Administrator's Overview FY 2009 President Budget Request Maritime Administration

This FY 2009 budget request supports the Department's efforts to achieve its strategic goals and to implement the President's Management Agenda. The following pie chart displays a breakout of the Maritime Administration's budget request by DOT strategic goal.

The budget is presented as an integrated performance budget with full costs attributed to program activities. A key focus for our FY 2009 budget development efforts was to sustain optimum Maritime Administration performance within the current budget environment. This request proposes total funding of \$313.4 million for the Maritime Administration's direct discretionary appropriations. The funding level is relatively unchanged from the FY 2008 enacted budget.

The Maritime Administration will support E-Gov initiatives in FY 2008 and FY 2009 by contributing over \$0.142 million to the Department of Transportation in each of the fiscal years. In addition, the Maritime Administration employs three FTEs that aid in the support of the E-Gov initiatives.

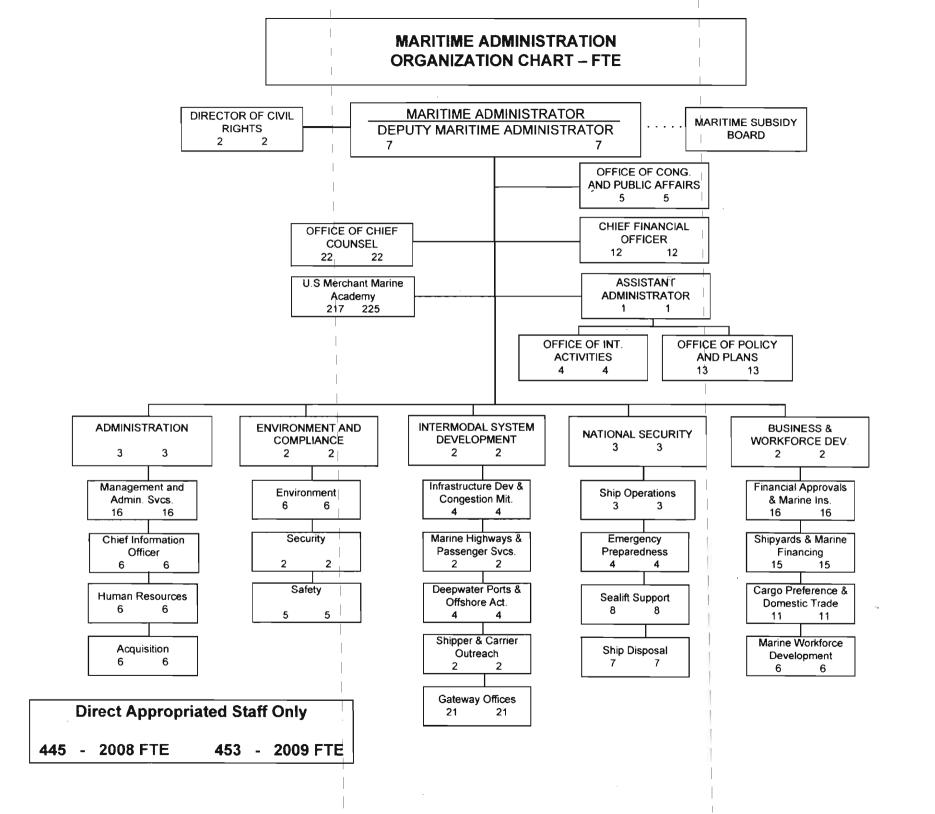

Funding increases, decreases and budget highlights are listed below:

• An increase of \$18 million for the Maritime Security Program (MSP) to raise the payment for the 60 MSP ship operators to \$2.9 million per vessel, as authorized by the National Defense Authorization Act for Fiscal Year 2004 (P.L. 108-136). During Operation Iraqi Freedom (OIF), MSP ships have played an important role in supporting DOD's mission. Escalating payments were designed to offset the impact of inflation and to provide an incentive for MSP operators to reinvest and upgrade their MSP fleet with newer, more modern and efficient vessels – which they have done three times since October 1, 2005.

- An increase of \$1.0 million in the Ship Disposal program. This will assist the Maritime Administration in removing 14 vessels from the inventory at the fleets.
- A decrease of \$10.0 million for Assistance to Small Shipyards. New resources were appropriated for this program in FY 2008. No funding is requested for FY 2009.
- A decrease of \$5.0 million for the Maritime Guaranteed Loan (Title XI) Program Account. New resources were appropriated for this program in FY 2008. No funding is requested for FY 2009.
- An overall decrease in the Operations and Training in the amount of \$4.1 million. This is comprised of the following:
 - O United States Merchant Marine Academy (USMMA) has an increase of \$4.6 million needed to correct for a structural shortfall in the Academy's pay and benefits account. This proposal also provides for adequate food, uniforms and medical care for the student body and undertakes improvements to instructional software, hardware and equipment to ensure the continued accreditation of the Academy's instructional program. In addition, this funding will provide for salary and non-salary inflation; improve continuity of operations; and routine maintenance, repair and operating requirements. In addition to these changes in operational accounts, the budget includes a decrease of \$6.0 million in the Capital Improvement Program at the USMMA. During FY 2009, various maintenance and repair projects will be completed and the renovation of Rogers Hall will be postponed.
 - O A new general provision has been added to increase the Student Incentive Payment (SIP) payment from \$4,000 to \$8,000 per academic year. The Administration supports SIPs and requests \$0.8 million, the same level as the FY 2008 enacted amount. The funding for the Schoolship maintenance and repair includes a decrease of \$2.2 million.
 - o Maritime Operations has a decrease of \$0.6 million, consisting of the following: a reduction of \$2.0 million for the non-recurring funding for the maritime data collection, management, and dissemination activities to advance the existing Information Framework (MarView), and an increase of \$1.4 million in salary and benefits, non-salary base, Port Congestion initiatives, Committee on the Marine Transportation System (CMTS), and environmental programs.

I am confident that the funding levels contained in this Maritime Administration FY 2009 budget request will enhance our ability to achieve the Department's strategic and performance goals and the President's Management Agenda.

Sean T. Connaughton, Maritime Administrator

OPERATIONS AND TRAINING

Program and Performance Statement

The appropriation for Operations and Training provides funding for staff at headquarters and gateway offices to administer and direct Federal maritime programs, for the operation of the U.S. Merchant Marine Academy, and for financial assistance to the six State maritime schools.

Maritime Administration programs also include planning for coordination of U.S. maritime industry activities under emergency conditions; technology assessments calculated to achieve advancements in ship design, construction and operation; and port and intermodal development to increase capacity and mitigate congestion in freight movements.

The total Operations and Training budget request of \$117.8 million, is distributed as follows: United States Merchant Marine Academy (USMMA) \$61.3 million, State Marine Schools (SMS) \$11.0 million and MARAD Operations \$45.5 million.

Detailed Justification for the United States Merchant Marine Academy

FY 2009 Request: \$61.358 million

U.S. Merchant Marine Academy

Overview:

The USMMA graduates a significant number of the merchant marine officers trained annually in the United States. These graduates have a four year bachelor's degree which includes courses in marine engineering and navigation, logistics, maritime security, and shipyard management; a U.S. Coast Guard merchant marine officer's license; a commission in the armed forces; and practical shipboard training. U.S. national defense depends on government-owned and privately-owned oceangoing cargo ships, with skilled crews, to deliver people and supplies to remote places of the world. In times of conflict, some USMMA graduates crew the ships that support our troops. The USMMA is the main source of new reservists for the merchant marine component of the U.S. Naval Reserve. Licensed mariners are needed by DOD during national emergencies not only for crewing, but to provide shore side support for sealift operations. The USMMA's educational activities contribute to the success and achievement of the Department's Security, Preparedness and Response strategic goal.

Students at the USMMA receive a federally funded education and are required to pay minimal fees related to personal services and issues. In return, Academy graduates incur a three-part service obligation:

- 1. They must maintain a license as an officer in the merchant marine of the United States for at least six years following the date of graduation from the Academy. Because the U.S. Coast Guard requires license renewal after five years, graduates are effectively licensed for up to ten years after graduation;
- 2. They must apply for, and accept if offered, an appointment as a commissioned officer and serve in the U.S. Naval Reserve, U.S. Coast Guard Reserve, or any other reserve component of an armed force of the United States, for at least eight years after graduation from the Academy; and
- 3. They must serve the foreign and domestic commerce and national defense of the United States for at least five years following the date of graduation from the Academy as merchant marine officers serving on a U.S.-flag merchant vessel; as employees in a U.S. maritime-related industry, profession, or marine science; or as commissioned officers on active duty in an armed force of the United States or the National Oceanic and Atmospheric Administration.

FY 2008 Base:

The base consists of salaries and benefits for the USMMA faculty and support staff and all USMMA operational funds, including capital improvements.

Anticipated FY 2008 Accomplishments:

The Academy plans to graduate approximately 219 merchant marine officers in June 2008.

FY 2009 Budget Request:

USMMA (\$000)						
Program	FY 2008 Enacted	Salary Adjustment *	Non-Salary Inflation	Program Increases/ Decreases	FY 2009 Request	
Salary and Benefits	\$25,720	\$622	\$0	\$452	\$26,794	
Academy Operations	\$22,887	\$0	\$526	\$3,001	\$26,414	
Capital Improvements	\$14,139	\$0	\$0	-\$5,989	\$8,150	
TOTAL	\$62,747	\$622	\$526	-\$2,537	\$61,358	

^{*} Includes Annualization of 2008 Pay Raises, 2009 Salary Increases, and One Less Compensable Day

The Academy's FY 2009 budget request of \$61.358 million is \$1.389 million less than the FY 2008 enacted amount. In FY 2009, new funding of \$1.074 million is requested for pay and benefits at the Academy. The increase is composed of: \$622,000 for the cost of the FY 2009 pay increase and annualization of the FY 2008 pay increase; \$526,000 for inflation, and \$452,000 for an additional 8 FTE. The FTE increase corrects for a structural shortfall in the personnel compensation budget that originated in FY 2006. This problem persisted during 2007 and was accommodated through a reprogramming with the Operations and Training account. During FY 2008, the alignment of personnel resources charged to this account will be reduced by approximately eight FTE's and coupled with other cost saving measures, the Academy will conform to available appropriations. This FY 2009 increase will ease prior-year restrictions on pay and benefits funding, and restore the FTE's back to the appropriate level needed to fully staff Academy functions.

For the purposes of this 2009 exhibit, the breakout of the Academy's spending for several non-pay budget activities has been collapsed into one category, "Academy Operations." As a result of a recent review by the Maritime Administration, several issues have been identified regarding the historical display of the Academy's operating budget. As of the publication of the President's Budget in early February, these issues are yet being resolved, in order to provide Congress with an accurate presentation. The Department will follow up with the Appropriations Committees with an amended display as soon as possible, which highlights spending by the usual budget activities: Pay and Benefits; Midshipmen Program; Instructional Program; Program Direction and Administration; Maintenance, Repair and Operating Requirements; and Capital Improvements.

Capital Improvements funding will be used to support the following projects:

Critical Life/ Safety Repairs	\$2,485,000
American with Disabilities Act Renovations	\$ 999,000
New Roofs for Academy Buildings	\$1,665,000
Other Priority Maintenance and Repair Projects	\$3,001,000
Total	\$8,150,000

The Academy conducted a Program Assessment Rating Tool (PART) review in support of the FY 2007 budget submission. The overall score was 83, or 'moderately effective.' The funds requested in this budget will allow the Academy to continue to meet the performance measure targets identified in the PART.

Detailed Justification for State Maritime Schools

State Maritime Schools

FY 2009 Request: \$10.987 million

Overview:

The State Maritime School (SMS) budget request is comprised of three parts: annual direct payments to each of the six State maritime schools; the Student Incentive Payment (SIP) program; and payment of training ship maintenance and repair costs for Federally-owned training ships on loan to the SMS. The primary premise for Federal support of mariner education is to ensure that highly qualified personnel are produced annually to replenish the nation's pool of skilled merchant mariners. These mariners are needed to safely operate U.S.-flag cargo vessels and perform critical maritime-related functions in a national emergency. The SMS program contributes over half of the entry-level licensed mariners trained annually. Each SMS is funded largely by its State government.

Cadets at a SMS may participate in the Students Incentive Payment (SIP) program. SIP students receive annual stipends, for a maximum of four years, while attending the SMS. The SIP stipends are offered only to students who accept certain post graduation obligations. These obligations help MARAD assure that sufficient mariners will be available to crew sealift ships in times of emergency. SIP participants must agree to remain employed in the maritime industry for three years, maintain their U.S. Coast Guard license for six years; and become an active member of a U.S. armed forces reserve unit for a minimum of six years.

MARAD furnishes Federally-owned and maintained training ships to the schools. These vessels are vital components of the SMS program. The ships are employed as academic and seagoing laboratories for license coursework and practical, hands-on training and testing. Coast Guard and MARAD approved training curricula require the use of training ships for much of the at-sea training necessary to qualify individual students to sit for the U.S. Coast Guard licensing exams. As the vessel owner, MARAD is mandated by law to be responsible for maintaining each ship in a state of "good repair", i.e. all regulatory requirements are fully met, and ensuring that the ship is structurally and mechanically sound, well preserved and equipped, and operates reliably.

FY 2008 Base:

The base consists of direct payment funding for each of the six schools, SIP program funds and training ship maintenance and repair funds. Salaries and benefits for the supporting staff are paid out of the Operations and Training Account (MARAD Operations Program activity).

Anticipated FY 2008 Accomplishments:

For the academic year 2006-2007, 479 students graduated from the SMS unlimited license program, a four percent increase over the 2005-2006 academic year. Of the total number of SMS graduates, 47 were Student Incentive Payment (SIP) participants. Similar numbers are anticipated for the 2008-2009 academic year. These graduates each have earned an unlimited U.S. Coast Guard license and are well trained and educated merchant mariners. These graduates are additions to the mariner pool and contribute to our national security with their essential and unique maritime knowledge and skills.

MARAD has observed a sharp cost escalation in the commercial ship repair sector. The 2005 Gulf Coast hurricanes exacerbated the already difficult situation, and have had a long-lasting effect on the marine industry. With substantial damage to marine infrastructure in the Gulf, and a continuing diminishment of lower-tier repair facilities and specialty contractors (e.g., boiler and turbine repair firms) nationwide, there has been a dramatic escalation in the cost to accomplish basic ship repairs and maintenance. Market conditions throughout FY 2006 and FY 2007 have resulted in a 30 percent increase in shipyard costs. These higher costs are expected to continue through FY 2008 and into FY 2009. These conditions have had a substantial impact on training ship maintenance and repair costs.

A portion of the expected FY 2008 impact of high costs will be absorbed by maintaining the new Texas training ship TS TEXAS CLIPPER (ex-USNS SIRIUS, acquired in FY 2005 from Military Sealift Command) in a dormant state pending its conversion. Although this single action offsets direct costs, it renders the vessel incapable of disaster response during the 2007 and 2008 hurricane seasons. TS TEXAS CLIPPER was one of three MARAD training ships mobilized to support hurricane recovery efforts in the Gulf Coast area in 2005, but its availability can no longer be factored in MARAD's contingency planning as the vessel's regulatory certification has lapsed.

The major training ship maintenance accomplishments expected in FY 2008 include: the dry docking of TS STATE of MICHIGAN; the dry docking of the TS GOLDEN BEAR; the completion of the TS STATE of MAINE main propulsion automation system (a multi-phased project); and replacement of the TS STATE of MICHIGAN main propulsion automation system.

FY 2009 Budget Request:

State Maritime Schools (\$000)					
FY 2008 President's Salary Non-Salary Increases/ FY 2009					
<u>Program</u>	<u>Request</u>	Adjustment *	<u>Inflation</u>	<u>Decreases</u>	Request
Direct Payments	\$1,881	\$0	\$0	\$0	\$1,881
Student Incentive Payments	\$800	\$0	\$0	\$0	\$800
Schoolship Maintenance and Repair	\$10,500	\$0	\$242	-\$2,436	\$8,306
TOTAL	\$13,181	\$0	\$242	-\$2,436	\$10,987

^{*} Includes Annualization of 2008 Pay Raises, 2009 Salary Increases, and One Less Compensable Day

MARAD requests \$1.881 million to make direct payments to the SMS, the same level as the FY 2008 enacted amount. This payment level will result in a payment of \$313,500 to each school in FY 2009. The schools rely on these funds to help offset the cost of salaries for professors and instructors, faculty health care costs, facilities costs and training ship fuel costs.

MARAD requests \$0.8 million for the SIP program, the same level as the FY 2008 enacted amount.

Some students at the SMS participate in the SIP program. The SIP targets cadets who are enrolled in the Unlimited U.S. Coast Guard License Program who are also willing to complete naval training while in school. SIP participants commit to post-graduate service obligations to remain employed in the maritime industry for three years; maintain their U.S. Coast Guard license for six years; and become an active member of a U.S. armed forces reserve unit for a minimum of six years.

Detailed Justification for MARAD Operations

MARAD Operations

FY 2009 Request: \$45.503 million

Overview:

The MARAD Operations program activity funds a cadre of professional support staff who are responsible not only for the achievement of all of MARAD's short and long term performance goals, but also for conducting a number of specific maritime activities. On an ongoing basis, these maritime activities encompass: the negotiation of bilateral maritime agreements; the licensing of deepwater ports; strengthening and improving the Maritime Transportation System through support of the Committee on the Marine Transportation System (CMTS); creating improved waterborne methods for shipping cargo; ensuring the availability of DOD's designated strategic ports; management of mariner training activities and the War Risk Insurance program;—and management of MARAD's marine transportation-related environmental activities. This program activity also pays for the administrative staff and other support costs for the Maritime Security Program (MSP), the Voluntary Intermodal Sealift Agreement (VISA) program and the Cargo Preference program. Finally, MARAD Operations pays for the MARAD staff and other support necessary to fulfill the objectives of the President's Management Agenda initiatives.

FY 2008 Base:

The base consists of salaries and benefits and the majority of MARAD's operating costs such as rent, utilities, information technology, etc.

Anticipated FY 2008 Accomplishments:

MARAD will continue operational activities in support of:

- negotiation of bilateral maritime agreements;
- licensing of deepwater ports;
- strengthening and improving the Marine Transportation System via CMTS efforts to ensure the development and implementation of national MTS policies consistent with national needs:
- creation of improved waterborne methods for shipping cargo;
- ensuring the availability of DOD's designated strategic ports and national security
 planning;
 planning;
- management of the War Risk Insurance program;
- efficient administrative operation of MSP and VISA.

Key air emissions reduction research efforts to be completed in FY 2008 include:

- Second phase of marine-specific emissions economic incentive study;
- Identification of interagency freight transport emissions modal comparison tool;
- Alternative Marine Power technology transfer.

FY 2009 Budget Request:

MARAD requests a total of \$45.503 million to cover the cost of MARAD operations, a decrease of \$0.561 million from the FY 2008 enacted amount. This request level includes a decrease of \$1.96 million for the non-recurring funding for the maritime data collection. It includes \$0.458 million for the increased cost of salaries; \$0.17 million for non salary inflation; \$0.04 million

decrease in non-salary based programs, and increases in the following \$0.3 million for the Committee on the Marine Transportation System (CMTS) to support the ongoing activities of the CMTS, an interagency task force created by the President's Oceans Plan, to support coordinated maritime policy; \$0.2 million to partner with the University of Delaware (UDEL) and the Rochester Institute of Technology (RIT) to develop a Freight Routing Energy and Emissions Analysis Tool (FREAT) for I-95 Corridor cargo movements; and, \$0.311 million to obtain the services of a contractor to assist in the review, approval and implementation of Marine Highway Pilot Projects, promote the use of the Marine Highway (including ferries), and pursue solutions to barriers and disincentives, including environmental, financial and infrastructure related issues.

The following tables summarize the MARAD Operations costs by function and by program:

SHIP DISPOSAL

Program and Performance Statement

The Ship Disposal program provides resources to properly dispose of obsolete government-owned merchant-type vessels maintained by MARAD in the National Defense Reserve Fleet. These vessels pose a significant environmental threat due to the presence of unexpended fuel and oil and other hazardous substances such as asbestos and solid and liquid polychlorinated biphenyls (PCBs). MARAD contracts with domestic shipyards and recycling facilities to dispose of these vessels in accordance with guidelines set forth by the U.S. Environmental Protection Agency.

Detailed Justification for Ship Disposal

Ship Disposal FY 2009: \$18.0 million

Overview:

MARAD conducts its Ship Disposal Program to help achieve DOT's Environmental Stewardship strategic objective to promote transportation solutions that enhance communities and protect the natural and built environment. Successful pursuit of this program also helps lead to achievement of DOT's desired outcome of reduced pollution and other adverse environmental effects from transportation and transportation facilities. MARAD is the U.S. government's disposal agent for merchant type vessels 1,500 gross tons or more and has custody of a fleet of approximately 120 obsolete ships owned by the Federal government that are available for disposal. MARAD's obsolete ships are located at the James River Reserve Fleet site in Virginia, the Suisun Bay Reserve Fleet site in California and the Beaumont Reserve Fleet site in Texas.

Due to the presence of onboard hazardous materials such as residual fuel, asbestos and solid polychlorinated biphenyls (PCBs) on these ships, they pose a risk to the surrounding environment and must be disposed of properly. Expedited disposal of the obsolete ships lessens environmental risk and makes sense not only from the standpoint of avoiding harm, but also in terms of reducing costs. Environmental cleanup costs after a hazmat discharge incident are often far higher than the cost of proper and timely disposal.

In addition to environmental risks associated with onboard hazardous materials at Maritime Administration fleet sites, the risk associated with the spread of non-indigenous aquatic species when transferring obsolete ships from the fleets sites to other geographic locations for vessel disposal through recycling or artificial reefing has become an increasingly complex and costly challenge since FY 2006 and throughout FY 2007. Requirements and costs associated with the control of potentially invasive aquatic species are continuing to evolve and indications are that they will continue to increase until the conflicting and often contradictory requirements of local, state and federal regulations are resolved through on going discussions with the regulatory agencies involved. Because of the conflicting environmental mandates and regulatory constraints on the ship disposal activities, early in FY 2007 the Maritime Administrator placed a temporary suspension on further ship disposals. The suspension has been lifted for the Virginia and Texas fleet sites. The suspension will remain in place for California until an agreement has been reached with the cognizant state and federal regulatory agencies on National Invasive Species Act (NISA) and Clean Water Act (CWA) issues currently impeding the movement and disposal of obsolete Maritime Administration ships. The Maritime Administration is actively engaged with those agencies in the resolution of the issues.

While the genesis of requirements associated with the control of potentially invasive aquatic species was the NISA, and related U.S. Coast Guard implementing regulations, local and state regulation related to the control of non-indigenous species and clean water regulations are further affecting the Maritime Administration's rate of obsolete ship disposal and costs related to ship disposal. While the last few years have seen positive trends in increases in domestic recycling capacity, sustained high market price of steel and consistent Federal ship disposal funding levels,

these positive factors are tempered by meeting environmental regulations and requirements necessary for the program to be in compliance with those regulations. Because of this, the budgetary impact of NISA, the CWA and related local and state regulations on the Ship Disposal program is addressed in this FY 2009 budget request.

An additional project funded within the Ship Disposal account is the safe management and safeguarding of the Nuclear Ship SAVANNAH (NSS). This vessel is a cargo ship owned and maintained by MARAD that was designed and built in the 1960's as a demonstration project for the peaceful use of nuclear power under the 'Atoms for Peace' initiative. Its nuclear power plant is licensed as a commercial power reactor (inoperable / possession-only) by the Nuclear Regulatory Commission (NRC); one of only a few such federally-owned, NRC-licensed facilities. NRC's core mission, to protect the health and safety of the public and environment by regulating the nuclear industry and radiological materials nationwide, is fully compatible with the DOT Environmental Stewardship strategic objective.

MARAD's NRC license to possess the NSS facility requires compliance with all regulations and statutes (principally the Atomic Energy Act and the Energy Policy Act) that are applicable to a power reactor. For the SAVANNAH and MARAD, this requires a nuclear licensee compliance and management program that is similar in most respects to an operating nuclear power plant. While the facility is in SAFSTOR status (inoperable, defueled, protected long-term storage), the level of activity associated with this compliance program is greatly reduced, but the basic, or fundamental, tenets of nuclear licensing must be in place and functional.

Under statute and regulation, the NSS facility must complete decommissioning (dismantlement, disposal) by 2031 (60 years after permanent cessation of operations). The present focus of MARAD's NSS program activities is to safely manage and safeguard the NSS facility until decommissioning begins. Assuming adequate and well-defined pre-planning, and maintenance of a compliant license management program, MARAD will require a minimum of five years to complete a decommissioning project.

FY 2008 Base:

The base consists of ship disposal funds, salaries and benefits, contractor support, administrative funds (including travel) and funding for NSS nuclear management activities and predecommissioning (SAFSTOR) planning and preparation.

Anticipated FY 2008 Accomplishments:

MARAD has an FY 2008 performance target to remove 16 obsolete vessels from the National Defense Reserve Fleet (NDRF) and expects to meet or exceed this target. However, high fuel prices and increased costs associated with compliance with invasive species regulations and risk mitigation requirements may impact the number of vessels actually removed in FY 2008. The development of testing and mitigation requirements surfaced in 2006 as a potentially significant cost driver due to increasing concern regarding the environmental impact of discharges from hull cleaning activities and for the potential spread of non-indigenous species as the Maritime Administration relocates obsolete ships from our fleet sites to the various disposal locations throughout the U.S. Cumulative costs to the program in FY 2006 and 2007 related to NISA requirements were approximately \$2.5 million. Since the NISA requirements only became

known in FY 2006, and compliance activities have continued to evolve in FY 2007, the costs were unanticipated and not included in budget requests for FY 2007 or 2008. The to-date costs have been related to accomplishing biological sampling, laboratory analysis, underwater hull cleaning to remove soft aquatic growth and conducting baseline aquatic species studies at the fleet sites and domestic recycling facilities. These costs are necessary merely to remove obsolete ships to recycling facilities and are in addition to costs normally associated with ship disposal activities such as towing, hazmat remediation and dismantling. The Maritime Administration anticipates that the Ship Disposal Program must continue to develop and implement strategies to reduce the risk of the introduction of non-indigenous aquatic species when transiting obsolete NDRF vessels from the fleet sites to the domestic recycling facilities to comply with NISA. For the balance of FY 2007 and 2008 those costs will continue in addition to costs which will include activities related to hull cleaning discharge sampling and discharge containment because of concerns raised by California and other states regarding compliance with the Clean Water Act and related regulations.

The Maritime Administration expects to continue to utilize domestic recycling as the primary ship disposal method and will dispose of high and moderate priority ships that are available for disposal during FY 2008 through domestic recycling. Disposals through artificial reefing, deep-sinking of ships with the U.S. Navy and donation to not-for-profit groups will also be used to the maximum extent possible. As opportunities arise, MARAD will also continue working with domestic and international organizations to accomplish vessel condition assessments, hazardous materials identification, waste-stream minimization, and applied technology testing on MARAD's obsolete ships. MARAD anticipates that in the future these activities could result in improved overseas hazardous material remediation and ship recycling and lead to additional choices for environmentally safe and cost-effective vessel disposal internationally. Currently there are no foreign facilities qualified to compete for future ship recycling contracts.

SAVANNAH Project: MARAD's nuclear license management and compliance program substantially diminished from about 1980 to 2005, or roughly the timeframe when the ship was employed as a museum in South Carolina, and then transferred to MARAD's James River Reserve Fleet for inactive storage. One of MARAD's first substantial decommissioning activities was to conduct an independent analysis and self-assessment of our licensing basis. This study was completed in 2006, and revealed substantial deficiencies in our licensing program. Corrective actions, and development of what we term "licensee competency" has been ongoing since mid-2005, and remains in progress.

MARAD had intended to achieve licensee compliance within a concurrent timeframe with predecommissioning planning. Given the need to restructure the decommissioning program to suit budgetary targets, MARAD must instead complete its license management and compliance program as an independent activity, with decommissioning to follow at a future date. Beginning in late 2007 and throughout 2008, MARAD will conduct detailed and thorough radiological surveys in all controlled spaces in the ship, to better define the radiological conditions on the

56

ship. These activities will support efforts beginning in late 2008 to bring the facilities into conformance with contemporary NRC requirements for extended SAFSTOR.**FY 2009 Budget Request**:

The total request for the ship disposal appropriation is \$18.0 million, an increase of \$1.0 million from the FY 2008 enacted budget.

MARAD requests \$15.0 million to support the continuation of the obsolete ship disposal activities, an increase of \$1.0 million from the FY 2008 enacted amount. MARAD plans to continue to expedite the disposal of obsolete ships via full and open competition, utilizing all feasible disposal options. Funding at this level will allow for 14 vessel removals from our inventory and defray costs to develop and implement a risk mitigation plan for compliance with NISA and for testing and containment requirements related to the Clean Water Act. Such activities will allow ship disposal activities to continue in full compliance with NISA and the CWA, but will also lessen the environmental risk at the fleet sites and recycling facilities.

MARAD requests \$3.0 million, the same as the FY 2008 enacted amount, to continue activities required to bring the NSS nuclear facilities into conformance with NRC SAFSTOR standards. SAFSTOR is the pre-decommissioning condition in which a non-operating nuclear power plant is safely husbanded for the period of time between cessation of operations and dismantlement, disposal and license termination. Because the facility is non-operating, the SAFSTOR condition is designed to be inherently safe during sustained unattended periods. The NSS was originally laid-up and placed in retention long before the industry gained any substantial SAFSTOR experience. As a consequence, it is now known that the NSS requires additional work before it can be considered satisfactory for an additional period of extended retention. Such work includes the reduction of transient combustibles, reduction of radiological inventory, maintenance of the facility containment structure, and continued routine radiological surveillance and monitoring. The projected SAFSTOR work effort for the NSS will complement future decommissioning activities in a substantially non-duplicative way.

The following table provides a breakout of our budget request by major cost element:

Ship Disposal Summary (\$000)						
<u>Program</u>	FY 2008 Enacted	Salary Adjustment *	Non-Salary <u>Inflation</u>	Program Increases/ Decreases	FY 2009 Request	
Vessel Disposal	\$10,105	\$0	\$232	\$721	\$11,058	
Salary and Benefits	\$660	\$16	\$0	\$0	\$676	
Contractor Support	\$1,135	\$0	\$26	\$0	\$1,161	
Fleet Actions	\$1,902	\$0	\$0	\$0	\$1,902	
Misc. (Travel, Training, etc.)	\$198	\$0	\$5	\$0	\$203	
NS SAVANNAH ,	\$3,000	\$0	\$0	\$0	\$3,000	
TOTAL	\$17,000	\$16	\$263	\$721	\$18,000	

^{*} Includes Annualization of 2008 Pay Raises, 2009 Salary Increases, and One Less Compensable Day

- Vessel Disposal Covers the cost of domestic dismantling contracts, artificial reefing, deep sinking, vessel sales and donations, and vessel export for recycling (if available). The request level will not defray significant increases in fuel costs and hull fouling testing and mitigation requirements, both of which may be significant cost drivers into FY 2008, without impacting the program's ability to meet its performance targets.
- Salary and Benefits Covers base salary and inflationary increases for Federal employee staff.
- Contractor Support Covers the use of contractors, through competitive outsourcing, for on-site project management and environmental, safety and health oversight at multiple domestic ship recycling facilities and one foreign facility.
- Fleet Actions Covers important disposal related activities that take place at the fleet sites where MARAD's obsolete ships are berthed and that are a necessary element of a comprehensive ship disposal program. These activities include: 1) vessel condition assessments, 2) hazardous material identification and disposal estimations, 3) shipboard waste stream minimization, and 4) testing of applied technology related to hazardous material remediation.
- Misc. (Travel, Training, etc.) Covers travel costs including domestic and foreign travel to assess facility capability, set-up and monitor foreign pilot programs, and review/monitor the progress of disposal in recycling facilities. The travel budget includes the cost for EPA staff to travel in support of MARAD's foreign recycling projects.
- N.S. SAVANNAH Covers nuclear license management activities, including restored licensee program for NRC compliance. Also covers incremental pre-decommissioning activities designed to bring the facility into conformance with present-day standards for NRC SAFSTOR, such that the ship can be returned to the JRRF (or other suitable location) for long-term retention until final decommissioning and license termination by 2031. Activities will be planned and undertaken using commercial nuclear industry best practices and methods, so that they can be achieved at reasonable cost.

OBSOLETE VESSELS IN MARAD'S CUSTODY BY FISCAL YEAR, FY 2001 - 2009									
	FY 2001	FY 2002	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007	FY 2008*	FY 2009*
On Hand, Start of Year	115	132	133	132	138	143	152	138	125
Transfers In	19	7	2	16	17	33	l	3	3
Transfers Out	2	6	3	10	12	24	15	16	14
On the books end of year	132	133	132	138	143	152	138	125	114
Removed from the Fleets	6	6	2	15	18	25	20	16	14

Definitions: "Transfers In" refers to vessels from all sources that have changed in status from retention to non retention. Transfers Out" refers to vessels that have been taken "off the books" because of a completed disposal, title transfer through vessel sale, donation or other transfer action. "Removed from the fleet" refers to vessels that have been physically removed from the fleet sites. Except for vessel sales and donations, vessels removed from the fleet are not counted as "Transfers Out" until the disposal action is completed. * FY 2008 and 2009 are projections.

MARITIME SECURITY PROGRAM

For necessary expenses to maintain and preserve a U.S.-flag merchant fleet to serve the national security needs of the United States, [\$156,000,000] \$174,000,000, to remain available until expended. (Department of Transportation Appropriations Act, 2008.)

MARITIME SECURITY PROGRAM

Program and Performance Statement

The Maritime Security Program provides resources to maintain a U.S.-flag merchant fleet crewed by U.S. citizens to serve both the commercial and national security needs of the United States. The program provides direct payments to U.S.-flag ship operators engaged in U.S.-foreign trade. Participating operators are required to keep the vessels in active commercial service and are required to provide intermodal sealift support to the Department of Defense in times of war or national emergency.

Detailed Justification for the Maritime Security Program

FY 2009 Request: \$174.0 million

Maritime Security Program

Overview:

The Maritime Security Act of 2003 authorized 60 ships for the Maritime Security Program (MSP) and up to a \$2.9 million payment per ship for FY 2009. MSP ensures that the United States will have U.S.-flag commercial vessels to support Department of Defense (DOD) operations. Prior to enactment of the Maritime Security Act of 1996, several of the major U.S.-flag carriers transferred their vessels to foreign registry. These same carriers indicated that more U.S.-flag ships would have left the U.S.-flag fleet in the absence of MSP. These actions would have resulted in DOD relying on more foreign-flag vessels with foreign crews or having to make substantial investments in procuring a larger government-owned DOD fleet. The program also ensures that the intermodal assets of current U.S.-flag ship operators will be readily available to DOD.

The primary purpose of the MSP is to provide the Department of Defense (DOD) with assured access to commercial U.S.-flag ships as well as U.S. mariners to support national security requirements during war or national emergency. DOD recognizes the importance of a strong partnership with the commercial maritime industry to ensure that our nation's defense transportation needs are met.

FY 2008 Base:

The base consists solely of funds to make payments to MSP ship operators for 60 enrolled ships. Payments will be made at the annual rate of approximately \$2.6 million per ship. Supporting staff salaries and benefits are funded by the Operations and Training account (MARAD Operations program activity).

Anticipated FY 2008 Accomplishments:

MSP ships have contributed greatly to Operation Enduring Freedom (OEF) and Operation Iraqi Freedom (OIF). A total of 79 U.S.-flag commercial ships (including 57 MSP ships) have either been employed by the Military Sealift Command (MSC), or the Military Surface Deployment and Distribution Command (SDDC) to transport military cargoes or cargo. SDDC reports that since September 11, 2001, U.S.-flag commercial ships have delivered over 360,000 twenty foot equivalent units (TEUs) of containerized equipment and supplies to support U.S. troops in Iraq and Afghanistan. In addition, 34 of the 57 MSP ships utilized by MSC and SDDC also supported the rebuilding of Iraq.

During FY 2008, MARAD will continue strategies that are designed to maintain full enrollment of 60 ships in MSP through September 30, 2008. MARAD will continue to evaluate and approve changes in MSP contracts that improve the quality of the MSP fleet while ensuring retention of modern and efficient ships and U.S. citizen crews to support U.S. homeland and national security goals. Throughout the fiscal year, MARAD anticipates that all 60 ships currently enrolled in the MSP program will be operating under their MSP contracts and in U.S. foreign trade.

FY 2009 Budget Request:

MARAD requests \$174.0 million for MSP in order to fund 60 ships in the MSP fleet in FY 2009 at the authorized level of \$2.9 million per ship. Funding at this level will allow DOT to continue

to maintain a U.S.-flag international trade merchant fleet crewed by U.S. citizens to serve both the commercial and national security needs of the United States and help to achieve the Department's performance measures for defense mobilization.

MSP participants signed operating agreements with the Maritime Administration that provide for escalation of MSP payments to \$2.9 million per ship per year in FY 2009. Escalating payments were designed to offset the impact of inflation and to provide incentive for MSP operators to reinvest and upgrade their MSP fleet with newer, more modern and efficient vessels. Any ship offered as a replacement for an existing MSP vessel must be less than 15 years old and must be approved by the Maritime Administration and the U.S. Transportation Command as the most militarily useful and commercially viable vessels available. Since October 1, 2005, three MSP ships have been replaced with newer ships and an additional 21 ships currently in the program will be replaced with newer vessels before the MSP expires in 2015.

Funding at the authorized level of \$2.9 million per ship in FY 2009 is essential to the maintenance of a fleet capable of meeting national security goals. DOD studies have consistently supported the requirement for a 60-ship MSP fleet to satisfy DOD's sealift requirements. A reduction in the authorized funding for FY 2009 will jeopardize the military's ability to obtain assured access to a sufficient number of commercial vessels and mariners to meet national security requirements. DOD estimates that the complete replacement of the MSP fleet with Government-owned assets would cost in excess of \$7 billion for initial construction and would require an annual expenditure of \$1 billion for operation and maintenance of the fleet.

The MSP fleet also contributes approximately 2,400 mariner positions which are critical for national security crewing requirements. With a diminished U.S.-flag merchant marine, a substantial portion of the pool of U.S. citizen mariners would disappear, impairing our ability to crew Ready Reserve Force ships and other Government-owned ships needed for national security.

MSP conducted a Program Assessment Rating Tool (PART) review in 2004. This review focused on the effectiveness of the MSP program in providing the required availability of MSP shipping assets for Department of Defense use. The MSP program received an overall score of 91, or 'effective.' OMB's PART recommendations and MARAD's actions are discussed in the Performance Overview. The funds requested in this budget will allow MSP to meet the performance measure targets identified in the PART. The MSP performance measures are listed in the 'Budget Request by Performance Goals' section of this budget under the Security, Preparedness and Response strategic goal.

OPERATING-DIFFERENTIAL SUBSIDIES

Program and Performance Statement

The Operating-Differential Subsidies (ODS) program provided resources to maintain a U.S.-flag merchant fleet to serve both the commercial and national security needs of the United States through operating subsides to participating U.S.-flag ship operators to offset certain differences between U.S.-flag and foreign-flag vessel operations. This program has been replaced by the Maritime Security Program. The ODS account is inactive except for the final settlement of open contracts and closing of financial accounts.

OCEAN FREIGHT DIFFERENTIAL

Program and Performance Statement

Ocean freight differential is the difference in cost incurred in the movement of ocean cargoes. In general, when applied to cargo preference policy implementation, it is the cost difference between U.S.-flag carriers and foreign-flag carriers Cargo preference provides a revenue source to help sustain a privately-owned U.S.-flag merchant marine by requiring shippers of certain U.S. government-sponsored cargoes to use U.S.-flag vessel. Public Law 99-108 amended the cargo preference requirement in Section 901 of the Merchant Marine Act by increasing the minimum required tonnage of certain government-sponsored food-aid shipments that must be shipped on U.S.-flag vessels from 50 to 75 percent. The Maritime Administration is required to reimburse U.S. government agencies that sponsor these food-aid shipments for the increase in ocean freight differential associated with compliance with this expanded U.S.-flag shipping requirement.

MARITIME ADMINISTRATION HISTORY OF APPROPRIATIONS OCEAN FREIGHT DIFFERENTIAL FY 2000 - FY 2009

Main Table - Dollars in Thousands

Fiscal Year	Estimate	Enacted
2000	74,832	74,832
2001	80,495	80,495
2002	54,331	54,331
2003	113,360	113,360
2004	687,816	687,816
2005	814,859	814,859
2006	526,260	526,260
2007	364,000	496,343
2008	265,000	265,000
2009	320,000	

Detailed Justification for Ocean Freight Differential

FY 2009 Request: \$320.0 million

Ocean Freight Differential

Overview:

The cargo preference program exists to ensure compliance by both Federal agencies and shippers with cargo preference laws designed to maximize the use of U.S.-flag vessels when shipping U.S. government owned or sponsored cargoes. Where necessary, the program also determines fair and reasonable guideline rates for the shipment of preference cargoes so that the Federal government is not charged excessive costs. Funding for this program enables the transport of U.S. food aid cargoes by U.S.-flag vessel operators. Without this business, the U.S.-flag carriers cannot effectively compete with foreign flag carriers due to higher U.S. labor costs and more rigorous U.S. safety, environmental and operating requirements. These laws help to ensure the existence of a significant portion of the U.S.-flag fleet operating in foreign commerce. The ocean freight revenue provided to the entire US-flag merchant fleet by the cargo preference program provides an economic incentive to remain under the U.S. flag to support our nation's global connectivity, the mobility of our goods and people, and our economic and defense needs. Depending on corporate size and a carrier's world trading areas, preference cargo accounts for between 10 to 50 percent of a carrier's base cargoes.

FY 2008 Base:

The base consists solely of freight differential funding used to reimburse the USDA's Commodity Credit Corporation for the increased cost of shipping agricultural cargoes on U.S.-flag ships versus foreign flag ships.

Anticipated FY 2008 Accomplishments:

MARAD will continue to seek legislative approval to give the Secretary of Transportation enforcement authority for the cargo preference laws. As indicated in MARAD's and Program Assessment and Rating Tool (PART) review for the food aid portion of the Cargo Preference program, lack of such authority results in agencies failing to comply with the laws. MARAD will continue to hold public meetings and solicit inputs from all stakeholders and customers of all our programs as part of the promotion of U.S.-flag vessels. MARAD will work with the Export-Import Bank on a working capital loan guarantee program for commercial cargoes that are carried on U.S.-flag vessels. MARAD expects to continue to increase the use of electronic methods to receive and exchange data and information with other Agencies, shippers and the public. We will continue working with U.S. Department of Agriculture (USDA) and the U.S. Agency for International Development (USAID) to encourage them to adopt the recommendations of the GAO-07-560 report to improve the efficiency of food aid logistics.

FY 2009 Budget Request:

MARAD requests an estimated \$175.0 million in new borrowing authority in order to pay the Department of Agriculture's Commodity Credit Corporation to offset the additional cost to ship humanitarian food aid cargo on U.S.-flag vessels versus foreign-flag vessels in FY 2009, in accordance with the Food Security Act of 1985.

The Cargo Preference program conducted a PART review for the Food Aid portion of the program in support of the FY 2008 budget submission. The program received an overall score of 75, or 'moderately effective'. OMB's PART recommendations and MARAD's actions are discussed in the Performance Overview. The staff and support funding requested in the MARAD Operations portion of this budget will serve to assist the Food Aid portion of the Cargo Preference program meet the performance measure targets identified in the PART. The Ocean Freight Differential [Food Aid] performance measures are listed in the 'Budget Request by Performance Goals' section of this budget under the Global Connectivity strategic goal.

READY RESERVE FORCE

Program and Performance Statement

The Ready Reserve Force (RRF) is comprised of Government-owned, U.S.-flag merchant ships which are part of the National Defense Reserve Fleet (NDRF), and are maintained in an advanced state of readiness to meet surge sealift requirements during a national emergency. The Ready Reserve Force program is managed by MARAD with resources provided by reimbursement from the Department of Defense that are reflected in MARAD's Vessel Operations Revolving Fund.

VESSEL OPERATIONS REVOLVING FUND

Program and Performance Statement

The Maritime Administration (MARAD) is authorized to reactivate, maintain, operate, and deactivate government-owned merchant vessels comprising the National Defense Reserve Fleet (NDRF) and the Ready Reserve Force (RRF), a subset of the NDRF. Resources for RRF vessel maintenance, preservation, activation and operation costs, as well as RRF infrastructure support costs and additional DOD/Navy-sponsored sealift activities and special projects, are provided by reimbursement from the Defense Sealift Fund. MARAD incurs similar obligations for government-owned merchant vessels outside the RRF fleet and for the charter of privately-owned merchant vessels, the cost of which is likewise provided by reimbursement from sponsoring Federal agencies.

In addition, the fund is used by MARAD to finance the acquisition, maintenance, preservation, protection and use of merchant vessels involved in mortgage foreclosure or collateral forfeiture proceedings instituted by the Federal Government and not financed by the Federal Ship Financing Fund or the Maritime Guaranteed Loan Program; and to finance the acquisition and disposition of merchant vessels under the Trade-In/Scrap Out program. Direct appropriations for the disposal of obsolete government-owned merchant vessels are provided to a separate account within the ship disposal program.

FEDERAL SHIP FINANCING FUND LIQUIDATING ACCOUNT

Program and Performance Statement

The Merchant Marine Act of 1936, as amended, established the Federal Ship Financing Fund to support the U.S. merchant marine by guaranteeing vessel construction loans and mortgages on U.S.-flag vessels built in the United States shipyards. No new commitments for vessel construction loan guarantees are provided by the Federal Ship Financing Fund for 2009 because this Fund is used to underwrite only those guarantees made under the Title XI loan guarantee program prior to 1992.

MARITIME GUARANTEED LOAN (TITLE XI) PROGRAM ACCOUNT

Program and Performance Statement

This program provides guaranteed loans for purchasers of ships from the U.S. shipbuilding industry and for modernization of U.S. shippards.

As required by the Federal Credit Reform Act of 1990, this account includes the subsidy costs associated with the loan guarantee commitments made in 1992 and subsequent years, and the administrative expenses of this program. The subsidy costs are estimated on a present value basis; the administrative expenses are estimated on a cash basis

Funds for administrative expenses for the Title XI program are appropriated to this account, then transferred to and merged with the Operations and Training account. No new funds for loan guarantees are requested for 2009.

- 7/ Transferred from Highway Priority Projects (Section 113).
- 8/ MARAD did not request any direct appropriated funding to administer the Title XI program during FY 2008. Instead, MARAD proposed to transfer \$3.422 million of the unobligated balance in the Maritime Guaranteed Loan Program Account and merge it with the appropriation for Operations and Training.

Detailed Justification for Administrative Expense (Title XI)

Maritime Guaranteed Loans (Title XI)

FY 2009 Request: \$3.531million

Overview:

The Maritime Guaranteed Loan (Title XI) Program was created to provide a Federal guarantee of private sector debt for domestic ship construction and shipyard modernization. Title XI is designed to foster and sustain the U.S. shipbuilding and repair industry and support the continued existence of a U.S. merchant marine by supporting new ship construction in U.S. shipyards. Vessels financed by the Title XI program directly contribute to the ability of the United States to carry its domestic and foreign waterborne commerce. Shipyard activity spurred by the Title XI program assists U.S. shipyards in maintaining a skilled workforce to meet shipbuilding needs during times of war or national emergency.

FY 2008 Base:

The base consists of salaries and benefits, a share of MARAD Headquarters operational costs such as rent, utilities, etc, and subsidy funds for the Title XI loan program.

Anticipated FY 2008 Accomplishments:

MARAD will continue to increase its efficiency in monitoring the Title XI loan guarantee portfolio of \$2.7 billion. The computerized monitoring system implemented during FY 2007 will be enhanced throughout FY 2008 to increase the system's overall effectiveness. The system is expected to improve several aspects of program administration including portfolio and asset management - including tracking the insurance and vessel classification certificates for vessels and shipyards financed by the Title XI program. In addition, the system will help reduce the amount of time necessary to perform the required financial analysis of each Title XI loan guarantee. For this reason, the program expects to increase the percentage of Title XI projects for which a financial review is completed and documented within 30 days of receiving the financial reports to 75 percent.

MARAD will work closely with shipowners to avoid new defaults. The Title XI program has not experienced a defaulted loan guarantee in over five years. However, in any instances of default, MARAD will incorporate its new policies on handling defaulted assets to insure a maximum recovery on secured assets.

Additionally, MARAD will process applications for new Title XI guarantees. MARAD will work to maximize the amount of projects that it can finance by approving projects that have a lower expected cost to the Government and therefore utilize less subsidy funds.

FY 2009 Budget Request:

Maritime Guaranteed Loan Program (\$000)					
FY 2008 Salary Non-Salary Increases/ FY 2000 Program Enacted Adjustment * Inflation Decreases Reques					
Salary and Benefits	3,408	123	0	0	3,531
Subsidy Funding	5,000	<u>O</u>	0	<u>-5,000</u>	<u>0</u>
TOTAL	8,408	123	0	-5,000	3,531

^{*} Includes Annualization of 2008 Pay Raises, 2009 Salary Increases, and One Less Compensable Day

MARAD requests \$3.531 million for the program administration of the Title XI program in FY 2009. No new subsidy funds are requested for new loan guarantees for ship construction. The administrative funding will enable the Title XI program to comply with the Federal Credit Reform Act and the DOTIG and GAO recommendations on portfolio management. These administrative funds will be utilized to manage the existing portfolio.

The Title XI program conducted a Program Assessment Rating Tool (PART) review in support of the FY 2008 budget submission. The Title XI program received an overall score of 83, or 'moderately effective'. OMB's PART recommendations and MARAD's actions are discussed in the Performance Overview. The funds requested in this budget will allow the Title XI program to meet the performance measure targets identified in the PART. The Title XI performance measures are listed in the 'Budget Request by Performance Goals' section of this budget under the Reduced Congestion strategic goal.

MARITIME GUARANTEED LOAN (TITLE XI) FINANCING ACCOUNT

Program and Performance Statement

As required by the Federal Credit Reform Act of 1990, this non-budgetary account records all cash flows to and from the Government resulting from loan guarantee commitments in 1992 and subsequent years. The amounts in this account are a means of financing and are not included in the budget totals.

ADMINISTRATIVE PROVISIONS

ADMINITRATIVE PROVISIONS – maritime administration

- SEC. 175. Notwithstanding any other provision of this Act, the Maritime Administration is authorized to furnish utilities and services and make necessary repairs in connection with any lease, contract, or occupancy involving Government property under control of the Maritime Administration, and payments received therefore shall be credited to the appropriation charged with the cost thereof: *Provided*, That rental payments under any such lease, contract, or occupancy for items other than such utilities, services, or repairs shall be covered into the Treasury as miscellaneous receipts.
- SEC. 176. No obligations shall be incurred during the current fiscal year from the construction fund established by the Merchant Marine Act, 1936 (46 U.S.C. 53101 note (cds)), or otherwise, in excess of the appropriations and limitations contained in this Act or in any prior appropriations Act.

SEC. 177. Section 51509 of title 46, United States Code, is amended in subsection (b) by deleting "\$4,000" and inserting in lieu thereof "\$8,000" and by inserting "tuition," after "uniforms,". (Department of Transportation Appropriations Act, 2008.)

Explanations

- SEC. 175. This provision allows MARAD to utilize the receipts received under a lease, contract, or occupancy involving MARAD property. The utilization of these receipts would credit the appropriation charged for furnishing utilities and services and make necessary repairs.
- SEC. 176. This provision prohibits MARAD from obligating receipts from Ship Construction activity, however these funds are deposited into that account.
- SEC. 177. This provision increases the Student Incentive payments to \$8,000 as well as confirming tuition as a valid utilization of resources.

PERFORMANCE OVERVIEW

Annual Performance Results and Targets

The Maritime Administration integrates performance results into its budget request to demonstrate alignment with the Department of Transportation's Strategic Plan. The Maritime Administration tracks the following DOT level performance measures to demonstrate program results:

Security, Preparedness and Response strategic goal / Defense Mobilization performance goal – Effective response to emergencies affecting the transportation sector

Availability of DOD-required shipping capacity, complete with						
crews	2004	2005	2006	2007	2008	2009
Target	94%	94%	94%	94%	94%	94%
Actual	94%	95%	93%	97%		

Security, Preparedness and Response strategic goal / Defense Mobilization performance goal – Effective response to emergencies affecting the transportation sector

Availability of DOD-designated						
commercial ports for military use	2004	2005	2006	2007	2008	2009
Target	92%	93%	93%	93%	93%	93%
Actual	93%	87%	100%	100%		

Detailed performance budget information can be found in Section 4 of the budget.

Program Assessment Rating Tool (PART) Assessment

PART was developed by the Office of Management and Budget to provide a standardized way to assess the effectiveness of the Federal Government's portfolio of programs. The structured framework of PART provides a means through which programs can assess their activities differently than through traditional reviews. The following Maritime Administration programs have been assessed via the PART:

<u>Program</u>	PART Cycle	Yr Reviewed	Score	OMB Assessment
Maritime Security Program	FY 2006	2004	91	Effective
USMMA	FY 2007	2005	83	Moderately Effective
State Maritime Schools	FY 2007	2005	89	Effective
Title XI	FY 2008	2006	83	Moderately Effective
Ship Disposal	FY 2008	2006	88	Effective
Ocean Freight Differential	FY 2008	2006	75	Moderately Effective

Maritime Security Program Analysis:

Findings:

- MSP is an effective program that targets its resources to vessels that are militarily useful in times of need. It replaced complicated reimbursement schemes in a predecessor program with a set per vessel subsidy capped by law.
- The program needs to employ a better metric to track program execution. Commercial sealift capacity may not be sufficient in times of war or national emergency based on the current mix of vessels enrolled in the program.

The Maritime Administration is taking the following actions to improve the performance of the program:

1. Monitoring MSP agreements and, when appropriate, modifying those agreements, including substitution of vessels with DOD approval, to ensure that the MSP is meeting DOD's needs.

Action taken, but not completed

USMMA Analysis:

Findings:

- The United States Merchant Marine Academy has a clear purpose to produce well-qualified merchant marine officers who are obligated to serve a set number of years in a reserve component of the US Armed Forces and to work in maritime-related employment.
- The Academy needs to improve its ability to achieve its performance goals and demonstrate cost effectiveness, particularly in comparison with other programs that have a similar purpose and goals.

The Maritime Administration is taking the following actions to improve the performance of the program:

- 1. Developing additional efficiency measures to demonstrate improved cost effectiveness that are easily comparable with other, similar education programs.
 - Action taken, but not completed
- 2. Developing policies and procedures to allocate USMMA resources strategically. Action taken, but not completed

State Maritime Schools Analysis:

Findings:

- The State Maritime School program effectively targets Federal resources in a well-defined, cost-shared partnership with the State maritime academies to produce highly qualified officers for the US merchant marine. Of the 370 graduates in 2005, 29 accepted tuition aid stipends requiring post-graduate commitments for maritime industry employment and active military reservist status.
- Budget requests need to be more explicitly tied to the accomplishment of performance goals. The program must better demonstrate improved effectiveness from year to year with emphasis on supplementary performance measures identified in the PART.

The Maritime Administration is taking the following actions to improve the performance of the program:

- 1. Producing performance-based budget materials for the State maritime schools portion of future budgets.
 - Action taken, but not completed
- 2. Reporting annually on existing efficiency measure results by early October of each fiscal year.

Action taken, but not completed

Ocean Freight Differential Analysis:

Findings:

- In accordance with national economic and security policies, the program provides an
 economic incentive to owners of US-flag merchant vessels to maintain their US registry.
 Food aid grants to foreign nations represent 30 percent of all preference cargoes.
 Participation remains significant: approximately 90 percent of US-flag vessels carry food aid cargoes.
- The backlog of payments in arrears to federal agencies shipping food aid to foreign beneficiaries has been correct and made current. A prompt payment process has been established and further process upgrades are being tested in pilot programs.
- Compliance with cargo preference law impacts the flexibility of the delivery of foreign food aid. There is interagency disagreement regarding both the interpretation of and compliance with cargo preference law. In the absence of enforcement authority, accountability for minimum standard compliance has devolved to the courts.

The Maritime Administration is taking the following actions to improve the performance of the program:

- 1. Completing an evaluation with partner government agencies on the efficacy of an electronic vendor payment system to further improve the payment process.
 - Action taken, but not completed
- 2. Negotiating policies that reduce flexibility challenges in the administration of foreign food aid in compliance with cargo preference law.
 - Action taken, but not completed
- 3. Joining with partner government agencies to develop revised regulations to improve compliance rates with cargo preference law and minimize litigation from supply chain partners in the private sector.

Action taken, but not completed

Ship Disposal Analysis:

Findings:

• There are approximately 120 obsolete government-owned merchant-type ships currently scheduled for disposal and an average of eleven vessels are added to the program's non-

- retention inventory each year. An ongoing program is needed to dispose of these vessels and to protect the environment from the hazardous materials used in their construction and operation.
- Dismantling/recycling contracting is the most commonly available disposal method. Although regulatory constraints and deficit market capacity limit the number of ships that can be contractor for dismantling in a given fiscal year, all 40 ships in the program designated as high priority based on hull deterioration and potential for environmental contamination have been removed from the fleet.
- The program has successfully reduced average cost in dismantling contracts to less than \$100 per ton through efforts to qualify additional domestic contractors to participate in compliance with environmental regulations and to pursue dismantling contracts with a qualified United Kingdom contractor.

The Maritime Administration is taking the following actions to improve the performance of the program:

1. Seeking innovative ways to sustain or increase the rate of ship removal and thereby reduce overall fleet size in compliance with both Congressional and public preference.

Action taken, but not completed

Guaranteed Loan Program (Title XI) Analysis:

Findings:

- The program addresses a specific and existing problem. Long-term financing at attractive interest rates is not generally available from domestic commercial lending sources due to risk inherent in the cyclical nature of the shipping industry.
- Independent evaluations of the program reported the need for additional controls and reforms to improve the management of the program and its loan portfolio. Subsequent evaluations have recognized implementation of recommended controls and reforms. The program has not experienced a default in three fiscal years.
- In 2005, the most recent year in which guaranteed loan activity occurred, the program directly stimulated approximately \$178 million in U.S. shippard activity, approximately five dollars for each dollar of credit subsidy expended.

The Maritime Administration is taking the following actions to improve the performance of the program:

- 1. Implementing a comprehensive computerized portfolio monitoring system to improve performance of the financial statement review goal to at least baseline level.
 - Action taken, but not completed
- 2. Reassessing shipyard leverage performance measures and goals when appropriations are provided for subsidized lending activity.

No action taken

REDUCED CONGESTION

This funding request contributes to the achievement of the DOT Reduced Congestion strategic goal and specifically to the DOT outcome to reduce impediments to the efficient movement of freight over the transportation network, especially at key freight gateways.

The FY 2009 request for \$14.588 million reflects a reduction of \$16.132 million from the FY 2008 enacted budget. MARAD will work to strengthen and improve the Maritime Transportation System (MTS), to relieve pressure on highways by helping to increase the use of our nation's waterways. MARAD will continue to administer the Capital Construction Fund (CCF) and Construction Reserve Fund (CRF) to allow ship operators to use their own funding to create new shipbuilding opportunities which will lead to more modern vessels in the U.S. fleet. MARAD will also assist in the design of ships for Federal services and improvement of shipbuilding processes at U.S. shipyards. Ultimately, all of these programs assist in creating improved waterborne methods for shipping cargo and reducing congestion.

The following table outlines the resources requested to achieve this outcome:

Maritime Administration Appropriations, Obligation Limitations, & Exempt Obligations (\$000)

The 'Admin Support' line under MARAD Operations in the above table displays the 'supports all goals' staff and support costs that are attributable to the accomplishment of this strategic goal. As a result, the table shows the full costs of our efforts to achieve this strategic goal.

PERFORMANCE ISSUE

Our current physical maritime transportation infrastructure will not accommodate the cargo volume growth predicted for the U.S. in the near future. Should any component of the current maritime system break down, more than one-fourth of the national economy would be crippled. There is a need for more efficient Federal coordination to improve the systemic movement of people and freight, alleviate congestion, and plan for better land use. Government must work more effectively with private industry to improve the capability of the Marine Transportation System (MTS). Improvements in vessels and shipyards are also needed as they are a significant element of the MTS.

Vessels financed by the Title XI maritime guaranteed loan program directly contribute to the ability of the Unites States to carry its domestic and foreign water-borne commerce. Shipyard activity spurred by the Title XI program helps industry build newer, more modern vessels and assists U.S. shipyards in maintaining a skilled workforce to meet shipbuilding needs during times of war or national emergency. MARAD's Capital Construction and Construction Reserve funds assist industry operators in accumulating their own private capital to build, acquire, and reconstruct vessels through the deferral of Federal income taxes on certain deposits. Both of these programs enable the building of more modern and efficient U.S.-flag vessels and therefore encourage the renewal of the U.S.-flag fleet.

ANTICIPATED FY 2008 ACCOMPLISHMENTS

- MARAD will promote increased usage of waterways to alleviate congestion and will
 participate in Departmental efforts to reduce congestion at our National Freight Gateways
 and through our support of the Department's 'Corridors of the Future' program.
- MARAD will support the Committee on the Marine Transportation System (CMTS) in its efforts to create a partnership of all Federal agencies with responsibility for the MTS [waterways, ports, and their intermodal connections] in order to ensure the development and implementation of national MTS policies consistent with national needs.
- MARAD will work closely with ship owners to avoid new Title XI defaults. The Title XI program has not paid off on a defaulted loan guarantee since FY 2002.

FY 2009 PERFORMANCE BUDGET REQUEST

MARAD requests a total of \$3.743 million for staff salaries and support to continue port and MTS improvement activities, a decrease of \$1.328 million from the FY 2008 enacted budget. This amount includes an additional \$0.3 million to support the ongoing activities of the CMTS, an interagency task force created by the President's Oceans Plan, to support coordinated maritime policy, this includes the salary of the SES executive managing the program within MARAD; \$0.2 million to partner with the University of Delaware (UDEL) and the Rochester Institute of Technology (RIT) to develop a Freight Routing Energy and Emissions Analysis Tool (FREAT) for I-95 Corridor cargo movements; and, \$0.311 million to obtain the services of a contractor to assist in the review, approval and implementation of Marine Highway Pilot Projects, promote the use of the Marine Highway (including ferries), and pursue solutions to barriers and disincentives, including environmental, financial and infrastructure related issues.

In FY 2009, MARAD plans to produce its first biennial report on the condition and performance of the marine transportation system, including the development of standardized system metrics and productivity measures. This report will provide the impetus for the development and refinement of a national gateway port and international trade corridor strategy. In addition, MARAD will analyze transportation solutions that will have a nationwide impact on reducing congestion, such as ideas for: reducing dwell time; developing productivity measures; implementing chassis pooling, appointment systems, and more port continuous operations; improving the use of new technology; improving job assignment systems, and improving the availability of on-dock rail. MARAD will also review, approve and implement Marine Highway Pilot Projects and promote the use of the Marine Highway by pursuing solutions to present environmental, financial and infrastructure-related barriers and disincentives.

MARAD requests \$3.531 million for the program administration of the Title XI program and \$0.618 million for staff salaries and support to continue administering the Capital Construction and Construction Reserve funds.

The Title XI program conducted a Program Assessment Rating Tool (PART) review in support of the FY 2008 budget submission. The Title XI program received an overall score of 83, or 'moderately effective'. OMB's PART recommendations and status for the Title XI program are discussed in the Performance Overview. The funds requested in this budget will allow the Title XI program to meet the performance measure targets identified in the PART and listed below.

MTS Improvement Performance Measures

Marine Highway Outreach

Number of localities reached through Maritime Administration outreach efforts who subsequently take concrete steps towards expanding the use of the marine highway. (Annual – Outcome)

GLOBAL CONNECTIVITY

This funding request contributes to the achievement of the DOT Global Connectivity strategic goal and specifically to the DOT outcomes to enhance the competitiveness of U.S. transport providers and manufacturers in the global marketplace and to provide for safer, more efficient and cost effective movement of cargo through U.S. ports of entry.

The 2009 request seeks \$13.202 million to allow MARAD to operate programs that enhance maritime transport between the U.S. and other countries, improve and expand our intermodal connections with other countries, and keep a U.S. presence in international shipping markets. This is an increase of \$0.236 million from the FY 2008 enacted budget. MARAD will negotiate bilateral maritime agreements that create or maintain equal shipping relations between the U.S. and several important trading partners. MARAD will be in the forefront of efforts to improve intermodal connections at our ports through its efforts to issue deepwater port licenses that create additional entry points for Liquid Natural Gas (LNG) into the U.S. Finally, MARAD will continue to conduct the cargo preference program by informing Federal agencies and contractors of the requirements implemented by the U.S. cargo preference laws and making differential payments to the USDA to offset the higher costs of shipping on U.S.-flag ships versus foreign flag ships. These payments keep U.S.-flag ships operating in international trade. These ships are available for DOD use if needed in times of emergency.

PERFORMANCE ISSUE

A multi-faceted approach is necessary to improve the connectivity of the U.S. marine transportation system with the global transportation system. MARAD must work to eliminate market access restrictions between the U.S. and other countries, improve and expand our intermodal connections with other countries, and keep a U.S. presence in international shipping markets.

The U.S. maritime industry must contend with the anticompetitive barriers imposed by foreign governments that restrict market access. These restrictions impinge on U.S. maritime companies' access to foreign transportation markets, add to costs, limit revenues, impede efficient operations and negatively impact the profitability of the U.S. maritime industry in international trade. Removal of anticompetitive barriers improves the operating efficiency of U.S. shipping companies and improves U.S. carriers' participation in the carriage of U.S. international trade. Enhancing the competitiveness of U.S. transport providers and manufacturers in the global marketplace is a key outcome of the Department's Global Connectivity strategic goal.

MARAD has responsibility for the processing and licensing of deepwater port applications for the importation of liquefied natural gas (LNG) into the United States. Overall, the Department of Energy projects that from 2006 to 2025, U.S. natural gas consumption will increase from 22.3 to 30.6 trillion cubic feet (tcf), or 37%, with all of this increase supported through importation of LNG. LNG imports are projected to become the primary source of the Nation's supply of natural gas. The development and construction of additional offshore deepwater port LNG facilities will reduce vessel traffic and congestion in our U.S. landside ports; improve the efficiency of the transport of imported LNG within the U.S.; expand our intermodal connections with other countries; and, create an additional level of security for our nation's energy industry by moving LNG import connections offshore. These benefits will help the Department make progress on its desired outcomes for the Reduced Congestion, Global Connectivity and Security, Preparedness and Response strategic goals.

MARAD's cargo preference program ensures compliance by both Federal agencies and shippers with cargo preference laws designed to maximize the use of U.S.-flag vessels when shipping U.S. government owned or sponsored cargoes. These cargo preference laws help to ensure the existence of a U.S.-flag fleet operating in foreign commerce that is also available for defense sealift in times of emergency. The existence of a U.S.-flag fleet also gives the United States a seat in the numerous international organizations that affect the operation of the global transportation system.

ANTICIPATED FY 2008 ACCOMPLISHMENTS

MARAD will work as part of the U.S. team in a variety of international organizations to
advocate the U.S. position with regard to international maritime economic and policy
issues, such as mariner training requirements, ship recycling standards and new ballast
water treatment standards.

- MARAD expects to complete the review process required by the Deepwater Port Act for several Deepwater Port applications.
- MARAD will continue to seek legislative approval to give the Secretary of Transportation enforcement authority for the cargo preference laws.

FY 2009 PERFORMANCE BUDGET REQUEST

MARAD requests \$0.866 million for staff salaries and support in order to continue our international activities, an increase \$0.018 million from the FY 2008 enacted budget.

MARAD requests \$1.226 million to support the overall program management and oversight of the Deepwater Port Licensing program, an increase of \$0.026 million from the FY 2008 enacted budget.

MARAD requests \$3.89 million for staff salaries and support in order to continue cargo preference activities, an increase of \$0.103 million from the FY 2008 enacted budget. MARAD also requests an estimated \$195 million in new borrowing authority to pay the Department of Agriculture's Commodity Credit Corporation to partially offset the additional cost to ship humanitarian food aid cargo on U.S.-flag vessels versus foreign-flag vessels in FY 2008, in accordance with the Food Security Act of 1985.

The Cargo Preference program conducted a PART review for the Food Aid portion of the program in support of the FY 2008 budget submission. The program received an overall score of 75, or 'moderately effective'. OMB's PART recommendations and status for the Food Aid portion of the Cargo Preference program are discussed in the Performance Overview. The funds requested in this budget will allow the Cargo Preference program to meet the performance measure targets identified in the PART and listed below.

ENVIRONMENTAL STEWARDSHIP

This funding request contributes to the achievement of DOT Environmental Stewardship strategic goal and specifically to the DOT outcome to reduce pollution and other adverse environmental effect from transportation and transportation facilities.

In the maritime arena, three important areas must be addressed in order to make progress towards reducing pollution and the adverse environmental effects of transportation and transportation facilities: obsolete vessel disposal, achieving compliance with Nuclear Regulatory Commission (NRC) nuclear licensing requirements for the Nuclear Ship (NS) SAVANNAH and advancing progress on reducing marine air emissions and treating ballast water. MARAD requests a total of \$19.964 million to fund these programs, an increase of \$1.224 million from the FY 2008 enacted budget.

MARAD will continue to give priority to disposing of obsolete ships in the worst condition and in FY 2009 expects to award contracts for the disposal of 12 ships, remove 14 ships from the fleet sites, and complete the disposal of 15 ships. The request also allows MARAD to continue activities required to bring the NS SAVANNAH into conformance with NRC SAFSTOR standards.

MARAD plans to continue partnering with other government and/or private entities to conduct research to reduce marine-sourced air emissions and to determine the best method for treating ballast water discharges.

The resources requested to achieve this goal are:

PERFORMANCE ISSUE

In order to achieve success in reducing pollution and the adverse environmental effects of transportation and transportation facilities, MARAD must make progress with ship disposal, achieving compliance with NRC nuclear licensing requirements for the NS SAVANNAH, and reducing marine air emissions and treating ballast water.

MARAD is the U.S. government's disposal agent for merchant-type vessels 1,500 gross tons or more and has custody of a fleet of over one hundred obsolete ships owned by the Federal government. Some of these ships pose a risk to the surrounding environment and must be disposed of properly.

The NS SAVANNAH is owned and maintained by MARAD. Its nuclear power plant is licensed as a commercial power reactor (inoperable/possession-only) by the NRC. In order to protect the environment from radioactive materials, MARAD must adhere to licensing requirements for the NS SAVANNAH reactor as prescribed by NRC regulations and the statutory provisions of the Atomic Energy Act of 1954, as amended.

The impact of marine transportation on the human and natural environment has become more evident particularly in port and coastal communities, which are feeling the brunt of environmental quality impact from marine transportation activities. At the same time, marine transportation is expected to grow considerably due to increased use of our nations waterways for freight and passenger movement. Marine-related environmental impacts will therefore become more profound. The environmental impacts of marine transportation must be adequately anticipated and addressed or they will adversely affect the nation's economic growth and quality of life.

ANTICIPATED FY 2008 ACCOMPLISHMENTS

- MARAD plans to remove 16 obsolete vessels from the National Defense Reserve Fleet (NDRF) for disposal, complete disposal of 16 vessels and award disposal contracts for 12 vessels.
- MARAD expects to pursue artificial reefing initiatives with the EPA and deep sinking of ships with the U.S. Navy.
- Working with the NRC, MARAD expects to come into full compliance with our license requirements for the NS SAVANNAH during FY 2008.

Key air emissions reduction research efforts to be completed in FY 2008 include:

• Second phase of marine-specific emissions economic incentive study;

- Identification of interagency freight transport emissions modal comparison tool;
- Alternative Marine Power technology transfer.

FY 2009 PERFORMANCE BUDGET REQUEST

MARAD requests \$15.0 million to support the continuation of obsolete ship disposal activities. This is an increase of \$1.0 million from the FY 2008 enacted budget. Funding at this level will continue to decrease the number of ships in our obsolete vessel inventory and lessen the environmental risk at the fleet sites.

The request includes \$3.0 million to continue activities required to bring the NS SAVANNAH into conformance with NRC SAFSTOR standards. This is the same as the FY 2008 enacted budget.

MARAD requests \$1.964 million for staff salaries and support to continue our maritime-related environmental activities. This represents an increase of \$0.224 million over the FY 2008 enacted budget. Included in this request is \$0.2 million to partner with the University of Delaware (UDEL) and the Rochester Institute of Technology (RIT) to develop a Freight Routing Energy and Emissions Analysis Tool (FREAT) for I-95 Corridor cargo movements

The ship disposal program conducted a Program Assessment Rating Tool (PART) review in support of the FY 2008 budget submission. The ship disposal program received an overall score of 88, or 'effective.' OMB's PART recommendations and status for the ship disposal program are discussed in the Performance Overview. The funds requested in this budget will allow the ship disposal program to meet the performance measure targets identified in the PART and listed below.

Ship Disposal Program Performance Measures

Environmental Programs Performance Measure

Obsolete Ship Hulls Surveyed

Number of obsolete hulls surveyed for the abundance/type of aquatic invasive species. (Annual - Output)

	2007	2008	2009
Target:	N/A	8	6

Actual: 8

SECURITY, PREPAREDNESS AND RESPONSE

This funding request contributes to the achievement of the DOT Security, Preparedness and Response strategic goal and specifically to the two DOT performance measures shown below. These measures demonstrate the results of our efforts to ensure the availability of sufficient contingency sealift and commercial outload ports for DOD mobilization requirements.

DOT Performance Measures:

Availability of Ships with Crews

Percentage of DOD-required shipping capacity, complete with crews, available within mobilization timelines. (Long term - Outcome)

<u> 2002</u>	<u>2003</u>	<u> 2004</u>	<u>2005</u>	<u> 2006</u>	<u> 2007</u>	<u> 2008</u>	<u>2009</u>
Target: 93				94		-	94
Actual: 94	96	94	95	93	97		

Strategic Port Availability

Percentage of DOD-designated commercial ports available for military use within DOD established readiness timelines. (Long term - Outcome)

<u>2002</u>	<u>2003</u>	<u> 2004</u>	<u> 2005</u>	<u> 2006</u>	<u> 2007</u>	<u> 2008</u>	<u>2009</u>
Target: 92	92	92	93	93	93	93	93
Actual: 92	86	93	87	100	100		

The request seeks \$264.165 million for security activities designed to achieve the above DOT performance measures, an increase of \$14.61 million from the FY 2008 enacted budget. The Ready Reserve Force (RRF) will continue provide surge capacity to quickly bring supplies to the point of conflict and some sustainment capacity to support continued operations. The Maritime Security Program (MSP) and Voluntary Intermodal Sealift Agreement (VISA) programs provide sustainment sealift via commercial, U.S.-flag vessels. MSP is an asset management program, not a customer service program. MARAD's goal is to provide support to DOD by managing all of these maritime assets and resources so that at any one time, 94 percent of those assets [representing sealift capacity with crews] are available for use by DOD.

MARAD will continue to support mariner-training programs to ensure that trained mariners are available to crew the U.S.-flag fleet and work throughout the maritime industry. Many of these mariners are also Merchant Marine reservists available to the Navy in times of emergency. The U.S. Merchant Marine Academy will receive additional funds to make various improvements to the midshipman and instructional programs.

MARAD will also continue to conduct strategic commercial port activities help to ensure the availability of these ports for DOD use in times of emergency and will continue to issue war risk insurance binders that allow commercial ships to enter war zones.

The following table outlines the resources requested to achieve this goal:

	Maritime A	dministration

Baseline Changes:

The 'Admin Support' line under MARAD Operations in the above table displays the 'supports all goals' staff and support costs that are attributable to the accomplishment of this strategic goal. As a result, the table shows the full costs of our efforts to achieve this strategic goal.

PERFORMANCE ISSUE

The availability of shipping capacity is determined by a number of different factors: availability of commercial vessels, availability of government-owned sealift vessels, availability of qualified mariners to crew these vessels, and the availability of war risk insurance coverage for vessels entering a war zone. All of these factors must be managed properly in order to support DOD's mobilization requirements.

The Maritime Security Act of 2003 authorized 60 ships for the Maritime Security Program and up to a \$2.9 million payment per ship in FY 2009. The Maritime Security Program (MSP) ensures that the United States will have U.S.-flag commercial vessels and intermodal assets to support Department of Defense (DOD) operations. DOD uses Voluntary Intermodal Sealift Agreements (VISA) with commercial carriers [70 percent are enrolled in MSP] to pre-plan the availability of militarily useful vessels for DOD use in times of emergency. VISA is DOD's official sealift emergency preparedness program. All ships enrolled in VISA must commit certain percentages of their vessel capacity and use of their related intermodal transportation resources to DOD. This capacity helps the Department meet its performance goal for the availability of ships with crews.

The DOT-owned Ready Reserve Force (RRF) is completely funded on a reimbursable basis by the Navy. The RRF ships are an important component of the Department's ability to achieve its performance goals for defense mobilization. They also now serve as an important asset supporting the Department's emergency preparedness and disaster response activities. The RRF is composed of ships with special capabilities that can carry or offload heavy and oversized military cargoes which regular U.S. flag commercial cargo ships cannot. RRF ships meet approximately half of the U.S. Transportation Command's surge sealift requirement. Without the RRF ships, the Department of Defense (DOD) would have insufficient sealift capacity in times of emergency.

Ship capacity, both commercial and government-owned, is only part of the defense mobilization equation. These ships must be operated by skilled crews. MARAD supports the training of new merchant marine officers by operating the U.S. Merchant Marine Academy (USMMA) and providing partial support of the six State Maritime Schools (SMS). The USMMA and SMS are the principal source of new unlimited license merchant marine officers. Licensed mariners are needed by DOD during national emergencies not only for crewing purposes, but also to provide shore side support for sealift operations.

In order to enter war zones, commercial vessels require specific war risk insurance binders. MARAD issues these binders because regular commercial marine insurance will not cover losses resulting from war or warlike actions. Without this program, the Department of Defense could not rely on commercial ships for sealift during an emergency.

ANTICIPATED FY 2008 ACCOMPLISHMENTS

- MARAD plans to maintain full enrollment of 60 ships in the Maritime Security Program.
- MARAD plans to conduct an open season for Voluntary Intermodal Sealift Agreement enrollment in May 2008.
- The United States Merchant Marine Academy plans to graduate approximately 219 merchant marine officers in June 2008.
- For the academic year 2006-2007, 479 students graduated from the State Maritime School unlimited license program, a four percent increase over the 2005-2006 academic year. Similar numbers are anticipated for the 2008-2009 academic year.
- The major training ship maintenance accomplishments expected in FY 2008 include: the dry docking of TS STATE of MICHIGAN; the dry docking of the TS GOLDEN BEAR; the completion of the TS STATE of MAINE main propulsion automation system (a multi-phased project); and replacement of the TS STATE of MICHIGAN main propulsion automation system.
- MARAD plans to continue managing the War Risk Insurance program and carry over all
 or as many of the vessels currently under war risk insurance policies as DOD requires
 to sustain Iraq and Afghanistan nation rebuilding efforts.

FY 2009 PERFORMANCE BUDGET REQUEST

MARAD requests \$174.0 million for MSP in order to fund 60 ships in the MSP fleet in FY 2009. This request funds the authorized level of \$2.9 million per ship as specified in current MSP contracts. MARAD requests \$2.169 million for staff salaries and support in order to continue MARAD's involvement with the VISA program and vessel transfer activities, an increase of \$0.026 million from the FY 2008 enacted budget.

MARAD requests \$0.921 million for salary and support costs for the oversight and management of mariner education and training programs, an increase of \$0.021 million from the FY 2008 enacted amount. The Academy's FY 2009 budget request of \$61.358 million represents a decrease of \$1.388 million from the FY 2008 enacted budget.

MARAD requests a total of \$10.987 million to continue Federal support of the State Maritime Schools (SMS), a decrease of \$2.195 million from the FY 2008 enacted budget. Included within the request is \$1.881 million is to continue direct payments to the SMS resulting in payments to each school of \$313,500, \$0.8 million for Student Incentive Payments and \$8.306 million to address all required regulatory, statutory and international convention surveys, inspections, repairs and maintenance for the five training ships on loan to the schools (EMPIRE STATE, ENTERPRISE, STATE OF MAINE, GOLDEN BEAR, and STATE OF MICHIGAN).

MARAD requests \$0.908 million for staff salaries and support in order to continue operation and management of the war risk insurance program, an increase of \$0.019 million from the FY 2008 enacted budget.

MSP conducted a Program Assessment and Rating Tool (PART) review in 2004. This review focused on the effectiveness of the MSP program in providing required availability of the MSP shipping assets for Department of Defense use. The MSP program received an overall score of 91, or 'effective.' OMB's PART recommendations and status are discussed in the Performance Overview. The funds requested in this budget will allow MSP to meet the performance measure targets identified in the PART and listed below.

Maritime Security Program Performance Measures

MSP Container Ships (TEUs in thousands)

Ship capacity (as measured in thousands of twenty-foot container equivalent units (TEUs)), for container vessels enrolled in the Maritime Security Program, available to meet DOD's requirements for intermodal, commercial sealift capacity. (Annual - Output)

	<u> 2005</u>	<u> 2006</u>	<u> 2007</u>	<u> 2008</u>	<u> 2009</u>
Target:		110.0	110.0	110.0	110.0
Actual:	113.2	118.0	120.9		

MSP Roll-on/Roll-off Ships (square feet in millions)

Ship capacity (as measured in millions of square feet), for roll-on, roll-off vessels enrolled in the Maritime Security Program, available to meet DOD's requirements for intermodal, commercial sealift capacity. (Annual - Output)

	<u>2005</u>	<u>2006</u>	2007	<u>2008</u>	<u>2009</u>
Target:	N/A	1.8	1.8	1.8	1.8
Actual:	1.2	2.3	2.4		

MSP ships (Number of ships)

Ship availability as measured by the number of ships contractually enrolled in the Maritime Security Program, available to meet DOD's requirements for commercial sealift capacity. (Annual - Output)

	<u> 2002</u>	<u> 2003</u>	<u> 2004</u>	<u> 2005</u>	<u> 2006</u>	<u> 2007</u>	<u> 2008</u>	<u> 2009</u>
Target:								
Actual:	46	47	47	47	60	60		

MSP Admin Efficiency

Maritime Security Program administrative costs expressed as a percentage of total MSP ship operator payments. (Annual - Efficiency)

	<u> 2002</u>	<u>2003</u>	<u>2004</u>	<u> 2005</u>	<u> 2006</u>	<u>2007</u>	<u>2008</u>	<u> 2009</u>

PERFORMANCE ISSUE

Marginal Cost of Performance

DOD relies on the U.S. commercial transportation industry to deliver equipment and supplies throughout the world in order to maximize defense logistics capabilities and minimize cost. Fifteen U.S. commercial strategic ports provide required capabilities to assure that DOD meets its national security missions and timelines. DOT, through MARAD, is responsible for establishing DOD's prioritized use of ports facilities and related intermodal services and facilities during DOD mobilizations, and ensuring the safe, secure, and smooth flow of military cargo through the commercial U.S. transportation system while minimizing commercial cargo disruptions.

MARAD's national security planning activities are critical to strengthening the security of the maritime transportation system; rapidly supporting response and recovery efforts to domestic and international emergencies under Emergency Support Function #1 of the National Response Plan;

Continuity of Operations (COOP) activities; and, the smooth secure movement of deploying DOD personnel and material from origin to destination.

ANTICIPATED FY 2008 ACCOMPLISHMENTS

- MARAD will continue to participate in joint military mobilization and security exercises.
- MARAD will strengthen the cooperative partnerships that ensure effective emergency planning and coordination with a variety of organizations.

FY 2009 PERFORMANCE BUDGET REQUEST

MARAD requests \$1.335 million for staff salaries and support in order to continue strategic port readiness activities and national security planning activities, an increase of \$0.035 million from the FY 2008 enacted budget. This level of funding will allow MARAD to continue to administer the MARAD port readiness program and continue national security planning activities that strengthen the security of the maritime transportation system and support the Department's emergency preparedness and disaster response and recovery efforts.

ORGANIZATIONAL EXCELLENCE

The funding request in this section contributes to the DOT Organizational Excellence goal and to MARAD's implementation of the six government-wide initiatives contained in the President's Management Agenda (PMA). The following table outlines the resources requested to achieve this objective and successfully implement the PMA:

	Appropriations, Obligation Li	dministration mitations, & Exe 000)	nipt Obligations

The totals above may not add due to rounding.						

1. STRATEGIC MANAGEMENT OF HUMAN CAPITAL

MARAD will continue to support the DOT strategic human capital management objectives, by:

- Using information technology to automate, simplify, and streamline processing of job applications and personnel functions.
- Providing HR oversight and guidance regarding competitive sourcing initiatives.
- Recruiting, rewarding and retaining supervisors based on OPM/DOT leadership competencies.
- Participating in the DOT Leadership Mentoring Program and supporting the MARAD Transportation Leadership Program.
- Fostering a diverse, results-oriented workforce through performance management and awards that link individuals/team/unit performance to organizational goals and results.
- Collaborating with internal and external sources to update core competencies and modify position descriptions and vacancy announcements.

2. IMPROVED FINANCIAL PERFORMANCE

MARAD's focus in this area is to continue to achieve clean audit opinions on MARAD's financial statements and enhance and expand our use of web-based accounting, wherever possible. MARAD's Office of Accounting continues to enhance MARAD's financial management systems and reengineer MARAD's accounting business practices to make full use of Federal resources to provide efficient, high quality, cost-effective and responsive services for

supporting and achieving the Administration's goals. Finally, MARAD maintains 100 percent participation in payroll direct deposit, near 100 percent participation in providing electronic payments to our contractors, full compliance with the Federal Financial Managers' Integrity Act (FFMIA), and full participation in the recovery of any discovered erroneous payments.

3. EXPANDED ELECTRONIC GOVERNMENT

MARAD's FY 2009 IT/E-Government Portfolio is aligned with MARAD's FY 2005 – FY 2009 E-Government Plan and is comprised of three main parts:

Content Environment (CE): MARAD is creating a single, integrated CE comprised of OMB E-Government initiatives, DOT enterprise initiatives, MARAD specific business applications (legacy, production, and new starts), and common content services.

Operating Environment (OE): MARAD has created and must sustain a comprehensive OE comprised of DOT common services (referred to as the DOT common operating environment, or COE) and residual MARAD services (referred to as the MARAD operating environment, or MOE). The COE provides local area networking, wide area networking, desktop support, messaging, and file and print services.

Governance: MARAD has built a sophisticated computing environment that provides substantial benefit to the mission of the Maritime Administration, other federal agencies, and private industry.

NOTES: MARAD's Capital Asset Plan and Business Case Exhibits (Exhibit 300) are posted on www.dot.gov.

The amounts listed above for E-Government include the contributions made to the Department and the cost of associated FTEs.

4. BUDGET AND PERFORMANCE INTEGRATION

This budget presentation contributes to the Administration's plan for full integration of budget and performance information, and using performance data to help make program and budget decisions. This FY 2009 budget request fully integrates our Performance Plan within the budget. This performance budget describes how the funds requested will contribute to the achievement of the DOT strategic and performance goals.

The Department of Defense Authorization Act for 2001, Public Law 106-398, contains the following section on a report to be submitted to the Congress.

SEC. 3506. REPORTING OF ADMINISTERED AND OVERSIGHT FUNDS.

The Maritime Administration, in its annual report to the Congress under section 208 of the Merchant Marine Act, 1936 (46 U.S.C. App. 1118), and in its annual budget estimate submitted to the Congress, shall state separately the amount, source, intended use, and nature of any funds (other than funds appropriated to the Administration or to the Secretary of Transportation for use by the Administration) administered, or subject to oversight, by the Administration.

The Maritime Administration (MARAD) receives funding from other Federal agencies primarily through reimbursable agreements. Funding from outside MARAD is placed in four accounts.

The largest reimbursement to MARAD is transferred by the Department of the Navy for MARAD's operation, maintenance and management of the National Defense Reserve Fleet (NDRF) Ready Reserve Force (RRF). Most of this funding is placed in the Vessel Operations Revolving Fund (VORF) account. This account covers all non-salary costs associated with maintaining the RRF/NDRF.

The funds transferred into the Operations and Training account comes from approximately 40 reimbursable agreements from other Federal agencies, for a variety of purposes. The largest ongoing reimbursable transaction into this account comes from the Navy and provides funding for the salary and administrative support costs for the RRF and the NDRF maintenance personnel.

The funds deposited into the Special Studies Account originate from the sale of customized data products to the public. These customized data products are generated from the MARAD/U.S. Army Corps of Engineers U.S. Foreign Waterborne Transportation Statistics. The specialized data products consist of U.S. trade, vessel, cargo and related data and include economic analyses and in-depth market assessments of the major marine industry segments. MARAD charges customers a fee to recover the cost of producing these special reports and studies.

The funds deposited into the Gifts and Bequests account are provided by the U.S. Merchant Marine Academy Alumni Association. The Association provides donated funds to assist the Academy, the regiment of Midshipmen and faculty in meeting the mission of the Academy. The funds support the music, arts, morale, athletics and chapel programs.

The report that begins on the following page includes actual reimbursement authority for FY 2007.

Funds Administered by the Maritime Administration Not appropriated to the Maritime Administration Fiscal Year 2007

Funds are Credited in Vessel Operating Revolving Fund (VORF)

Fund Source United States Army	Intended Use FLICKERTAIL STATE - Training on board	<u>Amount</u> \$31,000
Department of the Navy	CAPE PETERSBURG - Ops/Security/Port/Misc charges	\$9,188.405
Department of the Navy	CAPE JACOB - Per Diem/Security/Port Charges/ Maintenance/Misc.	\$11,327,871
Naval Sea Systems Command (NAVSEA)	INACTIVE vessels in NDRF for required shipboard maintenance	\$27,652
Defense Energy Support Ctr (DESC)	Costs associated with SS CHESAPEAKE	\$5,986,000
3 D Marine Aircraft Wing	Marine Cargo training and communications meeting	\$4,707
Missile Defense Agency (MDA)	Texas Clipper II/Pacific Collector/Beaver State	\$4,205,000
Military Sealift Fleet Support Command (MSC)	CAPE GIBSON - Training aboard	\$10,000
Army, Space & Missile Defense Command (SMDC)	Flight test mission aboard Pacific Collector	\$147,000
Naval Facilities Engr. Cmd	OPDS support	\$153,500
MSC	CAPE GIBSON - Cart Rig Team training	\$10,000
Department of the Navy	CAPE FLICKERTAIL JLOTS	\$3,137,650
Department of the Navy	Support of CAPE MOHICAN	\$5,046,788
Department of the Navy	Support of SS WRIGHT	\$1,242,200
U.S. Army, HECSA	Sturgis at JRRF	\$29,131
3 D Marine Aircraft Wing	SS CURTISS (Marine exercise)	\$7,500
MDA	Pacific Collector - Exercise onboard	\$1,480,000
Department of Homeland Security	CAPE CHALMERS - M&R aboard	\$50,000
Department of the Navy	Support of SS CURTISS	\$3,731,416
3D Marine Aircraft Wing	SS CURTISS (Meal costs, overtime crew, port costs)	\$90,000

Report to Congress Funds Administered by the Maritime Administration Not appropriated to the Maritime Administration Fiscal Year 2007

Funds are Credited in Vessel Operating Revolving Fund (VORF)

Fund Source	<u>Intended Use</u>	<u>Amount</u>
NAVELSG	FLICKERTAIL STATE - Costs associated with	\$73,800
NAME OF	personnel training	Φ5.400
NAVELSG	CAPE JOHNSON/FLICKERTAIL STATE - Training	\$5,400
Department of the Navy	CAPE VICTORY - Turbo activation	\$420,974
Defense Energy Support Ctr	CHESAPEAKE SALM - Costs associated with repair	\$500,000
Department of the Navy	CAPE CALLAGHAN - Turbo activation	\$700,000
MSC	SS CAPE GIBSON - Summer EX 07	\$370,000
Naval Surface Warfare Center	FLICKERTAIL STATE -Pendulation Control System project	\$50,000
