AIR TRAFFIC REFORM 2017

ATO

All air traffic services

Controllers and air traffic technicians

All air navigation facilities and infrastructure

In general – anything or anyone currently responsible for or involved with the daily provision of air traffic services

New technology

FAA

Safety research

Safety oversight responsibilities – safety inspectors for airlines, manufacturers and the new ATO

Standards and certification oversight – pilot qualifications; aircraft, engine and parts certification

All safety-related oversight activity stays in government (DOT)

New entrant certification (i.e. UAS, commercial space)
