadway Worker Protection (RWP) Working Group of FRA's Railroad Safety Advisory Committee (RSAC).

RIN 2130-AC09

Stage: Final Rule

Previous Stage: NPRM: Publication Date 5/10/2010; End of Comment Period 7/9/2010.

Abstract: This rulemaking would amend the Track Safety Standards and Passenger Equipment Safety Standards for high-speed train operations and train operations at high cant deficiencies to promote the safe interaction of rail vehicles with the track over which they operate. It would revise both the safety limits for these operations and the process to qualify them. It accounts for a range of vehicle types that are currently used and may likely be used on future high-speed or high cant deficiency rail operations, and would provide safety assurance for train operations in all classes of track. It is based on the results of simulation studies designed to identify track geometry irregularities associated with unsafe wheel forces and acceleration, thorough reviews of vehicle qualification and revenue service test data, and consideration of international practices.

51.	High-Speed Intercity Passenger Rail (HSIPR) Program; Buy America Program Requirements	Black
-----	--	-------

Popular Title: Buy America Program Requirements

RIN 2130-AC23

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would establish regulations for FRA's Buy America requirements as part of the High-Speed Intercity Passenger Rail (HSIPR) program. The Passenger Rail Investment and Improvement Act of 2008 (PRIIA) (Division B of Pub. L. 110-432) authorized the appropriation of funds to establish several new passenger rail grant programs, including capital investment grants to support intercity passenger rail service (Â§301), high-speed corridor development (Â§501), and congestion grants (Â§302). FRA has consolidated these and other closely related programs into the HSIPR program, as detailed in FRA's High-Speed Intercity Passenger Rail (HSIPR) Interim Guidance (74 Fed. Reg. 29900 (June 23, 2009)) and FY 2010 Interim Guidance (75 Fed. Reg. 38344 and 38365 (July 1, 2010)). Spending authorized under PRIIA is subject to the Buy America provision of 49 U.S.C. Â§ 24405(a). This rulemaking would provide standards to govern FRA's application of the Buy America provision of 49 U.S.C. Â§ 24405(a) to all PRIIA-authorized spending as part of the HSIPR program.

52.	Amendments Expanding the Drug Panel for FRA Post-Accident Toxicological Testing	Green
-----	--	-------

Popular Title: Drug Panel Post-Accident Toxicological Testing

RIN 2130-AC24

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would expand the drug testing panel for FRA's post-accident toxicological testing (PATT) program, which investigates the role of alcohol and drug use in serious train accidents. This rulemaking would also amend the requirements regarding the analysis of PATT results in 49 C.F.R. Â§ 219.211 to reflect that some of the drugs in the expanded panel are prescription and over-the-counter drugs that are not controlled substances. FRA has tested for the same basic panel of drugs since the beginning of PATT in 1985. Currently, FRA tests blood and urine specimens for eight drug classifications: alcohol, marijuana, cocaine, the opiates, the amphetamines, phencyclidine (PCP), the barbiturates, and the benzodiazepines. FRA would expand the PATT panel to include synthetic opiates, sedating antihistamines, MDMA and one of its analogues, and additional benzodiazepines. This rulemaking does not make any substantive changes to the prohibitions on the abuse of controlled substances and prescription drugs found in 49 C.F.R. Â§Â§ 219.102 and 219.103. This action was downgraded to non-significant by OMB and will not appear on next month Internet Report.

53.	Medical Standards for Certified Locomotive Engineers and Conductors	Green
-----	--	-------

Popular Title: Medical Standards for Engineers and Conductors

RIN 2130-AC25

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would create a medical standards program for certified locomotive engineers and conductors to reduce the risk of railroad accidents due to medical conditions that pose a risk of sudden incapacitation. The rulemaking would revise the

existing hearing and vision requirements for locomotive engineers in 49 CFR part 240 and apply these requirements to train conductors in 49 CFR part 242 (See Sec. 402 of the Rail Safety Improvement Act of 2008). It would also contain medical standards for the assessment of certain conditions that pose a risk of sudden incapacitation (specifically, stroke, syncope, seizures, cardiovascular disease, insulin-dependent diabetes, and obstructive sleep apnea). These standards, which are being developed by a physicians task force, would be applied by railroad physicians in required triennial and discretionary interim medical assessments of engineers and conductors.

55. **Railroad System Safety Program** Green

Popular Title: Railroad System Safety Program

RIN 2130-AC31

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would improve passenger railroad safety through structured, proactive processes and procedures developed by passenger railroad operators. It would require passenger railroads to establish a System Safety Program that would systematically evaluate and manage risks in order to reduce the number and rates of railroad accidents, incidents, injuries and fatalities. This rulemaking was bifurcated from 2130-AC11.

60. **Environmental Impact and Related Procedures** Black

Popular Title: Environmental Impact

RIN 2132-AB03

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would establish a number of categorical exclusions (CE) from the requirement that an environmental assessment or an environmental impact statement be prepared under section 102 of the National Environmental Policy Act of 1969 (NEPA) for FTA-funded actions. The CEs were developed after an extensive effort, in line with Council on Environmental Quality guidance, to identify activities that FTA believes do not have a significant effect on the environment. The list of CEs includes some overlap with existing CEs, but would provide a tool that would expedite the delivery of transit projects without compromising environmental quality. The rulemaking would also make targeted revisions to the joint FTA-FHWA NEPA regulation that would only apply to FTA and would serve to support FTA's focus on streamlining its own unique environmental process. These revisions would include: (1) updating the NEPA regulation to provide for electronic means of disseminating information relevant to the NEPA process, (2) removing from the list of projects that normally require an environmental impact statement any fixed guideway transit facility that will be constructed within the existing right-of-way, (3) clarifying timing of the scoping process and procurement of a contractor for preparation of an environmental document, and (4) removing an unnecessary regulatory provision that applied only to New Starts projects.

-----	--	-----

Popular Title: Cargo Preference

RIN 2133-AB74

Stage: NPRM

Previous Stage: ANPRM: Publication Date 01/28/99; End of Comment Period 03/29/99; Withdrawn 02/14/05

Abstract: This rulemaking would revise and clarify the Cargo Preference rules that have not been revised substantially since 1971. Revisions would include an updated purpose and definitions section along with the removal of obsolete provisions. This rulemaking would establish Part 383 of the Cargo Preference regulations. This rulemaking would cover P.L. 110-417, Section 3511, National Defense Authorization Act for FY2009 changes to the cargo preference rules, which have not been substantially revised since 1971. The rulemaking also would include compromise, assessment, mitigation, settlement, and collection of civil penalties. Originally the agency had two separate rulemakings in process under RIN 2133-AB74 and 2133-AB75. RIN 2133-AB74 would have revised existing regulations and RIN 2133-AB75 would have established a new part 383: Guidance and Civil Penalties and implement P.L. 110-417, Section 3511, National Defense Authorization Act for FY 2009. MARAD has decided it would be more efficient to merge both efforts under one; RIN 2133-AB75 has been merged with this action.

National Highway Traffic Safety Administration

62. **FMVSS No. 124, Accelerator Control Systems Upgrade** Red

Popular Title: Accelerator Control Systems - Brake Override

RIN 2127-AK18

Stage: NPRM

Previous Stage:None

Abstract: The agency is considering several revisions to FMVSS No. 124. First, we are considering revisions to the test procedures for vehicles with electronically controlled throttles as well as electric vehicles and hybrid vehicles. These test procedures are the product of several workshops and public meetings. We anticipate that all vehicles would be able to meet them because it would not involve changes to the existing basic requirements of the standard. Second, we are considering adding a new requirement for a brake-throttle override system on light vehicles. Under certain conditions, this would require that the braking system override the throttle control in the event of a conflict. All vehicle manufacturers are in the process of equipping all of their U.S. vehicles with such technology, if they have not done so already. We anticipate that this new requirement would accommodate the current and planned override technologies. This action was downgraded to non-significant by OMB and will not appear on next month Internet Report.

Abstract: This rulemaking would amend Federal Motor Vehicle Standard No. 111; Rearview Mirrors, to reflect requirements contained in the Cameron Gulbransen Kids Transportation Safety Act of 2007. The Act requires that NHTSA expand the required field of view to enable the driver of a motor vehicle to detect areas behind the motor vehicle to reduce death and injury resulting from backing incidents, particularly incidents involving small children and disabled persons. According to the Act, such a standard may be met by the provision of additional mirrors, sensors, cameras, or other technology to expand the driver's field of view.

Popular Title: Seat Belts on Motorcoaches

RIN 2127-AK56**Stage:** Final Rule**Previous Stage:** NPRM: Publication Date 08/18/2010; End Of Comment Period 10/1/2010.

Abstract: This rulemaking would require the installation of lap/shoulder belts in newly-manufactured motorcoaches. Specifically, this rulemaking would establish a new definition for motorcoaches in 49 CFR Part 571.3. It would also amend Federal Motor Vehicle Safety Standard No. 208, "Occupant" Crash Protection, to require the installation of lap/shoulder belts at all driver and passenger seating positions. It would also require the installation of lap/shoulder belts at driver seating positions of large school buses in FMVSS No. 208. This rulemaking responds, in part, to recommendations made by the National Transportation Safety Board for improving bus safety.

65.	Alternative Fuel Vehicle Badging and Fuel Compartment Labels on Alternative Fuel Usage	Red
-----	---	-----

Popular Title: Alternative Fuel Usage Labeling & Badging**RIN 2127-AK75****Stage:** Undetermined**Previous Stage:**None

Abstract: This rulemaking would respond to requirements of the Energy Independence and Security Act of 2007 (EISA), Title 1, Subtitle A, Section 105, as it amends 49 USC Â§ 32908, to implement Consumer Information and Consumer Education programs related to fuel economy, GHG, other emissions, and alternative fuels. EISA directs the Secretary of Transportation to label vehicles with a permanent and prominent display that an automobile is capable of operating on alternative fuels, and to include in the owner's manual for vehicles capable of operating on alternative fuels information that describes that capability and the benefits of using alternative fuels, including the renewable nature and environmental benefits of using alternative fuels. Additionally, EISA requires a label to be attached to the

fuel compartment of vehicles capable of operating on alternative fuels, with the form of alternative fuel stated on the label. EISA, signed into Law on December 19, 2007, requires that the Secretary issue a final rule not later than 42 months after the date of the enactment.

67.	Passenger Car and Light Truck Corporate Average Fuel Economy Standards MYs 2017 and Beyond	Red
-----	---	-----

Popular Title: CAFE 2017 and Beyond

RIN 2127-AK79

Stage: NPRM

Previous Stage: Notice of Intent: 10/13/2010. Supplemental Notice of Intent: Publication Date 12/08/2010. Supplemental Notice of Intent: Signed by DOT Secretary and EPA Administrator 7/29/2011.

Abstract: This rulemaking would establish Corporate Average Fuel Economy (CAFE) standards for light trucks and passenger cars for model years 2017 and beyond. This rulemaking would respond to requirements of the Energy Policy and Conservation Act, as amended by the Energy Independence and Security Act of 2007. The statute requires that CAFE standards be prescribed separately for passenger automobiles and non-passenger automobiles to achieve a combined fleet fuel economy of at least 35 mpg by model year 2020. For model years 2021 and beyond, the statute requires that the average fuel economy required to be attained by each fleet of passenger and non-passenger automobiles be the maximum feasible for each model year. The law requires the standards be set at least 18 months prior to the start of the model year. On May 21, 2010, President Obama issued a memorandum directing NHTSA and EPA to conduct a joint rulemaking (NHTSA regulating fuel economy and EPA regulating greenhouse gas emissions), and to issue a Notice of Intent to Issue a Proposed Rule (NOI) by September 30, 2010.

68. **Mandatory Part 563 Event Data Recorder Requirements** Yellow

Popular Title: Mandatory EDR Requirements

RIN 2127-AK86

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would establish a new Federal motor vehicle safety standard to mandate the installation of Event Data Recorders (EDR) in light vehicles. The standard would incorporate the current 49 CFR Part 563, which established the current reporting requirement of voluntarily installed EDRs in light vehicles. Part 563 presently requires vehicle manufacturers who are voluntarily installing EDRs to be in compliance with the regulation by September 1, 2012. This rulemaking would not affect the 2012 compliance date for voluntarily-installed EDRs. Furthermore, this rulemaking would not modify any of the Part 563 data elements, data capture and format requirements, data retrieval specifications, or data survivability and crash test requirements. Moreover, this rulemaking to mandate EDRs across the entire light vehicle fleet could contribute to advancements in vehicle designs, and advanced restraint and other safety countermeasures. The estimated total incremental costs associated with this rulemaking would be \$24.4 million (2009 dollars), which is measured from a baseline of 91.6 percent EDR installation to 100 percent installation, assuming the sale of 15.5 million light vehicles per year.

Popular Title: Light Vehicle Upgrade of EDR Requirements

RIN 2127-AK87**Stage:** Undetermined**Previous Stage:**None

Abstract: This rulemaking would expand the utility of the amount and type of data Event Data Recorders (EDRs) capture in light vehicles in the event of a crash. The rulemaking would consider requiring some of the optional data elements specified in 49 CFR Part 563. Part 563 established the current reporting requirement of voluntarily installed EDRs in light vehicles. In addition, this rulemaking would make revisions to the optional data elements to account for the latest advances in vehicle safety. Part 563 presently requires vehicle manufacturers who are voluntarily installing EDRs to be in compliance with the regulation by September 1, 2012. In a separate rulemaking (2127-AK86 Mandatory Part 563 Event Data Recorder Requirements), the agency would propose requiring that all light vehicles comply with the requirements specified in current 49 CFR 563. This rulemaking would seek additional information from the public and expand upon that initiative. Moreover, this rulemaking would contribute to advancements in vehicle designs, advanced restraints and other safety countermeasures. The costs are expected to be minimal since some vehicle manufacturers presently capture additional data beyond Part 563 in their EDRs. Originally, an ANPRM was scheduled for 12/31/2011.

70.	FMVSS 114, Theft Protection and Rollaway Prevention, Keyless Ignition Systems	Green
-----	--	-------

Popular Title: Keyless Ignition**RIN 2127-AK88****Stage:** NPRM**Previous Stage:**None

Abstract: FMVSS No. 114, Theft protection and rollaway prevention, has provisions that govern the operation of ignition systems in vehicles. This rulemaking would address emerging safety concerns that NHTSA has identified using consumer compliance data regarding keyless ignition controls that are not directly addressed by this standard. The concerns are drivers who are unable to shut down the propulsion system of their vehicle in

the event of any on-road emergency; drivers who shut off the propulsion system without putting their vehicle in park and walk away from the vehicle, leaving it prone to roll away; and drivers who do put their vehicle in park, but inadvertently leave the propulsion system active increasing the risk of carbon monoxide poisoning in a closed environment. We anticipate that these new requirements would have little or no anticipated cost as they are based on a new Society of Automotive Engineers Recommended Practice J2948-20110. We believe that manufacturers already intend to follow that Practice voluntarily. The benefits for these new provisions would be reduced consumer confusion with these new controls and reduced of potential risk of death or injury. However, because these systems are not widespread in current vehicles, their benefits cannot yet be readily quantified. This action was downgraded to non-significant by OMB and will not appear on next month Internet Report.

71. **Heavy Vehicle Speed Limiters** Red

Popular Title: Heavy Vehicle Speed Limiters

RIN 2127-AK92

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would respond to petitions from ATA and Roadsafe America to require the installation of speed limiting devices on heavy trucks. In response, NHTSA requested public comment on the subject and received thousands of comments supporting the petitioner's request. Based on the available safety data and the ancillary benefit of reduced fuel consumption, this rulemaking would consider a new Federal Motor Vehicle Safety Standard that would require the installation of speed limiting devices on heavy trucks. We believe this rule would have minimal cost, as all heavy trucks already have these devices installed, although some vehicles do not have the limit set. This rule would decrease the estimated 8991 fatalities caused by crashes involving heavy trucks and buses. It would also increase the fleet fuel efficiency of these vehicles.

73. **Motorcoach Rollover Structural Integrity** Red

Popular Title: Motorcoach Rollover Structural Integrity

RIN 2127-AK96

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would promulgate a new FMVSS for rollover structural integrity requirements for motorcoaches. In August 2007, NHTSA published a motorcoach safety plan identifying four specific priority items: seat belts on motorcoaches, rollover structural integrity, emergency evacuation, and fire safety. The DOT published a comprehensive motorcoach safety action plan in November 2009 that reiterated NHTSA's motorcoach safety priorities. This rulemaking also addresses 6 recommendations issued by the NTSB on motorcoach roof strength and structural integrity.

74. **Electronic Stability Control Systems for Heavy Vehicles** Red

Popular Title: Truck Tractor Electronic Stability Control

RIN 2127-AK97

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would promulgate a new Federal standard that would require stability control systems on truck tractors and motorcoaches that address both rollover and loss of control crashes, after an extensive research program to evaluate the available technologies, an evaluation of the costs and benefits, and a review of manufacturer's

product plans. Rollover and loss of control crashes involving heavy vehicles is a serious safety issue that is responsible for 304 fatalities and 2,738 injuries annually. They are also a major cause of traffic tie-ups, resulting in millions of dollars of lost productivity and excess energy consumption each year. Suppliers and truck and motorcoach manufacturers have developed stability control technology for heavy vehicles to mitigate these types of crashes. Our preliminary estimate produces an effectiveness range of thirty-seven to fifty-six percent against single-vehicle tractor-trailer rollover crashes and three to fourteen percent against loss of control crashes that result from skidding on the road surface. With these effectiveness estimates, annually, we estimate 29 - 66 lives would be saved, 517 - 979 MAIS 1-5 injuries would be reduced, and 810 - 1,693 crashes that involved property damage only would be eliminated. Additionally, it would save \$10 - \$26 million in property damage and travel delays. Based on the technology unit costs and affected vehicles, we estimate technology costs would be \$55 to 107 million, annually. However, the costs savings from reducing travel delay and property damage would produce net benefits of \$128 - \$372 million.

78. **Prioritization and Allocation Authority Exercised By the Secretary of Transportation Under the Defense Production Act** Red

Popular Title: Defense Production Act (DPA)

RIN 2105-AD83

Stage: Final Rule

Previous Stage: NPRM: Publication Date 02/15/2011; End of Comment Period 03/17/2011.

Abstract: This rulemaking would clarify the prioritization and allocation authorities exercised by the Secretary of Transportation under the Defense Production Act (DPA). The DPA is the President's primary authority to ensure timely availability of private sector resources for national defense. In addition to military and energy activities, the definition of "national defense" includes emergency preparedness activities conducted pursuant to Title VI of The Robert T. Stafford Disaster Relief and Emergency Assistance Act and the protection and restoration of critical infrastructure. Under Title I of the DPA, the President has the authority to require the acceptance and prioritization of contracts and orders -- and to allocate materials, services, and facilities -- in support of the national defense. Under Section

201 of Executive Order 12919, the President has delegated these prioritization and allocation authorities to the Secretary of Transportation for all forms of civil transportation. In the 2009 DPA reauthorization legislation, Congress mandated that each Federal agency with delegated authority under Title I of the DPA develop final rules that establish standards and procedures for implementing its delegated authority in emergency and nonemergency conditons. Additionally, Congress mandated that, to the extent practicable, the rules be consistent and unified. DOT is part of an interagency working group, along with the other delegated agencies, that is developing consistent unified rules.

Pipeline and Hazardous Materials Safety Administration

87. **Hazardous Materials: Bulk Loading and Unloading Operations** Green

Popular Title: Loading/Unloading

RIN 2137-AE37

Stage: Final Rule

Previous Stage: NPRM: Publication Date 03/11/2011; End of Comment Period 05/10/2011. End of extended Comment Period 06/09/2011.

Abstract: This rulemaking would amend the Hazardous Materials Regulations to require each person (i.e., carrier or facility) who engages in cargo tank loading or unloading operations to perform a risk assessment of the loading and unloading operation and develop and implement safe operating procedures based upon the results of the risk assessment. These amendments would include the operational procedures requirements to address several aspects of loading and unloading, including provisions for facilities to develop maintenance testing programs for transfer equipment (i.e., hose maintenance programs) used to load or unload cargo tank motor vehicles (CTMVs). In addition, this rulemaking would require each employee who engages in cargo tank loading or unloading operations to receive training and be evaluated on the employee's qualifications to perform loading or unloading functions. This rulemaking would reduce the risk associated with the loading and unloading of cargo tank motor vehicles that contain hazardous materials.

Popular Title: Pipeline Safety: Excavation Damage Laws

RIN 2137-AE43

Stage: NPRM

Previous Stage: ANPRM: Publication 10/29/2009; End of Comment Period 12/14/2009.

Abstract: The PIPES Act provides PHMSA with the authority to enforce excavation damage laws in those states that have inadequate enforcement. This rulemaking would consider standards for excavators and operators to follow when conducting excavation in a vicinity of a pipeline and the administrative procedures to be used for enforcement proceedings.

Popular Title: Transportation of Lithium Batteries

RIN 2137-AE44

Stage: SNPRM

Previous Stage: NPRM: Publication Date 1/11/2010; End of Comment Period 3/12/2010.

Abstract: This rulemaking would amend the Hazardous Materials Regulations to comprehensively address the safe transportation of lithium cells and batteries. The intent of the rulemaking is to strengthen the current regulatory framework by imposing more effective safeguards, including design testing to address risks related to internal short circuits, and enhanced packaging, hazard communication, and operational measures for various types and sizes of lithium batteries in specific transportation contexts. The rulemaking responds to

several recommendations issued by the National Transportation Safety Board.

Popular Title: Combustible Liquids

RIN 2137-AE52

Stage: Undetermined

Previous Stage: ANPRM: Publication Date 04/05/2010; End of Comment Period 07/06/2010.

Abstract: This rulemaking would consider the transportation of combustible liquids and whether the Hazardous Materials Regulations (HMR) should harmonize domestic regulations with international standards. Additionally, it would examine ways to revise, clarify, or relax certain regulatory requirements to facilitate the transportation of combustible liquids while maintaining an adequate level of safety. Previously, an NPRM had been scheduled for 01/23/2012.

|-----|--|-------|
| 92. | Hazardous Materials: Limiting the Use of Mobile Telephones by Highway | Green |
|-----|--|-------|

Popular Title: Use of Mobile Telephones

RIN 2137-AE65

Stage: Final Rule

Previous Stage: NPRM: Publication Date 04/29/2011; End of Comment Period 06/28/2011.

Abstract: This rulemaking would limit the use of mobile telephones by drivers during the operation of a motor vehicle containing a quantity of hazardous materials requiring placarding under Part 172 of the 49 CFR or any quantity of a select agent or toxin listed in 42 CFR Part 73. Additionally, in accordance with requirements proposed by the Federal

Motor Carrier Safety Administration (FMCSA), motor carriers would be prohibited from requiring or allowing drivers of covered motor vehicles to engage in the use of mobile telephones while driving. This rulemaking would improve health and safety on the Nation's highways by reducing the prevalence of distracted driving-related crashes, fatalities, and injuries involving drivers of commercial motor vehicles.

Abstract: This rulemaking would address effective procedures that hazardous liquid operators can use to improve the protection of High Consequence Areas (HCA) and other vulnerable areas along their hazardous liquid onshore pipelines. PHMSA is considering whether changes are needed to the regulations covering hazardous liquid onshore pipelines, whether other areas should be included as HCAs for integrity management (IM) protections, what the repair timeframes should be for areas outside the HCAs that are assessed as part of the IM program, whether leak detection standards are necessary, valve spacing requirements are needed on new construction or existing pipelines, and PHMSA should extend regulation to certain pipelines currently exempt from regulation. The agency would also address the public safety and environmental aspects any new requirements, as well as the cost implications and regulatory burden.

Pipeline and Hazardous Materials Safety Administration

94. **Hazardous Materials: Transportation of Lithium Batteries** Red**Popular Title:** Lithium Batteries II**RIN 2137-AE68****Stage:** Undetermined**Previous Stage:** None

Abstract: This rulemaking would amend requirements in the Hazardous Materials Regulations (HMR) that apply to cargo shipments of lithium batteries and cells by aircraft (none of the proposed changes would apply to the checked or carry-on baggage of a passenger or crewmember). The revisions would apply to shipments of lithium cells and batteries (but not to lithium batteries packed with or contained in equipment) and would: (1) extend the current prohibition of lithium metal cells and batteries from passenger carrying aircraft to cargo-only aircraft; (2) prohibit the transport of lithium ion cells and batteries as cargo aboard passenger-carrying aircraft; (3) impose a restriction on the location(s) on a cargo-only aircraft where lithium cells and batteries could be transported. One additional change would reduce the aircraft quantity limits for lithium cells and batteries packed with or contained in equipment. An NPRM was scheduled for publication on 4/19/2011.

96. **Pipeline Safety: Excess Flow Valves In Applications Other Than Single-Family Residences in Gas Distribution Systems** Red

Popular Title: Excess Flow Valves

RIN 2137-AE71

Stage: ANPRM

Previous Stage:None

Abstract: This rulemaking would require excess flow valves (EFVs) be installed in all new and renewed gas service lines, for structures other than single family dwellings, when the operating conditions are compatible with readily available valves. These changes would be in response to NTSB and PHMSA investigations of current EFV installation practices. The intended effect of the rule is to increase the level of safety for structures other than single family dwellings currently subject to Federal pipeline safety regulation. This rulemaking was recently upgraded to significant.

Stage: ANPRM

Previous Stage: ANPRM: 08/18/2011; Publication Date 08/25/2011; End of Comment Period 12/02/2011.

Abstract: In this rulemaking PHMSA will be revisiting the requirements in the Pipeline Safety Regulations addressing integrity management principles for Gas Transmission pipelines. In particular, PHMSA will be reviewing the definition of an HCA (including the concept of a potential impact radius), the repair criteria for both HCA and non-HCA areas, requiring the use of automatic and remote controlled shut off valves, valve spacing, and whether applying the integrity management program requirements to additional areas would mitigate the need for class location requirements.

Pipeline and Hazardous Materials Safety Administration

98. **Drivers of CMVs: Addressing Distracted Driving** Red

Popular Title: Distracted Driving

RIN 2137-AE75

Stage: Undetermined

Previous Stage: None

Abstract: The Federal Motor Carrier Safety Administration (FMCSA) and Pipeline and Hazardous Materials Safety Administration (PHMSA) are considering a rulemaking to limit or restrict the use of electronic devices or certain activities by commercial motor vehicle (CMV) drivers operating in interstate commerce and for drivers of CMVs containing a quantity of hazardous materials requiring placarding under Part 172 of the 49 CFR or any quantity of a select agent or toxin listed in 42 CFR Part 73. The Agencies have considered the results of recent research concerning distracted driving, and ideas and concepts from FMCSA's Motor Carrier Safety Advisory Committee and now seeks public comment and information to assist the Agencies in determining whether additional regulatory action is needed as a follow-up to previous regulatory actions. An ANPRM was scheduled for 9/22/2010.
